The portion of the note in which Germany disclaimed all responsibility for what might happen to neutral ships, either by submarine torpedoes or mines, produced a feeling of apprehension among some high officials that a critical point might be precipitated in the relations between the United States and Germany. These officials suggested that there would now be less cause for anxiety if Germany had perotiated, as did Great Britain, France of investigation any difficulties

villa Board of Trade, The first of a series of "open house" nights planned for various groups of employes by the Young Men's Christian Association was held Friday night when the Harriman Club met the Madein-Oregon Club in three classes of contests — gymnastic, dramatic and aquatic. Equal honors were shared by Prescription Profits

"Must be lots of money in the prescription business," said one of our old patrons to the writer he paid 50c to the polite cashier at the dispensing counter. How much did it cost you to fill that prescription? Here is the reply based on facts and figures from a store established 50 years, and with which the writer has been connected for the past 33 years. We fill each month over 5000 prescriptions at an average charge of 53c each. This requires a

monthly payroll of \$800 and an investment of \$15,000 in stock. Add to these a correct proportion of fixed charges and the net profit is less than 7 per cent. Nor is this all. There is the responsibility for human life, the risk of error for which we are properly held strictly accountable by the patron.

We seldom advertise our prescription department in public print. What's the use? People are looking for safety, skill, care and promptness. The average layman goes to his druggist as to his doctor, because he has faith in him; a confidence inspired by his known reputation and character and skill. This will ever be the case.

Many stores try to save expense by turning over to the dispensing clerk various other duties. He sells everything about the store from stamps and chewing gum to rubber goods and face powder. We have always regarded the compounding of prescriptions as without any exception the most responsible and holding greater chances for harm than any other business calling, so it comes that our dispensers fill prescriptions and do no other work. They are never called away from the task of measuring or weighing the remedies for the sick one in quest of health; even the directions are neatly typed by one who devotes his entire time to this important task.
