

WHEAT PRICES TO STAY, IS BELIEF

Board of Trade Head Thinks Forcing of Dardanelles Is Only Remedy.

WORLD'S PRODUCTION CUT

Federal Officials Deny Rumors of Pending Investigation Into Recent Rise of Flour and Wheat in Chicago Mart.

CHICAGO, Aug. 12.—(Special.)—Based on unofficial reports that a Federal investigation of flour and wheat prices is imminent, J. P. Griffin, president of the Chicago Board of Trade today issued a statement analyzing the situation and telling why prices have advanced.

United States Attorney Charles E. Cizne, his assistant, Joseph E. Fleming and Hinton G. Clabaugh, head of the local Federal bureau of investigation, Department of Justice, all emphatically denied during the day that there is, or as far as their knowledge is concerned, to be, any such investigation.

FARMERS' CAMP CLOSES

SPORTS, DANCES AND TALKS ON RURAL LIFE OCCUPY WEEK.

HOOD RIVER, Or., Aug. 12.—(Special.)—With a total attendance of 600 at the different meetings, the pleasure and business portion of the program of the first annual Hood River County Pomona Grange encampment was brought to a successful close tonight.

Since last Tuesday night the members of the five granges of the county, most of them temporarily domiciled in a city of tents in a magnificent fir grove about 50 yards from Parkdale station and the large McLean Hall, participated in sports, dances, musical and dramatic entertainments and have listened to addresses.

"It has been the best camp meeting that I have ever attended," said Dr. Hector Macpherson, of the Oregon Agricultural College, who addressed the grangers yesterday.

President W. J. Kerr, of Oregon Agricultural College, who motored up from Portland with his family yesterday over the Columbia River Highway, talked to the vacationists today.

Speakers and members of the granges at their encampment expressed strong opposition to the proposed bill, providing for the limited manufacture of beer in Oregon.

The grangers adopted a resolution indicating representative N. J. Siskot his efforts to secure for Oregon reclamation work 40 per cent of the Oregon grant land funds.

The grangers' union has received the movement for local grain elevators, but it is too late to do anything this year.

GARFIELD GRAIN SALES HEAVY Approximately Half of New Crop Taken Around Dollar Mark.

POMEROY, Wash., Aug. 12.—(Special.)—It is estimated that one-third to one-half of the new grain in Garfield County has been sold since the price reached \$1. The largest sale reported was that of 40,000 bushels by H. F. Clodum to Fred Matthes, representing W. H. Houser, of Portland.

Although the farmers throughout the county reported a light stand of grain this spring, some recent yields are being harvested. R. B. Meltzer, who averaged 8000 sacks of wheat, which averaged 14 sacks to the acre. C. E. Clusler got 48 sacks, though \$1.15 was offered this morning for club. T. J. O'Hara yesterday sold 3500 bushels of club to the Farmers' Grain Agency at \$1.06. E. L. Smith, who contracted 65,000 bushels of 1915 wheat last year, now stands a chance of making some money if the wheat market takes a jump. He says that figuring interest on his money and insurance at today's quotations he can break even on his buy.

WHEAT QUIET AT PENDLETON Sales of 75,000 to 100,000 Bushels at \$1.03 and \$1.04.

PENDLETON, Or., Aug. 12.—(Special.)—The local wheat market was quiet today, with 75,000 to 100,000 bushels being sold.

The price at which most of the grain was contracted today was between \$1.03 and \$1.04, though \$1.15 was offered this morning for club. T. J. O'Hara yesterday sold 3500 bushels of club to the Farmers' Grain Agency at \$1.06. E. L. Smith, who contracted 65,000 bushels of 1915 wheat last year, now stands a chance of making some money if the wheat market takes a jump. He says that figuring interest on his money and insurance at today's quotations he can break even on his buy.

HOPE FOR BEAR AROUSED INSPECTORS IN LETTER DECLARE CAPTAIN NOPANDER NEGLIGENT.

License of Master Suspended for Six Months and That of Third Officer for One Year.

Headway being made in working the stranded steamer Bear off the beach north of Cape Mendocino, where she piled up June 14, when on her way from Portland to San Francisco, has created added interest here in her salvage.

In suspending the license of Captain Nopander for six months and that of Third Officer Dolan, of San Francisco, set forth their findings in a letter to the board of investigation as follows:

"After careful consideration of the evidence adduced at our trial held before this board on June 29, 29 and 30, 1915, on charges of negligence and unskillfulness in connection with the stranding of the steamer Bear three-fourths of a mile south of Bear River, Humboldt County, California, on June 14, 1915, we are satisfied that the charges are sustained in that you were negligent in not using a tube at every cast of the lead when on soundings and comparing the nature of the bottom with that shown on the chart to verify your position. Had you done so, you would have been able to ascertain the position of the third officer, who was in charge of the sounding machine.

You were unskillful in not hauling your ship off shore at 8:44 P. M. when you got bottom with 34 fathoms of wire out and having 36 fathoms of water, at which time you should have had 300 fathoms of water had your course and distance been good from Fox Rock. Had you plotted the position of the ship on the chart you should have known that the ship had been set ashore and how much. Had you taken these precautions the steamer Bear would not have stranded.

Third Officer Ture Olund, who remained in Portland, was suspended for one year for the same reasons at the time, and in their official letter to him the inspectors reviewed the case as follows:

"From your own testimony the ship was on soundings from 8:31 P. M. when you had 130 fathoms of wire out and you did not sound various intervals thereafter, until at 9:13 P. M. when you got bottom at 80 fathoms; and from then on casts were taken at 2:22, 2:45, 3:05 and 3:20 fathoms of wire out and no bottom, until at 10:15 P. M. when the last cast was taken, when you had 200 fathoms of wire out and reported no bottom, and before you had the lead hove in the ship grounded. Had you paid more attention to the sounding and looked at every cast you could have discovered your error; as it is impossible from the position in which the ship was on the chart to have 200 fathoms of wire without getting bottom."

United States Attorney Charles E. Cizne, his assistant, Joseph E. Fleming and Hinton G. Clabaugh, head of the local Federal bureau of investigation, Department of Justice, all emphatically denied during the day that there is, or as far as their knowledge is concerned, to be, any such investigation.

The statement by Mr. Griffin is as follows: "Various reasons have been advanced by different authorities for the prevailing high prices of wheat the world over. In my judgment there is but one explanation—insufficient production of wheat the world over to meet the consumptive requirements.

"The crop in the United States for the present year as indicated by the Government reports of the Department of Agriculture, a reduction of 258,600,000 bushels from the 1915 crop.

"The European crops are the poorest in a general way that we have known a situation where the production of surplus producing nations is subnormal. The crops of consuming nations are likewise poor, intensifying the demands upon those countries raising a surplusage of wheat above their requirements.

"No Hope of Reduction Seen. "It might be worthy of mention in passing that the English controlled market at Winnipeg closed at \$1.48-5/8 for December wheat today against a close of \$1.47 in the Chicago market.

25 KILLED; 63 WOUND IN TROLLEY CRASH

Head-On Collision Between 2 Crowded Cars Follows Mad Dash Down Grade.

CAUSE IS UTTER MYSTERY

Motorman Seen Waving Arms in Frantic Appeal When Passing Station and Power Is Shut Off, but Too Late.

JOHNSTOWN, Pa., Aug. 12.—Twenty-five persons were killed and 63 injured in a head-on collision between two crowded trolley cars on the line of the Southern Cambria Trolley Company, between the Echo and Brookvale, seven miles from here today. Fourteen persons were instantly killed, while the others died after being removed from the wreckage. Several more are in a critical condition and will probably die.

The cause of the accident has not been determined. Coroner Fitzgerald at once started an investigation. The company in a statement tonight said that the cars were on a grade on which to base a report on how the accident occurred.

As soon as word of the wreck was received here a score of physicians and nurses were rushed in automobiles to the scene, followed shortly afterward by motor trucks heavily loaded up as ambulances and several pieces of motor fire apparatus. Because of lack of doctors many of the injured were compelled to wait nearly two hours for medical treatment. The victims were loaded into automobiles and street cars and taken to South Fork and Johnstown.

According to persons in the vicinity at the time of the wreck one car was standing still near the car barn at Echo when the other car in charge of Motorman Agus Varner crashed down a steep grade and into it. Both cars were demolished. Shortly before the accident Varner's car was seen to rush past the station at Brookdale with Varner frantically waving his arms. Battering the car, which, according to employees of the company was going at the rate of 30 miles an hour, was not under control, the current was shut off, but the power plant, but this action was taken too late to avoid the crash.

"It has been the best camp meeting that I have ever attended," said Dr. Hector Macpherson, of the Oregon Agricultural College, who addressed the grangers yesterday.

President W. J. Kerr, of Oregon Agricultural College, who motored up from Portland with his family yesterday over the Columbia River Highway, talked to the vacationists today.

Speakers and members of the granges at their encampment expressed strong opposition to the proposed bill, providing for the limited manufacture of beer in Oregon.

HOPE FOR BEAR AROUSED INSPECTORS IN LETTER DECLARE CAPTAIN NOPANDER NEGLIGENT.

License of Master Suspended for Six Months and That of Third Officer for One Year.

Headway being made in working the stranded steamer Bear off the beach north of Cape Mendocino, where she piled up June 14, when on her way from Portland to San Francisco, has created added interest here in her salvage.

In suspending the license of Captain Nopander for six months and that of Third Officer Dolan, of San Francisco, set forth their findings in a letter to the board of investigation as follows:

"After careful consideration of the evidence adduced at our trial held before this board on June 29, 29 and 30, 1915, on charges of negligence and unskillfulness in connection with the stranding of the steamer Bear three-fourths of a mile south of Bear River, Humboldt County, California, on June 14, 1915, we are satisfied that the charges are sustained in that you were negligent in not using a tube at every cast of the lead when on soundings and comparing the nature of the bottom with that shown on the chart to verify your position. Had you done so, you would have been able to ascertain the position of the third officer, who was in charge of the sounding machine.

You were unskillful in not hauling your ship off shore at 8:44 P. M. when you got bottom with 34 fathoms of wire out and having 36 fathoms of water, at which time you should have had 300 fathoms of water had your course and distance been good from Fox Rock. Had you plotted the position of the ship on the chart you should have known that the ship had been set ashore and how much. Had you taken these precautions the steamer Bear would not have stranded.

Third Officer Ture Olund, who remained in Portland, was suspended for one year for the same reasons at the time, and in their official letter to him the inspectors reviewed the case as follows:

"From your own testimony the ship was on soundings from 8:31 P. M. when you had 130 fathoms of wire out and you did not sound various intervals thereafter, until at 9:13 P. M. when you got bottom at 80 fathoms; and from then on casts were taken at 2:22, 2:45, 3:05 and 3:20 fathoms of wire out and no bottom, until at 10:15 P. M. when the last cast was taken, when you had 200 fathoms of wire out and reported no bottom, and before you had the lead hove in the ship grounded. Had you paid more attention to the sounding and looked at every cast you could have
