A Watch Sale. Ladies' and Men's Watches of most every recognized make are represented in this Clean-up of Odds and Ends that have accumulated for some time past. For those who crave the rich, fat fish which carried itself in the flesh, the salmon was the favorite, while others, preferring a fish less rich and easier of digestion, chose halibut, a dry-meated fish which stores most of its fat in the liver. Clean Fish Carefully. After the fish have been thoroughly washed, trim off the fins on the sides, cut off the heads and tails. With a knife open them down and remove the pieces of roe from both sides—you can see to have the roe fine when you buy them—place the roe in boiling water, salted, and a few drops of vinegar added, and parboil them for 10 minutes. Let get cold before handling. Clean Fish Carefully. After the fish have been thoroughly washed, trim off the fins on the sides, cut off the heads and tails. With a knife open them down and remove the pieces of roe from both sides—you can see to have the roe fine when you buy them—place the roe in boiling water, salted, and a few drops of vinegar added, and parboil them for 10 minutes. Let get cold before handling.

SOLE IS DECLARED EQUAL TO HALIBUT IN VALUE AS FOOD. Smaller Fish at About One-Third Price of Larger Member of Family Can Be Prepared into Appetizing Dish.

By Mrs. J. D. Spencer. Oregon salmon and halibut have always been so plentiful and cheap that they heretofore have been the only fish in any particular demand by the consumer. For those who crave the rich, fat fish which carried itself in the flesh, the salmon was the favorite, while others, preferring a fish less rich and easier of digestion, chose halibut, a dry-meated fish which stores most of its fat in the liver. The codfish, with its cod liver oil, is the best example of the dry-meated white fish whose liver yields oil of great therapeutic value. Since the war began the price of salmon and halibut has been steadily advancing until now they are almost unobtainable, especially for the halibut, which was always to be had in abundance the year around for from 8 to 12c per pound, while now it commands from 25 to 30 cents and many people still continue to buy it, without stopping to find out if it is worth in food value the doubled and tripled price paid today.

Halibut is the largest member of the fat fish family, while the little sand-dab is the smallest. Between us get the turbot, sole (English and California) and the flounders. The smooth flounder, the rough or winter flounder, summer flounder or plaice. The meat of the fish is very white, close-grained and sweet and has about the same value as food. This is the season now for the sand-dab, sole and flounder, and the markets are filled with these small fish at cheap prices ranging from sole at 2 cents to sand-dab at 33 cents.

Halibut Means "Holy Flounder." Halibut—look at the word—half is the old English for holy, plus but or butte, meaning flounder. Holy flounder, so named because eaten on holy or holidays. A sort of king among fish reserved for holidays, as the goose and turkey are in the poultry world. As those few of his year have become so high priced as to be used only for the holiday season and in between we are content if we can get a chicken or any kind of a small bird, so now when the holiday member of the fat fish family, halibut, threatens to exterminate itself from our tables in high prices, let us turn our attention eagerly to the small members of the same family to the sand-dab, sole and flounder—and see what we can do with them.

The California sole, a fair, smooth-looking fish weighing from one-third of a pound to one pound, can be had for 4 cents a pound, and as this is nearly spawning season many of them contain large pieces of roe. The shad roe is darker colored and not so delicate in flavor as the creamy-colored sole roe and the former is sufficiently esteemed to be worth from 45 to 50 cents per pound early in the season. Many women, through not understanding its usefulness, have discarded the roe in cleaning the fish, but in these days of conservation a little education is helpful into the nutrition contained in these miniature eggs, to say nothing

EUGENE CHAMBER OF COMMERCE ELECTS NEW PRESIDENT. E. O. Immel, of Eugene, Or., Feb. 2 (Special)—Attorney E. O. Immel was unanimously elected president of the Eugene Chamber of Commerce to succeed Frank Jenkins. He has been a resident of Eugene five years, and since coming to this city has taken a prominent part in many public movements. He is a law partner of Judge L. H. Potter. Mr. Immel is present visiting in Michigan, where he graduated from the state university.
