Officials of the Eastern Forwarding Company, the submersible's American agents, adhering to their policy of reticence regarding the sailing plans of the underwater liner, refused to comment on the Washington dispatch sent out late today, concerning the probability of her salling tomorrow or the intimation that protection was desired

### Second Tug May Be Used.

That they are concerned about the boat's safety during her run down Chesapeake Bay seemed to be indicated in a report, regarded as reliable, that it is planned to have a second tug accompany the submarine and the Timmins as far as the Capes to guard against the possibility of "accidents"

Never before have the force and scince of Central Europe come into armed onflict with the western island, Far back along the fading paths of history crusading armies moved across the salt water to the fray. The chivalry of Creey and the archers of Agincourt, who disembarked upon the coast of France; the sea rovers who affronted the power of Philip II on the Spanish Main, and the soldiers who withstood him in the Low Countries: the armies of William III and the Duke of Marirough, humbling the glory of Louis XIV; the far-ranging ships and stuborn infantry that sustained a great King in one century and warred down a great Emperor in the next-all had one birthplace, all were manifestations of one peculiar form of power.

General Crowder holds that the state soldiers are not subject to duty outside of the United States un less and until they are formally drafted by order of the President; that the are under control of the Federal Gov ernment and not of their respective state Governors, and that they are en
