NEW RECORD SHOWN FOR LUMBER ORDERS

Increase of 11,000,000 Feet Made in Week.

HOME BUILDING IS FELT

Car Situation Reported to Be Little Improved; Mills Say Requirements Not Met.

Retail lumber dealers are beginning to buy their winter and early spring requirements already, as indicated by a sharp increase in the volume of new business of the lumber mills, according to the weekly report of the West Coast Lumbermen's association. The total volume of orders accepted by 115 mills contributing to the report of the association for the last week was 73,472,841 feet, an increase of 11,000,000 feet over the week before and the heaviest week since the middle of the summer.

Retail yard stocks everywhere are said to be short and pressure from prospective home builders and other classes of consumers the country over indicates a heavy demand for lumber of all kinds during the coming year, the report states. The annual buying movement, which usually does not start until near the first of the year, seems already to have set in.

In face of this situation the car shortage is not being materially relieved. The mills report that they are getting no more than 40 per cent of their car requirements and in some districts the pinch is even more severe than that. Railroad authorities are working to remedy the shortage but no substantial relief is expected within the next 30 days.

Last week the mills booked orders for 84 cars more than they shipped, bringing the accumulation of unfilled rail orders on their books up to 697 cars.

New business now coming in is well proportioned between rail and water shipments. Cargo orders for the week were 17,552,638 feet, of which 12,488,628 feet were for domestic delivery and 4,104,000 feet for export.

In anticipation of the tremendous rush of business now in prospect the mills continue to operate at full capacity and probably will remain on that basis, so far as possible, through the winter. Production at 115 mills last week aggregated 82,677,000 feet which was within 1.88 per cent of normal. But stocks still are short, approximately 30 per cent. Unless the car shortage lasts all winter and continues to hold up shipments stocks will not get back to normal basis for an indefinite period, as there is enough business in sight, say the manufacturers, to absorb all their output.

SHRIMP INDUSTRY OPENED
New Alaskan Pack Is Without Salt, Water or Other Material.
ANCHORAGE, Alaska, Sept. 24.—(By mail.)—Shrimp packing is a new industry opened at Petersburg, famous for years as an Alaska cannery point. Considerable success is said to have greeted the new venture from the start.

The shrimps are put through two cookings and are packed in five-pound cans without salt, water or any other material, it is said. They are shipped thus on ice to the states.

Boy Scouts in Southwest.
DALLAS, Tex., Nov. 8.—Southwestern district headquarters of the Boy Scouts of America, embracing Arizona, Louisiana, New Mexico, Oklahoma and Texas, have just been established in Dallas. J. P. Fitch, scout executive at Columbus, O., has been appointed field commissioner of the district.

Editorial Children's BOOK WEEK
NOV. 10TH TO THE 15TH

is a nation-wide recognition of the value of good books in child rearing and training. It is recognition of the fundamental truth of the old saying, as you bend the twig so the tree will grow. Childhood is the most receptive period of life—the most responsive.

Your little boy, your little girl, deserve the best in books and in life. Translate this thought of yours into action.
