Self Respect and Good Glasses

We all take pride in selecting those articles which we must be seen in—hats, shoes, clothes—we not only want them to fit well and be comfortable, but they must look well.

To be comfortable such things must fit well, and to do this they must be made right.

So it is with eyeglasses. To wear the best-fitting, best-looking and most comfortable lenses and mountings is simply a matter of making the right start.

We are not ordinary "sellers of glasses," our service means more than that. It starts with a thorough examination to the very nicest degree the actual kind and amount of error that exists in each eye.

From this we determine mathematically just what focus the lenses are to be made to give perfectly normal vision.

We go even further than that. We exercise the greatest skill in the taking of very careful facial measurements in order that each lens may be placed before the eye in its correct relative position, and that is very important.

And, lastly, we employ only the very finest of lenses and mountings, selected and made with utmost discrimination in order to give you the greatest personal comfort and satisfaction.

If you wear glasses, or ought to, let us discuss YOUR particular needs. The reasonable basis of our charges is always a pleasant satisfaction to our customers.
