Henri Bendel Has Sent Us More Hats With a French Accent

—Is it any wonder that our Millinery Salons have become the meeting place of all the best dressed Portland women? Where else could you find such delightfully distinctive and original hats? While these newest hats are French in design, they plainly show an Oriental influence, for everywhere those rakish Turkish turbans are seen, with different straws and touches of trimming, trying to conceal the fact that they were originally designed for some far-off Oriental.

—The hat sketched is of fine shiny black straw, with an upper facing of satin. Like many of the large hats, it flares up sharply away from the hair in back, but droops to shade the eyes. The only trimming is a bit of burnt ostrich.

—Large, simple sailors, with simple tailored trimming, the tightest little cap-like turbans, hats with a clever criss-crossing of quills, gull wings, and cleverly placed, flat ribbon rosettes and buckles all go to emphasize the great variety of styles here for your choosing.

—BESIDES BENDEL, THERE ARE NEW HATS FROM HYLAND, UFLAND, RAWAK, BURGESSER, WAUSCHAUER and VOGEL.
