

NATIONAL GIRL SCOUT MOVEMENT TAKEN UP ACTIVELY BY YOUNG WOMEN OF PORTLAND

Sixteen Girls Are Enrolled in First Troop, and Meetings Are Held Every Other Thursday, When Instruction in Red Cross Work and Other Duties Is Given.

First Row, Left to Right—Estella Martin, Ruby Testerman, Sadie Pratt, Leota Link, Harriett Loy, Gertrude Dyke. Graduate Nurses; Marion Watson and Jessie Duke. Second Row, Left to Right—Lillian Randolph, Frances Ridner, Fern Stansberry, Mrs. H. M. Madden, Lillie Erickson, Caroline Starker and Ethel Olson.

An organization known as the Girl Scouts, that promises to accomplish for the girls of the Nation what the Boy Scout movement has already done for the boys, is now being built in various parts of the United States, the first Portland troop having been mustered into service last October under the direction of Mrs. H. M. Madden.

The qualifications outlined for membership in the Girl Scouts are similar in their purpose to those of the Boy Scouts, although entirely different in their adaptation for the girl. For tenderfoot standing members of the organization must pass certain tests and be proficient in certain duties.

derfoot scout to know what to do in case of a fire and in case of various other emergencies. The second-class scout must know how to make a shirtwaist or skirt, to walk a certain distance by the scout's pace, to dress and wash a child of two years or under. She must also be proficient in the first three chapters of the Woman's Handbook (abridged edition) of the American Red Cross Society.

As examples of what scouts in this class are required to know and do, the regulations prescribe that applicants must be able to recount the history of the American flag, to cook one simple dish, to lay a fire in a stove, to make a bed, to name the points of the compass. It is also necessary for a ten-

derfoot scout to know what to do in case of a fire and in case of various other emergencies. The second-class scout must know how to make a shirtwaist or skirt, to walk a certain distance by the scout's pace, to dress and wash a child of two years or under. She must also be proficient in the first three chapters of the Woman's Handbook (abridged edition) of the American Red Cross Society.

Outdoor hikes are one of the activities in which the members of the Portland troop have received training. Of the 16 members enrolled, all have passed the requirements for the tenderfoot class and are working for admission to the second class. The plan of their leader, Mrs. Madden, is to equip them to care for themselves and possibly for others in case of emergency, besides to furnish them with wholesome outdoor recreation, signaling by the Morse code also is a part of the instruction given the scouts.

WONDERFUL CANAL PAINTINGS ON EXHIBITION AT ART MUSEUM

Portlanders Have Rare Opportunity to See Famous Panama Series by Jonas Lie—Men Interested in Great Engineering Feat Should See Them.

BY EDITH KNIGHT HOLMES. A wonderful opportunity is extended to Portlanders in the exhibition of the paintings of Jonas Lie at the Art Museum, Fifth and Taylor streets. The pictures will be in the gallery until March 26, when they will be taken to the Palace of Fine Arts, San Francisco. A special showing of the paintings has been arranged for next Wednesday night, when Miss Anna B. Crocker, curator, and others will be present to answer questions and welcome the public.

Jonas Lie was born in Moss, Norway. His father was a civil engineer. His mother is an American. Many of his relatives are composers, writers and pianists. Through his mother and the balancing power of practicability were wrought into the foundation of the young man's character. He was a genius to start with, had excellent training and a well-balanced brain and he has become one of the greatest of modern painters.

Famous Panama Series Shown. In the collection at the museum are many of the Panama Canal series that made the whole artistic world wonder. These paintings contain such strength, such power, and vigor that they appeal to men who never before had been interested in paintings, and they appeal equally to the art critic.

RIDGEFIELD, Wash., March 17.—(Special.)—The girls of the Ridgefield High School were entertained with St. Patrick's day party Thursday night at the home of Mrs. Jesse J. Jacobs, head of the English and history departments at the high school.

Engineering Feats Depicted. Vivid in coloring, teeming with life and action is a large picture, known as "The Gates of Pedro Miguel," another of the gems of the Panama collection. "Local Color, Gatun Lake," and "Cucharachá Slide" and "Crane and Millflores" are among the strong paintings. Every man interested in the monster feat of engineering should see these paintings. They were shown at the exposition and have received the highest praise from critics in New York. They bring to us the realism of the canal and its making as nothing else could do.

Mr. Robins as a boy worked in the Southern coal mines and accumulated enough money to study law. He was admitted to the California bar, and soon built up a large law practice and was contemplating selling out to one of the big political rings when the Klondike boom came.

Bathing Scene Portrayed. There is a bathing pool with young nude figures taking an afternoon dip. Youth and happiness are well portrayed. "The End of the Day" is a clever picture, full of intense feeling, the kind of picture one would want to own and live with. "The Woolworth building in New York is suggested and there are some wind-blown trees in the foreground. The lights of the city are just beginning to gleam. "Honeycombs of Light" is an inspiring metropolitan picture.

When Jule M. Hannaford, president of the Northern Pacific, was in Portland last week with his family they found delightful diversion by touring over the famous Columbia River highway. Mr. Hannaford had taken the trip before, but it was now to Mrs. Hannaford and to others in the party.

RAYMOND ROBINS DUE

REED COLLEGE STUDENTS TO HEAR SOCIAL SERVICE TALKS.

Addresses to Assembly, Faculty, Men and Women Students Will Be Given Tomorrow and Tuesday.

Raymond Robins, whom Theodore Roosevelt called "one of the most potent forces for good citizenship in this country," will visit Portland tomorrow and Tuesday and make a series of addresses before the students of Reed College on social service and citizenship.

NORTHERN PACIFIC PRESIDENT AND PARTY PHOTOGRAPHED ON TRIP OVER COLUMBIA RIVER HIGHWAY.

LEFT TO RIGHT—A. D. CHARLTON, MRS. K. D. HAUSER, F. S. WICK, MRS. J. M. HANNAFORD, JR., AND SON, J. M. HANNAFORD; MRS. J. M. HANNAFORD, KENNETH D. HAUSER, MRS. A. D. CHARLTON AND E. V. HAUSER.

Physicians Explain Why Women Need More Iron in Their Blood Today Than 20 Years Ago

Say Anaemia—Lack of Iron Is Greatest Curse to the Health, Strength, Vitality and Beauty of the Modern American Woman.

Dr. Howard James, late of the United States Public Health Service, says physicians should prescribe more organic iron—Nuxated Iron—to correct the great drain nature has placed upon women at certain periods and to supply the iron deficiency resulting from a demineralized diet now being served in thousands of homes. Opinions of Dr. Ferdinand King, New York Physician and Medical Author, and other physicians who have thoroughly tested the value of Nuxated Iron.

THE CHILD'S APPEAL—WHAT IS YOUR ANSWER?

Mother, why don't you take NUXATED IRON and be strong and well and have nice rosy cheeks instead of being so nervous and irritable all the time and looking so haggard and old? The doctor gave some to Susie Smith's mother and she was worse off than you are and now, she looks years younger and feels just fine.

You can tell the women with plenty of iron in their blood—beautiful healthy rosy cheeked women full of Life, Vim and Vitality—while those who lack iron are often cross, nervous, irritable, weak, tired, complaining creatures whom nobody wants to have around.

Any woman who tires easily, is nervous or irritable, or looks pale, haggard and worn should at once have her blood examined for iron deficiency. Administration of simple Nuxated Iron will often increase the strength and endurance of weak, nervous, careworn women 100 per cent in two weeks' time.

"There can be no strong, healthy, beautiful, rosy-cheeked woman without iron," says Dr. Ferdinand King, New York physician and medical author. "In my recent talks to physicians on the grave and serious consequences of iron deficiency in the blood of American women, I have strongly emphasized the fact that doctors should prescribe more organic iron—Nuxated Iron—for their nervous, run-down, weak, haggard-looking women patients. Pallor means anaemia—the skin of an anaemic woman is pale, the flesh flabby. The muscles lack tone, the brain fags, and the memory fails, and often they become weak, nervous, irritable, dependent and melancholy. When the iron goes from the blood of women the roses go from their cheeks.

On account of the peculiar nature of woman, and the great drain placed upon her system at certain periods, she requires iron much more than men to help make up for the loss.

At 46 he was careworn and nearly all in now at 50 after taking nuxated iron, a miracle of vitality and his face beaming with the buoyancy of youth." Dr. Alphonsus Wallace, a physician of many years' experience in this country and who has been given many honorary titles in Medicine, says "I do not make a practice of recommending advertised medicinal products, but I have found Nuxated Iron so potent in nervous, run-down conditions, that I believe all should know of it. The men and women of today need more iron in their blood than was the case twenty or thirty years ago. This because of the demineralized diet which now is served daily in thousands of homes and also because of the demand for greater resistance necessary to offset the greater number of health hazards to be met at every turn."

"In the most common foods of America, the starches, sugars, table syrups, candies, polished rice, white bread, soda crackers, biscuits, macaroni, spaghetti, lapicini, sausage, degenerated cornmeal, no longer is iron found in the food. The processes have removed the iron of Mother Earth from these impoverished foods, and by throwing down the waste pipe the water in which our vegetables are cooked, the iron is lost. Therefore, if you wish to preserve your youthful vim and vigor to a ripe old age you must supply the iron deficiency in your food by using more organic iron. Iron is not enough salt when your food has not enough salt."

Dr. Howard James, late of the United States Public Health Service, says: "In my opinion, organic iron is beyond question the greatest of all strength builders. If people would only take Nuxated Iron when they feel weak or run-down, instead of forcing themselves with habit-forming drugs, stimulants and alcoholic beverages, I am convinced that in this way they could ward off disease in thousands of cases and thereby save the lives of thousands might be saved who now die every year from pneumonia, grippe, consumption, kidney, liver, heart trouble and other dangerous maladies. The real, true cause which started their diseases was nothing more nor less than lack of iron in the blood. Iron is absolutely necessary to enable your blood to change food into living tissue. Without it, no matter how much or what you eat, your food merely passes through you without doing you any good. You don't get

NOTE—Nuxated Iron, which is prescribed and recommended above by physicians in such a great variety of cases, is not a patent medicine nor secret remedy, but one which is well known to druggists and whose constituents are widely prescribed by eminent physicians both in Europe and America. Unlike the older inorganic iron products, it is easily assimilated, does not injure the teeth, make them black, nor upset the stomach; on the contrary, it is most potent remedy in nearly all forms of indigestion as well as for nervous run-down conditions. The manufacturers have such great confidence in nuxated iron, that they offer it for \$100.00 to any charitable institution if they cannot take any man or woman under 60 who lacks iron, and increase their strength 200 per cent, or over in four weeks' time, provided they have no serious organic disease. They also offer to refund your money if it does not at least double your strength and endurance in ten days. It is dispensed in this city by The Owl Drug Company and all good druggists.

the student assembly at 11 o'clock tomorrow morning. At 1:15 P. M. he will hold a conference with the faculty and at 4:00 P. M. will address the men students.

DESOLATE SAGEBRUSH DISTRICT OF DECADE AGO IS RICH NOW

Stanfield Is One of Thriving Towns in Productive Irrigated Country of Diversified Farming.

BY LLOYD RICHES. STANFIELD, Or., March 17.—(Special.)—Ten years ago today one could travel from Echo to the Columbia River through the west end of Umatilla County without encountering a fence and without seeing a tree other than a few locust or cottonwoods around a few water holes.

Artisans will hold a "bargain dance" and a stepping party at the Modern Woodmen Hall at Eleventh and Burnside streets tomorrow night. On the committee in charge are: Edgar Kuchler, Bud Peterson, Gerald Tweedy, Bert Wilson, Ruth Weil, Hazel Schultz, Myrtle Benbo and Bernice Boyle.

FUEL SHORTAGE ACUTE

Spokane Dealers Divide What Little Coal There Is in City.

SPOKANE, March 17.—The fuel shortage, which has caused Spokane dealers anxiety all Winter, became more serious today when several of the larger yards exhausted their supplies of coal. Yards that had a surplus shared it with those that had none, and the want of customers were relieved temporarily.

PIONEER Oregon Resident Dies. SILVERTON, Or., March 17.—(Special.)—Mrs. Elizabeth Harding, a pioneer of Oregon and resident of Silverton for more than 50 years, died at the home of her daughter, Mrs. J. T. Bowen, Thursday evening, aged 83.

DRINK AND DRUG HABITS QUICKLY CURED NEAL SANITARIUM

For the care of those addicted to the use of liquor or drugs, and the nervous conditions following their prolonged or excessive use.

The Sanitarium provides its patients with all the comforts of a refined home. Perfect privacy is assured in all cases.

Sanitarium open day and night. Write, phone or call for full information. Patients called for if desired. Quick time—Sure results.

894 12th St., Portland, 2000. Phone Marshall 1400. 60 Institutes in Principal Cities.

Residents Do Not Realize Growth. To those of us who have lived here these ten years it does not seem that we have grown much," said James M. Kyle, pioneer farmer of the Finnish project. "But when a period of time is taken and comparisons are made we find we have really accomplished a good deal in a comparatively short time."

Contrast Is Presented. In 1908 the election was held, and what are now the Columbia, two Hermiston, two Stanfield, and two Echo precincts were all combined into one precinct and there were about 480 votes cast, including all the Government employes working on the construction of the Cold Springs reservoir and feed canal.

On the other hand, today's conditions present quite a contrast. Echo has grown a great deal, Hermiston has expanded and Stanfield has grown from nothing to the thriving little place it is today. Today Stanfield has five concrete store and office blocks, seven wooden store buildings, which house general merchandise stores, cigar and confectionery stores, a drug store, hardware and implement store, butcher shop, bank, newspaper press, etc. Besides this, there are two lumber and fuel yards, handling implements, etc.; two churches, a blacksmith shop, place for storing grain warehouse, oil distributing plant, largest stockyards between Pendleton and The Dalles, hotel and livery stable.
