The ocean route social and business relations, as well traveled as the highway between Portland and San Francisco, for example. tured by the enemies of Great Britain, their lives would be safe according to the dictates of international law.

Before the ship sailed a warning not to travel on it had been advertised, but the idea that they ran any more than the ordinary risks of ocean travel seemed so absurd to the travelers that they treated the warning as an empty threat. Although the warning came from the German embassy and might properly have been regarded as a threat from an ostensibly friendly nation to do a hostile act, no attention was paid to it by the State Depart-

The marine tragedy sent a thrill of horror through the Nation—that is, all except that un-American part of it which looks at every German act through friendly and sympathetic spectacles. The almost unanimous sentiment was that only prompt apology disavowal and reparation by the German government could prevent the United States from retaliating by war or severance of diplomatic relations. This opinion was justified by a warning given by the United States nearly three months previous that Germany would be held "strictly accountable" for any such acts as were then threat. After several days of solitary deliberation, President Wilson fortified that opinion by dictating to his Secre-tary of State a note to Germany stating that he would not "omit any word or any act" necessary to maintain the American rights which had been set at naught. This note was generally regarded as meaning that, unless the German reply promptly gave the full satisfaction which the President had demanded, friendly relations would be severed, perhaps as the first step to-

ward war. But Germany both refused satisfac tion and defended the act. Far from arousing reprobation, the crime was hailed in Germany as a great victory. Germany relied upon the known deter-

Herr von Jagow's reply to Mr. Wilson's ultiatum is in the nature of a counterultimatum, for it conveys a threat that, nless the United States Induces Great Britain forthwith to conform its blockade to German views, restraint on sub-marine operations will again be thrown That threat warrants the President in saying one more word to Ger-many—that, if the latest promise is broken, the President will, after investigating the facts without asking for evidence from Germany, imme-diately sever diplomatic relations.

THE REAL OBJECTIVE.

It isn't actual defense the war party wanis—it is contracts and profits; dread-noughts and armor plate.

If these profit patriots were consistent, honest or sincere, the first cry that would go up would be a protest against this country being stripped of animunition, ships, horses and almost everything needed for defense.
