Water was holsted over the side in palls and poured through the hatchway gratings.

From the boats, the men saw only columns of smoke floating upward, fed by thin streams, that forced themselves up through the batchways. For an hour they were whisked through the towering seas by their taut lines, until the violence of the gale tore them loose and sent them adrift at dark.

The court concludes that, in view of the well-settled principles of internathe relief sought by the plaintiff is political rather than legal, and that to grant such relief would be for the court to cuterlain jurisdiction on a matter exclusively within the political and executive branch of the Federal

Government.
The allegation that the war would cease if the sample of business houses will be assemble of purpose of studying advertising is stopped is ediperated in truthful advertising. It will be opinion, not susceptible of proof, and common to advertising opinion, not susceptible of proof, and carned be made the basis of judicial action, according to the court.

The allegations of this affidavit fall far short of showing such casual connection between the injury complained of and the damages apprehended by the plaintiff, says Judge Turner.
