Armenians Are Cultured.

Armentans Are Cultured.

Armenians Are Cultured.

Anyone who knows history knows that the Armenians are among the most ancient and cultured and one of the proudest of all the peoples in the history of civilization and Christianity. Armenia is a nation of martyrs. It has seen massacre and cruelties of all sorts. Long ago it was the greatest power among the nations of Asia. It governed itself with success century after century. It was the first rampart of Christianity between Asia and Europe and throughout the ages these people have carried their traditions of people have carried their traditions of faith and patriotism in spite of suffering. Even when some of their noblest work fell before the devastating Turk much of their art flourished.

much of their art flourished.

Many of their people have sought refuge in the United States and these refuge in the United States and these have made good students and industrious workers. But Armenia is now a devastated waste. A large number of the men have been imprisoned and slain, the women have been captured and taken to harems, and the children have been placed in orphanages built by the missionaries, by the English or by others charitably inclined. There is now no provision for the feeding of these little children, starvation is right at the door.

Hospitals Need Supplies. The hospitals have no supplies, no bandages, no medicines. The wounded and sick seek the free clinics, but they cannot be helped.

Professor Hagopain, chairman of the Armenian Patriotic Association, says:
"We Armenians have done nothing less
than carry on a necessarily passive
warfare during 40 years of struggle with Turkish tyranny.
"The enlightened and well-bred peo-ple of America, Asia and Europe pro-
