

# ELECTION DISPUTE INTERESTS PAHO

### Contest Before Legislature Appears More Certain as Official Count Comes In.

## INSTRUCTIONS ARE ISSUED

### Some Increase in Vote is Laid to Natural Gain in Population, to Heated Campaign and to Number of Sworn-In Voters.

BOISE, Idaho, Nov. 18.—(Special.)—While it is not generally believed by party leaders that there was state-wide fraud committed at the general election November 7, the charge is being repeatedly made and a searching investigation has been instituted by the Attorney-General's department. It is believed by many that the entire election is destined to reach the Legislature for settlement.

What gave rise to the charges of violation of the election law and fraud was the surprising increase in the vote at the last election. It was also discovered that thousands of voters were sworn in in all parts of the state on election day.

There was an increase of 47,000 in votes in this state at the last general election over the general election four years ago for President, which is equivalent to an increase in population during the four years of 122,500. The Presidential vote in 1912 was 97,288; in 1916, 1,135,000, and in 1916, 142,000. The increase in the election vote of 1916 over the general election vote in 1912 was only 2000.

### Many Are Sworn In.

The Legislature last year also amended the registration law providing that voters must be registered 30 days before the date of the regular election. As a result many electors failed to register for the last general election. To save their votes they took advantage of the freeholders' oath and went to the polls, where they were sworn in. It is generally conceded that election officers were careless in the way in which they swore in these voters, but that there was a widespread conspiracy to defraud is doubted.

In his instructions to County Attorneys, Attorney-General Peterson asks them to report to him as follows: First—The number of voters in the county register and the number of voters in the provisions of section 4, chapter 52, session laws of 1915.

Second—Whether these persons so registered on election day were authorized to be registered and to vote under the laws of the state.

Population on Increase. The increase in the vote in this state is accounted for many as due first to the unusual situation that arose in the Presidential race and the paramount issue of co-operative stores, and secondly to the natural increase in population of the state during the past four years.

With regard to the first cause, it is cited that in the Presidential election of 1912, 15,000 strong for President Wilson, when this is a state normally Republican by that plurality. Many, especially women, who had never voted before or taken a great interest in the election, did this time.

For the second cause, it is pointed out that because of the lands open to entry in many counties in the state in the past four years there has been a steady increase in population.

The real contest that has arisen in this state over the Governorship is what is holding the attention of the people. Governor Alexander, his supporters and friends, have persistently claimed since the election that he had a safe plurality of 500 or 600 votes. D. W. Davis, Secretary W. C. Gregory, of the Republican State Central Committee, and the committee have conceded the Governor a plurality of more than 200 and they have cut that in two on legislative action. It is now a matter of determination on both sides to carry the fight to a finish, which accounts for the possibility it may go to the courts and Legislature.

### Instructions Cause Dispute.

In the concrete, here is the bone of contention: Under the Idaho election law an elector may vote what is designated as a "straight" ballot by placing a cross in the circle below the name of the party for which he or she desires to vote. The "straight" ballot is to be used to guide the elector as follows: "You can vote a ticket 'straight' by placing an X in large circle below the name of party you wish to vote. You can 'scratch' your ticket by erasing name on straight ticket you do not wish to vote for any party." The instruction sought to make it possible to vote a ticket straight by the use of a cross at the top, but left a double instruction that if there was

## "Next Morning" Headaches

(By DR. L. W. BOWER.)

One of the characteristic headaches due to uric acid in the system, which acts as a poison when it accumulates, is due to alcohol taken the night before. The kidneys do not succeed in throwing off this poisonous accumulation, the stomach is nauseated, or the blood congests in the head, causing throbbing pain, called headaches. The heart is depressed, circulation of blood poor to the extremities, the muscles feel tired, or twinges of pain here and there are felt, and when this uric acid is deposited in the tissues or joints it causes rheumatism or gout. I always advise the drinking of hot water, a half pint in the morning, and a little Anuric. Sometimes the "blues," or a sort of rash, or pimply face, gives warning of a "uric acid storm." At such times always take this Anuric, which can be obtained at almost any drug store, and which you will find dissolves the uric acid almost as hot water does sugar.

Avoid too much meat, tea and alcohol. Drink plenty of pure water, both hot and cold. Take Anuric three times a day until the bad symptoms all subside. This is the best way to avoid rheumatism and many of the pains and aches due to uric acid condition. If you drink any alcoholic beverage you should keep the kidneys and liver active with Anuric, so as to throw off the poisons which accumulate. If your tongue is coated with dark brown taste, breath foul, followed sometimes by colds, indigestion, biliousness, constipation or sour acid stomach, you should take some vegetable laxative. Such a one is made in sugar-coated form from the May apple, leaves of aloë and three other plants. It is a safe and effective laxative, and commonly sold by almost all druggists as Dr. Dierce's Pleasant Pellets. They are standard and have been in ready-to-use form for nearly fifty years.—Adv.

## NEW ROUTE CHOSEN

### Robert Strahorn Makes Decision at Klamath Falls.

### FINE HOMES ARE SPARED

### Oregon, California & Eastern Railway to Enter City on West Side of Link River—General Good Factor in Selection.

KLAMATH FALLS, Or., Nov. 18.—(Special.)—Robert E. Strahorn, president of the Oregon, California & Eastern Railroad Company, today announced for the first time the route of his new line through the city. Mr. Strahorn, after pointing out the three most acceptable of the five different routes surveyed, said that the one up Link River had been decided on.

"This last-named route now seems in most respects the best as it does not in any wise interfere with the many beautiful homes on the east bank of the river," said Mr. Strahorn, "and has no other objectionable points save the crossing of the river twice. I have decided that we will start the line at crossings for the general good, and this route may, therefore, be considered adopted unless some unexpected and quite serious obstacle arises."

"We are therefore making final location, coming in on an absolutely straight line all the way from Glene, 12 miles east of here, crossing the Southern Pacific main line on about what would be third street extended, proceeding westward to a point near the city blocks and city park, over which we enter Klamath avenue, thence for two hundred feet through Klamath avenue to the river.

"After crossing the river the line will follow as near the river bank as possible to Upper Klamath, where it recrosses to the east bank, and proceeds through Shippening to the temporary terminus in the vicinity of the Pelican Bay Lumber Company's plant. This gives us easy grades all the way on a route which is least objectionable from all standpoints to the city generally, and the line thus located will best serve every industry which may ever be established on Lake Ewauna below the city or around the lower end of Upper Klamath Lake above the city."

It has been understood here that much of the opposition to the road resulted from the rumor that it would probably run up the east side of Link River, along which there were many beautiful and expensive residences. The greatest percentage of adverse votes to the bond issue last Tuesday was found to be in the territory along Link River, in which were located these beautiful homes. However, it is thought that the announcement that the road will proceed up the west bank of the river will relieve the fears of resultant harm and win many more supporters for the line.

"It seems to me that with the proper push and pull along here, Klamath Falls people should be driving the golden spike of a completed line as far as Dairy by next Fourth of July," said Mr. Strahorn, "at least as far as Sprague River by this time next Fall."

Incubator Used by Miller in Bread Tests.

Pomeroy Man Does Daily Baking to Prove Product.

Government Issues Bulletin Complied With Aid of Oregon Agricultural College Following Survey in Nation.

OREGON AGRICULTURAL COLLEGE, Corvallis, Nov. 18.—(Special.)—Raising his sponge in an incubator and using an electric bake oven, H. H. Kribs, manager of the Port of Flour Mills, tests the quality of the flour produced at the mill every 24 hours by baking three loaves of bread daily.

When Mr. Kribs installed his laboratory for experimenting a year ago he had in mind to produce a loaf of bread to fit his needs in bread-making. Mr. Kribs gets best results by raising his sponge at a steady temperature and for this reason the incubator is equipped with a thermostat, which keeps the temperature at approximately 86 degrees. The exact recipe is followed every day, the ingredients used are accurately measured and each process in the bread-making is completed as regular as clockwork. Considerable experimenting has been done by Mr. Kribs to get the best results.

Three-fourths of a cake of yeast is dissolved in 1 1/2 pints of water, then mixed with flour until stiff. This is placed in the incubator. After raising overnight, half a pint of water, a small tablespoonful of lard, three teaspoonfuls of salt and two of sugar are added and mixed with the dough. It is then set to rise for an hour and a half before it is punched down and mixed. Before going to the electric oven, where it bakes exactly one hour and five minutes, it is allowed to rise another hour.

Fish Quarantine Proposed.

SACRAMENTO, Cal., Nov. 18.—A law that will enable the California Fish and Game Commission to quarantine fish from fungus-infested waters, in the east and other sections, will be introduced in the next Legislature, according to an announcement made by the Commission today.

PORTLAND MEN ON CREW

TWO SURE OF PLACES AT WASHINGTON AND THIRD LIKELY.

Seattle Varsity Eight to Gain Several Members When Football Season Ends.

UNIVERSITY OF WASHINGTON, Seattle, Nov. 18.—(Special.)—When the football men put their suits on the shelf for another year the Washington varsity eight, now going through its daily workouts on Lake Washington, will be reinforced by the addition of several veterans.

The freshmen crew, spurred on by its hopes for a triangular race with the crews of the Universities of California and Stanford, has been turning out all Fall under the coaching of several varsity eight men and Captain Tom Cushman.

Crew Coach Conliver has returned from the East, and each night his official launch "Target" is following in the wake of the freshmen crew, giving with the silver-haired coach giving the first-year men their instructions through a megaphone.

About 20 freshmen have been picked by the coach as first boat material, and have survived the weeding-out process.

Compare this year will have on his varsity eight Sam Briggs, of Portland, who is now playing substitute fullback for the "Shorty" Hart six-foot-three veteran, also of Portland, who will pull No. 5. The third likely representative of the crew from Portland will be Charley Fleischer, with all but made the first crew last year, and seems assured of a seat in the boat this year.

GURN SHOW IS PLANNED

SOUTHERN OREGON AFFAIR WILL BE HELD AT GRANTS PASS.

Banks, Railway Company and Business Houses Offer Prizes and Back Up Proposal.

GRANTS PASS, Or., Nov. 18.—(Special.)—Plans for the holding of the first Southern Oregon corn show in Grants Pass are now under way. It is proposed to hold the show during the early part of November, 1917, and farmers in all parts of Southern Oregon will be invited to compete for the valuable prizes and trophies that will be offered.

The meeting for the organization of the new enterprise was held at the Commercial Club, and a directing committee headed by R. B. Miller, vice-president of the California & Oregon Coast Railway Company, was named. Other members of the committee are Clarence Winetrot, Dr. Bywater, Sam Baker and Wilford Allen. A number of prizes already have been guaranteed by the banks, the railroad company and business houses, and the farmers are taking much interest in the proposed show. "Farmer" Smith, of the O.-W. R. & N. Co., who was here recently and addressed the people upon the subject of corn growing, created much enthusiasm upon the subject. Many silos have been built during the past year, and corn will be the crop that the best growers will use in rotation with beets.

## NEW ROUTE CHOSEN

### Robert Strahorn Makes Decision at Klamath Falls.

### FINE HOMES ARE SPARED

### Oregon, California & Eastern Railway to Enter City on West Side of Link River—General Good Factor in Selection.

KLAMATH FALLS, Or., Nov. 18.—(Special.)—Robert E. Strahorn, president of the Oregon, California & Eastern Railroad Company, today announced for the first time the route of his new line through the city. Mr. Strahorn, after pointing out the three most acceptable of the five different routes surveyed, said that the one up Link River had been decided on.

"This last-named route now seems in most respects the best as it does not in any wise interfere with the many beautiful homes on the east bank of the river," said Mr. Strahorn, "and has no other objectionable points save the crossing of the river twice. I have decided that we will start the line at crossings for the general good, and this route may, therefore, be considered adopted unless some unexpected and quite serious obstacle arises."

"We are therefore making final location, coming in on an absolutely straight line all the way from Glene, 12 miles east of here, crossing the Southern Pacific main line on about what would be third street extended, proceeding westward to a point near the city blocks and city park, over which we enter Klamath avenue, thence for two hundred feet through Klamath avenue to the river.

"After crossing the river the line will follow as near the river bank as possible to Upper Klamath, where it recrosses to the east bank, and proceeds through Shippening to the temporary terminus in the vicinity of the Pelican Bay Lumber Company's plant. This gives us easy grades all the way on a route which is least objectionable from all standpoints to the city generally, and the line thus located will best serve every industry which may ever be established on Lake Ewauna below the city or around the lower end of Upper Klamath Lake above the city."

It has been understood here that much of the opposition to the road resulted from the rumor that it would probably run up the east side of Link River, along which there were many beautiful and expensive residences. # A Good Looking Suit for Business--Isn't It?

This is one of the many models we are showing in

## HART SCHAFFNER & MARX

Suits. You'll find every feature in these clothes that a custom tailor will give you and yet you'll avoid all the waits and try-ons. First, you'll get the all wool or wool and silk material. Second, the hand tailoring. Third, the perfect fit. Fourth, the individual style you prefer.

You can come in to our store and pick out your model and fabric and inside of a very short time you can walk out with a perfect fitting Suit on.

The Prices for this Class of Clothes are very moderate

### \$20 to \$40

## Sam'l Rosenblatt & Co.

Portland's Largest Exclusive Men's Store Southeast Corner 5th and Alder

Copyright Hart Schaffner & Marx

## STORES ARE VIEWED

### Failure was found to be caused by the lack of the above essentials. Even though an attempt was made to restrict the attendance by the application of the three-year rule, by which students must get three years' preparatory work before entering. Through the constant addition of new students to the rolls, the chapel seating has been rendered difficult.

Mr. Hughes Still Awaiting Court.

NEW YORK, Nov. 18.—Charles E. Hughes and Mrs. Hughes left here today for Lake Wood, N. J., where they expect to remain for a fortnight to await the outcome of the official count of the vote in California.

## CAUSE OF EACH PUBLISHED

Government Issues Bulletin Complied With Aid of Oregon Agricultural College Following Survey in Nation.

OREGON AGRICULTURAL COLLEGE, Corvallis, Nov. 18.—(Special.)—The success of co-operative stores in Great Britain, Denmark, Switzerland and other European countries and the resulting stimulus given to similar organizations in the United States has led to a great number of appeals for information concerning the feasibility of such stores as a remedy for the great expense of distribution and the resulting high cost of living. With a view to obtaining some definite information on the subject, the Office of Markets and Rural Organization of the United States Department of Agriculture, in co-operation with the Oregon Agricultural College, conducted a survey of typical co-operative stores in all parts of the United States. The results are published by the Government in a bulletin just issued entitled "A Survey of Typical Co-operative Stores in the United States."

The authors of the bulletin are: J. A. Bexell, dean of the department of commerce of the Oregon Agricultural College; Dr. Hector McPherson, head of the college bureau of organization and markets, and W. H. Kerr, of the United States Department of Agriculture, Office of Markets and Rural Organization.

The figures collected lead to the conclusion that the majority of the stores are unsuccessful in achieving their main object—savings on purchases to members and a reduction of the high cost of living. However, in most instances the co-operative stores led to the improvement of business methods in the towns where they were established.

The success of the co-operative store was found to rest on strong leadership, capable management, favorable environment and adequate legal safeguards.

## INCUBATOR USED BY MILLER IN BREAD TESTS.

POMEROY MAN DOES DAILY BAKING TO PROVE PRODUCT.

GOVERNMENT ISSUES BULLETIN COMPLIED WITH AID OF OREGON AGRICULTURAL COLLEGE FOLLOWING SURVEY IN NATION.

OREGON AGRICULTURAL COLLEGE, Corvallis, Nov. 18.—(Special.)—Raising his sponge in an incubator and using an electric bake oven, H. H. Kribs, manager of the Port of Flour Mills, tests the quality of the flour produced at the mill every 24 hours by baking three loaves of bread daily.

When Mr. Kribs installed his laboratory for experimenting a year ago he had in mind to produce a loaf of bread to fit his needs in bread-making. ## THE Ringing Praise

accorded the instruments of Baldwin manufacture proclaim their superiority. There is absolutely nothing better, nothing more perfect, on the market, neither as a piano nor as a player piano.

EAST SIDE LOCATION With necessarily low expenses. Just across the Hawthorne bridge from the down-town—out of the extreme high-expense territory.

HIGH QUALITY PIANOS The Matchless Baldwin uprights, grands and player pianos—Quality Supreme.

MAKE IT POSSIBLE for the Portland Piano Tuning, Repairing and Mfg. Co. comprising the Baldwin Piano Men of Portland, to offer "Better Quality Pianos for Less Money."

Consider these facts, examine the instruments, note the prices and save money by purchasing of the only East Side piano house in Portland.

HOWARD PIANOS The quality others sell at \$300.00 Our Price Only \$255

MONARCH PIANOS The quality others sell at \$275.00 Our Price Only \$235

HAMILTON PIANOS The quality others sell at \$400.00 Our Price Only \$335

ELLINGTON PIANOS The quality others sell at \$450.00 Our Price Only \$385

BALDWIN PIANOS The quality others sell at \$525.00 Our Price Only \$495

HAMILTON GRAND PIANOS Others sell this quality at \$650.00 Our Price Only \$595

ELLINGTON GRAND PIANOS Others sell this quality at \$700.00 Our Price Only \$600

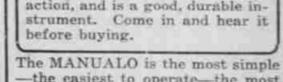

BALDWIN GRAND PIANOS Sold by others at \$800 to \$1000 Our Price Only \$745

Sold by others at \$1000 to \$1200 Our Price Only \$950

All these Pianos are manufactured entirely by the Baldwin Co. in their own factories and are guaranteed fully by them.

## The BALDWIN-MODELLO PLAYER PIANO

Sold by Others at \$550.

OUR PRICE \$435

This is the greatest player-piano value of today. The Modello has the wonderful Manualo player action, and is a good, durable instrument. Come in and hear it before buying.

The MANUALO is the most simple—the easiest to operate—the most responsive player action manufactured today. It is built complete by the Baldwin Co. and is found only in Baldwin-made pianos. Don't fail to investigate the Manualo, the player-piano that is all but human.

It enables you to play the music of your choice with the same human, individual interpretation that you would give it if playing by hand. Your prejudices against "mechanical music" are overcome when you play and hear a Manualo.

THE HOWARD MANUALO Sold by others for \$850. Our Price Only \$515

THE ELLINGTON MANUALO Sold by others for \$800. Our Price Only \$650

THE BALDWIN MANUALO Sold by others for \$1050. Our Price Only \$975

We'll Arrange Satisfactory Terms. Your visit to our music-room invited. You are welcome whether you wish to buy or not. "It Is Safe to Buy at Baldwin's."

Don't forget to try for the \$25 cash prize to be given to the winner in our Slogan Contest. We want a slogan featuring our East Side Location, our Low Expenses, our Low Prices, our High Quality. Write or phone for particulars. Work out your slogan. You may win the \$25. Contest closes Saturday, 9 P. M., December 2.

Portland Piano Tuning Repairing & Mfg. Co. Exclusive Factory Representatives in Portland for All Baldwin-Made Instruments. 244-46-48 Hawthorne Ave. (Just at East End of Hawthorne Bridge.)
