Rich winter foods and frequent colds have left the system full of catarrh, the membranes engorged with \* stagnant blood, and the body struggling under its load of waste. ## HOW TO PREVENT **APPENDICITIS**

Appendicitis is primarily due to the polsons formed by decaying food in the bowels. It is a cliesaes caused by improper and insufficient bowel climination. Many people have only a small passage in the center of the bowels while the sides aretelegged with old, stale, fermenting matter,

HOW TO AVOID TROUBLE.

The way to avoid sickness and to keep

to keep the bowels clean than it is to keep
