

NEW BOOM RULES ISSUED BY STATE

Procedure to Be Followed by Applicants for Franchise Is Outlined.

SOME CHANGES ARE MADE

Companies Must File Data Showing Financial Status and Plans for Improving and Using Streams for Logging.

SALEM, Or., July 20.—(Special).—A new set of rules has been issued by the Public Service Commission to govern procedure under the boom act of the 1917 Legislature. These rules supersede the rules issued last year only so far as there is conflict.

The new rules are as follows:
Rule 1. Applicants for franchise must conform to the following requirements: (a) Original application and two copies thereof must be filed with the commission. Attached to the original application and to the copies must be a map, showing: (1) The streams or portions of streams on which a franchise is asked; (2) the location of existing booms, dams or other improvements, if any; (3) the location of any and all contemplated improvements; (4) the particular portions of the stream or parts of a stream sought to be improved.

Rule 2. At the time of filing the application there shall also be filed with the commission a certified copy of the articles of incorporation of the applicant.

Must Tell Financial Status.
Rule 3. The application shall set forth substantially the following matters: (a) The approximate assets of the applicant company over and above all debts and liabilities; (b) The approximate amount of timber or timber products which would be benefited by the granting of the franchise; (c) A definite description of the streams or portions of streams on which a franchise is asked; (d) The streams or portions of streams navigable for commercial purposes; and the streams or portions of streams which are in their natural condition navigable for floating logs or other timber products; and the streams or portions of streams which are not in their natural condition navigable for floating logs or other timber products but which may, by improvements, be made navigable for such purposes; (e) Where streams or portions of streams are not navigable for commercial purposes and are claimed by applicant to be navigable for floating logs or other timber products, the extent of such use in the past must be shown. In the event no such use has been made in the past, applicant must set forth a reason why it considers such stream or portions of stream navigable for floating logs or other timber products; (f) The location of all existing booms, dams and other improvements on the streams or portions of streams described in the application, and when known, the name and address of the owner thereof must be shown; (g) The nature, kind, character, location and approximate cost of the contemplated improvements must be shown; (h) If the applicant has been operating on any of the streams or portions of streams, the duration of such operation and the kind and character of service it has been performing, and also the names and addresses, if known, of each and every other individual, firm, association or company now operating or which has within six months prior to the filing of the application operated on any stream or portion of stream described in the application, and the kind and character of service performed by each of such individuals, firms, associations or corporations, must be specifically alleged; (i) Where any kind of dam or other improvement is contemplated, the probable effect thereof on abutting property and the times of seasons for the use of splash dams must be shown.

All Concerned to Be Notified.
Rule 4. The notice required by Section 2, Chapter 128, Laws of 1917, for posting and publishing, was amended by the commission and will be directed to every individual, firm, association or corporation shown by the application to be the owner of or operating any dam or boom on such stream or portions thereof, and to all to whom it may concern. Such notice must be published for at least four consecutive weeks in at least one newspaper published in the county where such streams or parts thereof are situated. The publication of such notice must be completed at least ten (10) days before the date set for the hearing (where the notice is published four (4) weeks the date of the first publication must be at least 30 days before the date of the hearing). The notice should also specify the number of times it is being published. This notice must also be published in at least one public and conspicuous place along the course of the stream sought to be improved, for the same length of time as is required for publication.

Proof of publication and proof of posting of notice must be filed with the commission at least ten (10) days before the date set for the hearing of the application. Proof of posting must be shown by affidavit of the party posting notice, and proof of publication must be made by the affidavit of the printer or publisher of the newspaper (care should be taken to have the affidavit made by the printer or publisher of the newspaper. Affidavits by foreman or principal clerk of the printer will not be sufficient). It is also advisable to serve each and all individual, firm, association or corporation owning or operating any dam or boom, personally when possible, otherwise where addresses are known, to mail copies of the notice as published. The applicant should check over the notice furnished by the commission and ascertain if it is sufficient both as to form and substance, and if applicant considers the notice in any way insufficient the matter should be taken up immediately with the commission.

Rule 5. Where the commission is of the opinion that the financial condition of the applicant is such that, in the performance of its duties as a public service corporation, it will be unable to respond in damages for injury to abutting property for any injury or loss suffered by any individual, firm, association or corporation, an indemnity bond in which the surety is an accredited surety company, in an amount to be fixed by the commission, will be required before franchise is granted. Such bond shall be furnished and filed with the commission and shall be so conditioned that any individual, firm, association or corporation suffering any loss or damage, other to itself or property, by said applicant company, may bring suit or action against the principal and surety, or sureties, and such bond for the damage so suffered, and shall be further conditioned that the surety, or sureties, of said bond shall be liable in the same manner and to the same extent as the applicant company.

FOXGLOVE SENT OUT

Shipment of 850 Pounds Goes East From Oregon.

OREGON AGRICULTURAL COLLEGE, Corvallis, July 20.—(Special).—A second shipment of foxglove, 850 pounds—enough for nearly 510,000,000 doses of tincture of digitalis—dried and shipped by citizens of Oregon at the request of the United States Government, has just been sent by Dean Adolph Ziefle, of the Oregon Agricultural College school of pharmacy, to the Federal laboratory at the University of Minnesota where it will be made into tincture of digitalis for the Army and Navy.

Mrs. E. M. Shaw, Who Raises and Markets Her Own Berries.

As well as any men formerly employed at the lumbering establishment. Throughout Clackamas County the women are taking an active interest in the war work on the farms and can pitch hay as well as any man. Cows are being milked by the women and in some places women are assisting at sawmills, where there is a rush of business.

CENTRALIA BOYS "GASSED"

Cecil Keys and Wendell Baxter in Hospital Recovering.

CENTRALIA, Wash., July 20.—(Special).—Cecil Keys and Wendell Baxter, of this city, who have been fighting with the marines on the western front, were both gassed on June 13 and are now in an American hospital, according to a letter from the former received yesterday by his mother, Mrs. Mattie Keys.

Some of the boys got burned badly, but Wendell and I came through it finely," wrote the marine. "Mustard gas works mostly on the eyes. My eyes were swollen for about four days, but are much better now."

Under the Management of Richard W. Childs.

CHILDREN RENDER SERVICE

Bulk of Product, From Which Tincture of Digitalis Is Made, Supplied by Youngsters in Astoria Public Schools.

OREGON AGRICULTURAL COLLEGE, Corvallis, July 20.—(Special).—A second shipment of foxglove, 850 pounds—enough for nearly 510,000,000 doses of tincture of digitalis—dried and shipped by citizens of Oregon at the request of the United States Government, has just been sent by Dean Adolph Ziefle, of the Oregon Agricultural College school of pharmacy, to the Federal laboratory at the University of Minnesota where it will be made into tincture of digitalis for the Army and Navy.

An appeal was sent out to the people of Oregon the first of the year by Dean Ziefle to collect foxglove. From the beginning the campaign was a success. The first shipment of more than 500 pounds was made in May. Oregon school children provided most of the 850 pounds just shipped out, approximately 80 per cent furnished by the Astoria public schools. While the needs of the Government and western Washington, requested several universities in the Middle West to cultivate this plant from seedlings.

Tincture of digitalis is one of the most valuable heart tonics used in medical practice. Alcohol will be used at the University of Minnesota in taking out the active principle in the tincture.

A sample of Oregon digitalis sent to the University of Michigan by Dean Ziefle was tested and the report sent back by Dr. C. W. Edmunds, secretary of the college of medicine, University of Michigan, was that the tincture was two and one-half times as strong as the average tincture received at the University.

"We have assayed it carefully in the laboratory and find it is a splendid preparation," said Dr. Edmunds, in his communication.

The shipment just sent out from O. A. C. consisted of 23 paper cartons, seven bags, one barrel and two large wooden boxes.

VETERAN IS COMMISSIONED

C. B. Compton, Who Served in 1898, Is Made Lieutenant.

HOOD RIVER, Or., July 20.—(Special).—C. B. Compton, Spanish-American War veteran, on the 19th day after his enlistment in the Signal Corps at Camp Lewis, received a commission as First Lieutenant in the United States Guards, following a period of training at Leon Springs, Tex. Mr. Compton, who came here in 1916 to settle on an orchard place at Dea, was 17 years in newspaper work in Manila.

Mr. Compton was a Lieutenant of an Illinois volunteer company in 1898 and was captain of a company of Philippine Constabulary.

WOMEN FILL WAR GAP

HEALTH AND PROFIT FOUND IN TAKING PLACES OF MEN.

Mrs. E. N. Shaw, of Clackamas County, Sells Berries and Buys War Stamps With Proceeds.

OREGON CITY, Or., July 20.—(Special).—That the women of Clackamas County are doing their bit in harvesting crops and performing other duties, owing to the scarcity of male help, is illustrated in many instances. These brave women are working gallantly without complaint and are only too glad to be able to perform these duties. They are staying with their job and are receiving praise from the men.

As an illustration we find a woman who is engaged in raising berries and making trips to Portland alternate mornings, while the other mornings are devoted to taking her berries to the local markets. This is Mrs. E. M. Shaw, who, a few years ago, was a frail woman but who by her out-of-door life and her perseverance, has gained health.

There is a good market for her produce and the money raised therefrom is used in purchasing war savings stamps. Mrs. Shaw, who is, a most

THE PATIENT, FAITHFUL, INDUSTRIOUS ARTIST WEAVERS OF ORIENTAL RUGS ARE

Being Put Out of Work by the War

Their country is being ravished by our enemies, and it soon is more than likely that their exquisite creations will be a thing of the past.

THOSE WHO BUY RUGS NOW WILL BE FORTIFIED AGAINST THAT DAY!

They will be possessed of a treasure that, like the famous Raphael paintings, will continually increase in value. His productions are now worth hundreds of thousands of dollars. The rug artists have earned equal glory for their genius, and their fame, like Raphael's, will live and shine brighter and brighter as the years go by. And here may be found a marvelous collection of these world wonders, as we have assembled in our Portland store all the stocks of our Pacific Coast establishments. A delightful hour may be spent in admiring their beauty.
