The Pange They're All Trying to Imitate -The New Garland Combination Range

of Garland superiority is Garland popularity. This THE PARTY OF latest Garland is of improved design and construction, and it contains features not found in any other range, amply protected by Garland patents. It has 33% greater efficiency than any other combination coal and gas burning range on the market. It has been thoroughly tested and tried out in every respect. The body is a heavy castiron

construction, proof against moisture from gas, and the castings throughout are of the highest grade. A ventilated flue carries off the products of combustion when gas is used, and in no way interferes with the operation of the oven with coal or wood. Both the gas burners and cooking top for coal or wood can be used at the same time, if desired. The "two-fuel" construction of this splendid range makes possible a warm kitchen in Winter, a cool kitchen in Summer. The double cooking space enables the housewife to meet any emergency. Call in at either of our stores and see this wonderful Range.

FATHER GREGORY ASSAILED

Writer Denounces Acts of Germans in Belgium and Elsewhere.

PORTLAND. May 15,—(To the Editor.)—I notice Father Gregory again comes to the front in defense of Germany's act in sinking the Lusitania, and charges Americans with venal and mercenary habits, and says there would be need in Europe pay had we not mercenary habits, and says there would be peace in Europe now had we put an embargo on munitions. Also, he asserts there will be more occurrences like the sinking of the Lusiania. Perhaps he knows, but let us hope not.

It was this same Father Gregory who immediately after the invasion of Belgium, and the sacking of Louvain, asserted that Germany was the foremost nation in the world—the most enlightened, the most peaceful and the most humane; and who denied the atrocities charged to her in Belgium.
