Specialty of Sweet Peas Made by White Salmon Grower.

About an acre of sweet pea seed of the Spencer variety was planted in rows eight feet wide and from 100 to 200 feet long; white, lavender and crimson colors have been produced with each color in separated beds; any mixture of color is weeded out to keep the strain perfect.

WARNING TO USERS OF HAIR REMOVERS

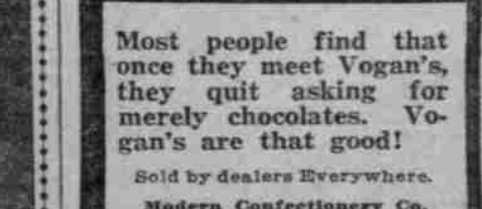

Don't Experiment With So-called Superfluous Hair Removers.

If you use a simple toilet preparation and it proves worthless you only lose money. What you need is a hair remover, a preparation and liquid that removes hair from the surface of the skin. It is a very simple matter, because it will either result in permanent disfigurement or cost you many dollars and take months or possibly years to gain control of hair which has been stimulated by the use of such preparations.

The proper way to remove hair is to de-stimulate it. Only DeMiracle, the original hair remover, can accomplish this result. It does this by absorption, therefore it attacks hair under the skin as well as on the skin.

DeMiracle works equally well for removing hair from face, neck, arms and under arms, or from limbs to prevent them from showing through clothing. Avoid disfigurement, buy DeMiracle by name and you will get the only depilatory that has been endorsed by reputable physicians, surgeons, dermatologists and large users to buy. At all toilet counters direct from the manufacturer.

In 50c, \$1.00 and \$2.00 bottles. The largest sizes are the most economical for dermatologists and large users to buy. At all toilet counters direct from the manufacturer. The truth about the treatment of superfluous hair made plain in plain English on request. DeMiracle Chemical Co., Dept. G, Park Ave. & 129th St., New York.
