Instruction Will Begin June 24 and Continue Until September 6. Shortage in This Field Is Estimated at About 2000.

In response to the urgent call of the Government Reed College, for the first time, will conduct a Summer school of physical education. This school will cover not only the usual session of six weeks, but a second session. Classes will extend from June 24 to September 6. The main purpose will be to train teachers of physical education to meet the wartime emergency. It is estimated that the shortage in September

timated that the shortage in September of trained men and women in this field will be more than 2006.

The Secretary of War has just urged upon all the schools and colleges of the country to abandon the traditional policy of concentrated efforts on a few students of extraordinary ability for the sake of winning games, and to adopt a policy of athletics for all.

The Secretary of War has just urged upon all the schools and colleges of the country to abandon the traditional policy of concentrated efforts on a few students of extraordinary ability for the sake of winning games, and to adopt a policy of athletics for all.

Pelley Net Changed.

As this has been the definite and settled policy of Reed College since its foundation, no change of policy is necessary for the Reed College Summer school of physical education. On this subject President Foster has this to say, in the Annual volume of the

this subject President Foster has this to say, in the Annual volume of the papers of the National Education Association, which has just been received from Washington:

"By the customary policy of vicarious athletites no college can fully meet its obligations as an agency for National defense. The experiences of the past filtree months in raising an Army have driven home this truth as never before. The first call of the Government was for thousands of college students and recent graduates to enter at once the training camps for officers. dents and recent graduates to enter at once the training camps for officers. The immediate need was for men with minds and bodies disciplined by per-sistent physical training under trained leaders and by regular participation in rigorous athletic games. There were not enough available intercollegiate athletes to meet 20 per cent of the

athletes to meet 20 per cent of the need.

"Thousands of the college seniors and recent graduates were unable to pass the physical examinations. The universities and colleges had not adequately provided for this part of their preparation. A majority of these men had been without incentives and equipment for regular athletic training. Statistics furnished the National Collegiate Athletite Association by 143 Statistics furnished the National Collegiate Athletite Association by 143 universities and colleges engaged in intercollegiate athletics show that only about 17 per cent of the total male students participated in the gamea, and that not half the students in these institutions engage in any form of systematic or organized exercise. Of these institutions, all of which promote intercollegiate athletics, 37 per cent are reported as 'doing nothing to foster and encourage the types of physical exercise and healthful recreation that a student is likely to use in after-college life.' likely to use in after-college life.'

Team Training Overemphasized. "These colleges spend about 60 times as much money for each member of an intercollegiate team as they spend for the games of each of the other students. Thus our universities, taken as a whole, have falled to conduct their athletites in such a way as to achieve all that the Nation has a right to expect of them as agencies for National defense."

Green corn is here! It was raised in California, is of the Merritt variety—a standard, and one dollar a dozen is asked for it.

Tomatoes are becoming plentiful. Oregon hothouse, the Heybourne, of-

Cauliflower, 15 cents each; cabbage, two heads, 15 cents; spinnach, 5 cents a pound.

Last season's potatoes, Burbank, can had at 18 pounds for a quarter, \$1.50 a suck.
Artichokes, 5 cents each, two for 15,
three for 25 cents.

## FRANCE HAS WET SEASON

TACOMA, Wash., June 6.—(Special.)
—Captain Thomas B. Currsn, a former
Tacoma physician, well known in Portiand, is now stationed at a hospital in
France that has 14,000 beds. He is located at a place four and a half miles from where Oregon and Washington soldiers, formerly in the National Guard, are quartered.

Captain Curran, writing to Ralph Stacy, president of the National Bank of Tacoma, says that California soldiers who complain of the rain at Camp Lewis are merely receiving preliminary.

Lewis are merely receiving preliminary training, for when they reach France they will find that the rainy season there has the Puget Sound country looking like Sahara Desert.

Drain Millmen Buy New Plant.

BY DR. PAINLESS PARKER.

You have heard-you couldn't be in the same township and miss him-the jazz "artist." He maltreats a pair of cymbals, a bass drum, a tango banjo and a mouth organ all at the same time.

But you wouldn't want to make a steady musical diet of this sort of hash, would you?

When you desire music you attend concerts where artists that do but one thing appear.

A lifetime of work, plus genius, gives us Paderewski.

Caruso stirs the hearts of tens of thousands, because he has spent a world of time and thought and energy on his work.

It is a rare musical genius that can master one branch of music; there never was one that was a master of two.

But in dentistry we find jazz dentists who try to do everything, and who, in the nature of things, can do nothing well.

There are six branches of dentistry. No man can maintain the high skill he should without spe-

Myself and my associates do the work that we are adept in.

There is no place in the Painless Parker organization for the jazz handy man.

Expert service, the best of materials, a volume of work—that makes reasonable prices profitable.

These are the cornerstones on which has been built the largest dental practice in the world.

Last year the teeth of more than 100,000 patrons were repaired by the Painless Parker system. This was the greatest tribute, after 26 years of conscientious work, ever paid to business efficiency in

Nineteen Painless Parker offices in the United States.
