

By JOSEPH MACQUEEN.

"We lead but one life here on earth. We must make that beautiful. And to do this, health and elasticity of mind are needful; and whatever endangers or impedes these must be avoided!"

—H. W. Longfellow.

With Americans of Past and Present Days.

Charles Scribner's Sons, New York City.

Americans are too apt to assume that it was Americans only who won the independence of this country from Great Britain...

Our distinguished author is the French Ambassador to this country. He writes: "The dean now, not only of the diplomatic corps in Washington, but of all my predecessors..."

There are no original studies in the book, the most important being "Rochembeau and the French in America, from unpublished documents..."

The tone is pleasantly discursive, yet critical. One interesting point is that a new and intimate story is furnished of George Washington.

The American war had been for five years in process, for two years a treaty of alliance, having as sole object to maintain effectually the liberty, sovereignty and independence...

Rochembeau, future marshal of France, had been destined for the priesthood, but his elder brother died...

American and French troops were placed under the command of General Washington. The French and Americans were personal friends...

The American troops were poorly clad, according to Clasen: "I am full of admiration for the American troops. It is unbelievable that troops composed of men of all ages..."

It was at first feared that Rochembeau and his French army would be sent to the West Indies...

The description of the battle and victory at Yorktown is a splendid piece of writing...

It is said in those days that labor was expensive "and is paid \$1 per day."

In 1782 Rochembeau returned to France, and his army was sent to the West Indies...

The other essays and addresses in the book are: "Major L'Enfant and the Federal City, Washington, D. C."...

A Western Warlock, by Samuel G. Blythe. You will remember possibly of the Warlock of English history...

In this sensational, rapid-fire, able American novel, "A Western Warlock," we meet with an American king-maker...

The last chapter is an American graft, or the improper use of dollars as bribe money in corrupting politics...

It is easy to read between the lines that the character of Senator Paxton is a smart tonight and put something over on me...

He smart tonight and put something over on me. A boy brought me a telegram and I opened it and it said you are sold to Jackson in the Cotton States League...

The Gold Trail, by H. de Vere Stackpole.

Intellecually written, with a true spiritual touch, these sketches and cameos reflect the present war time in England. Decidedly worth reading.

These Luncheoners, by J. D. Beresford. A splendid English novel in the department of modern realism. Quite an important contribution to 1916 story-writing.

Wind and Weather, by L. H. Bailey. Charles Scribner's Sons, New York City. One hundred and twenty-seven poems of serious, intellectual beauty...

Under the Big Dipper, by D. George Dery. A romantic, sentimental story, with Oriental color. The love interest is properly subordinated.

Abraham Lincoln, by Daniel E. Wheeler. Illustrated. 50 cents. The Macmillan Company, New York City.

Twenty-three chapters of a new book on the life and times of Abraham Lincoln, a book that is remarkable for its wealth of anecdote.

The Symphony Play, by Jennette Lee. 50 cents. One encouraging, educative sign of the times is the appearance—and performance—of the one-act play.

Brother and the Lady With Wings, by Billy Boy. "The Mother," "The Brother" and "The Lady With Wings"—the first as a prelude and the others successively as allegory, andante and allegro.

Under the Big Dipper, by D. George Dery. A romantic, sentimental story, with Oriental color. The love interest is properly subordinated.

Abraham Lincoln, by Daniel E. Wheeler. Illustrated. 50 cents. The Macmillan Company, New York City.

This is his first novel. Several signs in the book say so. Next time, he will do better. He has the natural talent of the storyteller.

Modern Poultry Culture

Sticks to the surface and it is waterproof. Moreover, it is adapted for outdoor use as well. Here is the formula:

Adhesive Cement Whitewash.

Slake two pecks of lime with boiling water, adding slowly and stirring constantly until a thin paste results. The lime will be lumpy if the water is added too fast...

Poultry Husbandman, Clemons College, South Carolina.

WHEN disease appears in a poultryman's flock and his fowls are afflicted, he immediately organizes a campaign to combat it.

But, unfortunately, these apparent chicken-killers do not constitute his main foe. He has an enemy whose legions wage battle continuously, not openly, but from under cover...

Working harmoniously to multiply their numbers at the expense of the host, and these divisions of lice, mites and fleas...

Let us first consider the general plan of operations of these pests, then study the tactics of the different members of this triumvirate, and by attacking their weaker offenses, overcome and finally annihilate them.

All fowls enjoy dark, dirty, unsanitary poultry houses, and filthy nests and roosting quarters. Given such a breeding ground, their reproduction is carried on to the fullest extent.

light-brown powder well on a plate of glass, and preserve it in covered tin cans.

Spread paper on the ground and dust the fowls over it, to prevent the waste of powder. Hold each fowl by the legs with the head down, and rub the powder thoroughly into the plumage...

Before releasing the fowl grease the flesh under the vent with 25 per cent strength mercurial (blue) ointment, covering a space of skin not larger than a silver quarter. Use no more ointment, or use full strength mercurial ointment, as any mercurial preparation is absorbed and every fowl here indicated is not required to destroy the lice.

Examine the face of the fowl near the beak, and also under the beak, for red-dish-brown bugs or "stick-tight" fleas. These are prevalent in the South, but rarely found in the North, and if present, grease them with a little of the 25 per cent mercurial ointment.

Your fowls and poultry house have been cleansed of parasites, and with regular applications of the mercurial insecticide on roosts, nests and nearby places, it is possible to be free from lice forever. When new fowls are purchased grease them with the ointment, and if they are infested with lice, dust them with the plaster of paris powder in addition.

"Blackhead in Turkeys and Measles for Next Week's Article," and it should be carefully read by every poultry raiser. It is a serious disease, akin to white diarrhea, and the great vitality of its germ adds to the danger. The symptoms are easily detected by those who are familiar with them.
