TAX ON SMALLER INCOMES UNLIKELY

Democratic Leaders in House Decide to Put Defense Levy on Sums Above \$3000.

2 TO 8 PER CENT PROPOSED

Tentative Bills Looking to Raising \$100,000,000 First Year for Preparedness Under Discussion by Congress.

WASHINGTON, Feb. 19. - The pro posal to amend the income tax law so s to include smaller incomes virtually is certain to be abandoned in favor of an increased rate on those already taxed, it was declared tonight by Democratic House leaders.

Sentiment against lowering the exemption limit on the order to provide additional revenue for the preparedness programme crystalized, it was said, in the Democratic caucus Thursday night when Democratic Leader Kitchin de-clared against changing the present minimum of \$3000. Since then protestnts against all reduction plans have ecome more outspoken daily. Leaders declared tonight that virtu-

ally the entire preparedness revenue burden would be met with income taxes. Tentative bills looking to rais-ing \$100,000,000 solely by an increased

ing \$100,000,000 solely by an increased income tax rate are being discussed and will be offered soon in committee.

One of the Democratic leaders who will be active in framing the Administration bill, said tonight he would suggest doubling the present 1 per cent rate on incomes below \$20,000 and possible wake the tax on incomes above. rate on incomes below \$20,000 and possibly make the tax on incomes above that amount as high as \$ per cent. He also might suggest lowering the minimum income subject to the 1 per cent rate to \$15,000, he said. Married men, according to this plan, would have the advantage of additional \$1000 exemption as in the present law.

Although neither the naval nor military affairs committees has indicated what amount of money will be needed to meet the expenses of preparedness, it generally is understood that for the first year it will be close to \$23,000,000. Tentative plans, it is said, will proceed therefore on the theory that about \$100,000 will be needed.

The general impression is that active

The general impression is that active consideration of an income tax bill will not begin in the ways and means committee before some time next month, but in order to facilitate the work the committee clerks now are busy gathering data. It will be ready to place before the committee on convening and thus, it is hoped a bill to place before the committee on con-vening and thus, it, is hoped, a bill will be reported within a few weeks. No hearings will be held on the rais-ing of preparedness revenue, however, until after the military committee re-ports to the ways and means com-mittee on the amount of money it will

ORCHARDS HURT BY STORM

Rabbits Are Driven to Attack Even Older Trees, Says Professor. *

OREGON AGRICULTURAL COLLEGE, Corvallis, Feb. 19.—(Special.)—That the recent severe weather conditions have seriously affected Oregon orchards of peach, pear and cherry trees is evi-denced by the large number of in-quiries received by the department of horticulture of the Oregon Agricultural College within the past week. One orchardist writes of severe injuries to a 500-acre orchard of 5-year-old trees, to the station specialists.

Professor Lewis declared before leaving Corvallis that the unusually deep snow of the past month caused

rabbits to attack not only young fruit trees, but also trees 5 or 6 years old.

A Physician's Advice on Cause and Cure.

A New York physician who has made a special study of stomach and intestinal diseases says that nearly all intestinal troubles, as well as many diseases of the vital organs, are directly traceable to a deranged condition of the stomach. This in turn is due about nine times out of ten to excessive acidity, commonly termed sour stomach or hearthurn, which not only irritates and inflames the delicate lining of the stomach but also may set up gastritis and in a large majority of cases gastric ulcers are accompanied by hyperacidity. It is interesting to note that he condemns the use of patent medicines, and practically all medical treatment that is designed to act upon the stomach lining, stating that the best results are obtained by the use of a simple antacid which acts upon the contents of the stomach and neutralizes the acidity of the food, thus removing the source of the trouble. As an antacid he prescribes ordinary bisurated magnesia and says that irritating medicines and medical treatments are useless, so long as the contents of the stomach remains acid: remove the acidity and there will be no need for medicine—the inflamed lining of the stomach will then heal liself. Sufferers from acidity, sour stomach and heartburn should get a small bottle of bisurated magnesia from their druggist, and take a teaspoonful in a quarter of a glass of hot or cold water after each meal, repeating in fifteen minutes, if necessary, this being the dose which the doctor has found most efficacious in all cases,—Adv.

Although there has been some trouble isfactorily today, and the contract will between the city inspectors and the company, all matters were settled sat-given till Summer.
