

MILITARY TRAINING ARGUED BY LEAGUE

General Anderson Brands Expressions Against Use in Schools 'Morganable.'

AUDIENCE'S FAVOR DIVIDED

Censure and Applause Greet Discussions as to Effects of Trained Citizenship—Federal Report Cited by Speaker.

'Reasonable' was the term applied by General T. M. Anderson and others to the expressions of some of the speakers against military training in the high schools...

The speeches which were so roundly scored by the Grand Army of the Republic veteran, however, were heartily applauded by the majority of the people in the audience...

Federal Report is Referenced

'When you go to war,' he declared, 'you are not fighting for yourself, but for the great monopolies of business and capital that have taken the greater part of the wealth of the country and which look to the laboring classes to protect them in their possession of it.'

'When they try to train men for an army to defend the country, it is the people in that 85 per cent that they are training to go out and fight for that 5 per cent of the wealth which has been left them.'

Roosevelt 'Influences' Refuted

Theodore Roosevelt referred to some influences which are trying to Chinify the United States, but when it comes down to brass tacks, I would rather be Chinified than Morganized. In China they take away not only your rights, but the mental alertness that would make the people aware that they were despoiled...

'I don't like that soldier, I didn't raise my boy to be a soldier, any more than the militarists do, but neither do I like the sentiment of those who seek to go into the high schools and train our children in military affairs.'

'We do not want our boys taken, while they are in the formative period of their lives and trained into the militaristic idea, I do not believe that one should be trained to be a soldier until he has reached his estate and is in a position to know really what he is to fight for.'

'If the workers received back the rights of which they have been deprived so that they could know that an army would be for the purpose of protecting the own rights and not the property of a few capitalists, there would be no trouble in training them into soldiers and getting them to serve in the army if there was need.'

Defense of Move is Made

Ex-Senator Fulton, defending the move for military training in the schools, urged the importance of training as a protection to the men of the country in case they were precipitated into a war.

'While we do not want war,' he said, 'it is our duty to our sons to prepare them so that in case war becomes a necessity the sacrifice that they must make shall be as little as possible and yet be effective.'

'It is our duty to supply military training to these boys because it will protect and defend them from the nation when the awful time may come that demands their service in the field. The country that can call out in time of war a trained citizenship can vindicate itself at far less cost than a country that is obliged to call out an untrained citizenship.'

'And how and where can we teach the rudiments of military affairs if not in our public schools?'

J. B. Gearty gave an address in opposition to armed preparedness and to militarism in all its forms, declaring that the demand of the world is for a nation that reaches beyond national boundaries. C. M. Remy also spoke in the same vein.

General Anderson and C. E. Cline made short remarks at the close of the meeting.

'I scarcely dreamed that American citizens could have held the views which I have heard expressed here today,' said the former. 'If George Washington and the men who founded this country had been of the same opinion, the world would be no United States today in which these people who are airing such opinions would be at liberty to speak their opinions freely as they do.'

ONALASKA MILL GOING UP

New Town Expected to Have Population of 500 Soon.

CENTRALIA, Wash., Oct. 9.—(Special.)—Work is progressing rapidly on the erection of the new sawmill of the Onalaska Lumber Company at Onalaska. A temporary mill is turning out the lumber and timbers for the larger structure, which will have a daily capacity of 150,000 feet. When the mill is completed the company's force will be increased to 250. These, with their families, will give the town, which didn't exist 20 months ago, a population of 500. The mill company recently completed a standard gauge railroad from Napavine to Onalaska, giving the new mill connection with the main line. When the lumber and shingle mills, dry kilns and other equipment are in operation next year they will represent an expenditure of \$200,000.

Clatsop Assessment \$18,988,192.

ASTORIA, Or., Oct. 9.—(Special.)—The 1915 assessment roll compiled by Assessor Lienenweber today gives the total valuation of taxable property in Clatsop County as \$18,988,192, or about \$28,000 less than last year. This is in addition to the valuations of property owned by public service corporations, which are usually about \$1,500,000.

Unity Millman Buys Much Timber.

L. D. King, a mill operator near Unity, Or., has purchased 500,000 feet of timber, mostly yellow pine, from the Government. The timber is in the Whitman forest, and was sold for \$225 a thousand for the pine and 50 cents for the Douglas fir.
