branded Packages. WALLA WALLA, Wash., July 22 .-

(Special.)—Grocers of the city and Horticultural Inspector C. W. Gilbreath

(Special.)—Grocers of the city and Horticultural Inspector C. W. Gilbreath Friday reached an agreement for cooperative efforts to clear up the fruit marketed by growers. The grocerymen agreed to refuse to accept unbranded or misbranded fruit packed and to report to their inspector any attempted unlawful sales of such fruit. Last year there was lack of co-operation between the authorities and grocers and much infected fruit was sold here.

"Under the branding section it shall be the duty of every person growing, packing, selling or offering for sale fruit grown in this state, to plainly mark on the outside of the package or box the variety, name of place or locality where grown, and name of grower or association of growers, and in the case of apples, pears and peaches the net weight or number in the box or package," said Inspector Gilbreath. "The penaity covers false branding changing the brand, obliterating the original marks, or changing the fruit packages otherwise marked

PROFESSOR W. S. BROWN AD-VISES MOSIER FRUITMEN.

Growers Are Praised Highly for Cooperative Efforts and Success of Association.

MOSIER, Or., July 22.—(Special.)— Professor, W. S. Brown, field expert of the Oregon Agricultural College, who was in Mosier recenty, giving advice to orchardists, said that while orchards here are healthy, that which concerns the growers is the compact condition of the soil in some places, which causes Winter kill, and which may be remedied by blasting and drainage.

was in Mosier recenty, giving advice to orchardists, said that while orchards here are healthy, that which concerns the growers is the compact condition of the soil in some places, which causes Winter kill, and which may be remedied by blasting and drainage.

In the orchards he visited he found little coddling moth or insect injury and few infections from scab. A small amount of aphis was noted on the cherry trees and a little spray burn on some of the apples was observed.

"In the tops of some of the young trees I find that the foliage is dense," he said. "Summer pruning is necessary on some of these trees to allow more light to strike in, as well as to permit the trees to develop properly and furnish the buds for next year's crop. This should be done between now and September 1."

Professor Brown stated that as far as he knows Mosier is the only district where there is such co-operation and honest endeavor, and that the Mosier Fruitsrowers' Association is the only growers' organization in the Northwest in which 190 per cent of the growers of the district are enrolled. "This is of the presented of the growers of the district are enrolled." This is of the presented of the growers of the district are enrolled. this city Monday night.

According to a telegram received today, Sheriff Frohmann was in Caldwell
yesterday when a telephone call informed him that a car tallying with
the one for which he held a description
had been seen to pass on a country
road, and he took up the pursuit, although the car had more than two
hours' start of him. Brown will be
brought back in the car in which he
was captured.
