Joseph F. Singer announces his candidacy for sergeant-at-arms of the House of Representatives. Since 1909

Mr. Singer has been an officer of the House and an efficient one, too, as he admits, and members agree. Mr. Singer's chief worry now is his inability to speak to Representatives without height asked who will be Speaker and

Joseph F. Singer, Officer of House Since 1909, Again Candidate for Sergeant-at-Arms.

It is surprising the number of legislaters who are coming to Portland these days "just to look around." The PORTLAND BOY GASSED, PASSES Speakership fight is far from their thoughts, really. The solemn assurance is given that they are not interested in the subject—and then at the first opportunity they mysteriously disappear in the mases of hotel cor-

No longer is Portland a quiet sector No longer is Portland a quiet sector in the Speakership battle. All sorts of conspiracies are being hatched to cap-ture votes. Without hesitation each candidate tries to steal away the sup-porters of his opponents and the air is full of rumors, whispered in strict

confidence and must not be repeated for worlds.

One of these confidential rumors is that the other day, at Pendleton, a bunch of Eastern Oregon Representatives got together and mapped out their programme on the organization. How many were in attendance is not known. it is said that there were enough

Another whispered confidence is that a Multnomah Representative suggested to J. L. Day, chairman of the Republican county committee, that the committee call a caucus of the Multnomah members and get them to unite on someone. Chairman Day decided that inasmuch as some of the Multnomah Representatives did not feel enough interest in the party to visit the headquarters dur-ing the campaign and chip in \$15 toward defraying expenses, he did toward defraying expenses, he did not imagine they would pay any atten-tion to a caucus call from the commit-So the motion for a county caucus

tee. So the motion for a county caucus has been laid on the table.

Knowing the conflicting elements in the Multnomah delegation, the outside candidates for Speaker, such as Ben Sheldon, Semour Jones and Denton Burdick, are brasenly stalking Multnomah members for votes, having no regard for the fact that when they invade Multnomah they are noaching on the Multnomah they are poaching on the preserves of K. K. Kubli and Herbert Gordon. What is more to the point, both Jones and Burdick are said to have either first or second choice support from several of the Multnomah delegation.

On the other hand, the game can be played both ways, for Kubil and Gor-don have support in the Willamette Valley, a zone where Sheldon and Jones should, geographically, have every-thing in sight between them. The members of the triple alliance—Wash-

are claiming and each candidate is since the cere in the claim. Development of this angle has caused a bit of uneasiness, for it is palpable on the face of it that some one is being fooled.

Heretofore there has been only one best way of getting high quality spawn—producing it scientifically from the flesh of the mushroom. It was never practically possible to produce it from the original seed called "spore." Now, however, this secret has been discovered by a French scientist. Spawn is now being produced by this secret process. It wonderfully increases the size and vigor of your crop. It does away for all time with uncertainty in mushroom-growing. It makes your mushroom crop uniform always. You are sure it will be of the desired kind of variety. There is only one way of getting the new "spore-culture" spawn. If you are a mushroom grower you should know about it. If you are not, now is your opportunity to begin to make real money.
