

PALMER SAYS REDS USE LAW LOOPHOLE

Federal Measures Declared Inadequate to Needs.

RIGID ACT IS PROPOSED

Effective Method to Deal With Sedition, Anarchy and Radicalism Is Asked.

WASHINGTON, Nov. 15.—The growth of radicalism throughout the country was to be attributed to inadequacy of federal laws against preaching violent overthrow of the government, Attorney-General Palmer declared tonight in replying to the senate's recent inquiry as to what action had been taken by the department of justice to curb efforts to establish a "dictatorship of the proletariat."

Mr. Palmer disclosed that the department had more than 60,000 persons under surveillance as radicals, with whom it is unable to cope because of weakness of present statutes. The attorney-general urged the passage of a law to supplement the espionage act and to take its place when the war-time measure ceases to be effective.

Proposed Bill Is Broad.

He described the proposed act as being the most effective method of dealing with sedition, anarchy and radicalism generally which members of his staff had been able to draft. Mr. Palmer said the bill was broad enough to stop effectively all attempts to overturn the existing order and yet safeguard free speech and the press.

Activities of the foreign language press present another problem which the department has been unable to meet successfully, he said. Investigations have uncovered 522 foreign language newspapers which have operated in violation of laws against the dissemination of information in the governmental system by violence and preached sedition.

English newspapers branded as anarchistic and menacing by the department agencies number 166, Mr. Palmer said. He charged that these were much more easily dealt with, as local citizens are aiding the government in reporting them.

144 Foreign Papers Enter U. S.

In addition Mr. Palmer said, 144 radical newspapers, published in foreign countries, are received and distributed in the United States. Most of them, he said, were not sent through the mails, but were shipped in bulk and distributed by hand to the foreign population.

The department has kept a corps of 40 translators busy and is attempting to gather evidence of their activities from other sources, Mr. Palmer said. Articles advocating violence always are supported by the department, he followed up with pamphlets and other propaganda.

Most of the newspapers named are practically devoid of advertising, which the department accepts as proof that funds are coming from outside sources, Mr. Palmer said.

Immigration Law Changes Asked.

Mr. Palmer argued for changes in immigration laws and revision to similar laws governing deportation. Radical leaders have taken advantage of countless technicalities to evade deportation laws, he said.

Practically all of the radical organizations in the country have looked upon the new race as fertile ground for the spread of their doctrine, Mr. Palmer said. He warned that the propaganda had been successful in many respects and that the government should guard from trouble in that direction.

57 HERE FACE CHARGES

SWEEPING STATE SYNDICALISM ACT TO BE INVOKED.

Federal Investigators to Testify Before Multnomah County Grand Jury Tomorrow.

Federal officials who have been investigating the 57 alleged members of the I. W. W. who were arrested in a raid the night of the Centennial outbreak will be witnesses before the Multnomah county grand jury tomorrow morning, giving evidence which is expected to result in many indictments for violation of the syndicalism act.

The state law under which many of these men will be prosecuted is more sweeping than the federal espionage act which demands evidence of an overt act, as membership alone in an organization advocating sabotage and violence to effect political ends or industrial aims is a violation. District Attorney Evans, who is in Washington, D. C., seeking to have dismissed the Dr. A. A. Humphrey appeal to the United States supreme court, from a conviction of manslaughter, telegraphed Joseph L. Hammerly, chief deputy yesterday to use the utmost vigor in prosecuting the "wobblies."

Monument on University Campus at Seattle Proposed.

HELENA, Mont., Nov. 15.—That the memory of Warren Grim, former University of Washington athlete, who was shot down by I. W. W. in Centennial Wash. on Armistice day while marching in an American Legion parade, may be perpetuated.

Posters Put Up in Sacramento.

SACRAMENTO, Nov. 15.—Circulars printed in red, said to have been distributed in Sacramento by Industrial Workers of the World, were placed today in the hands of United States Commissioner Wallace Shepard. One circular was signed "W. D. Hayward" and protested against "vermin" in Kansas prisons. Another circular was in form of a subscription asking for money to defend I. W. W. under arrest.

POSSE FIGHTS WITH REDS

(Continued From First Page.)

number, the members of the posse attempted to reach the spot. They were unable to approach nearer than 100 yards to the cabin.

The larger posse is still out there, and will be joined tomorrow by reinforcements which are to leave early in the morning. All the men are picked woodsmen, many of whom know every foot of the Hannaford creek headwaters country.

"Though we believe that Bert Bland is among the I. W. W. who fought the posse today, there are contradictory rumors. A girl came to us tonight and told us that she saw Bland on the streets just short time before."

Posse Held Up by Woman

"Another rumor is that Bert Bland was at the home of his brother, Commodore Bland, now under arrest, this

afternoon. Four of our men went to search the Bland home. They were met at the door by Mrs. Bland, with a drawn revolver. She held them up for a moment and I believe one of them obtained the weapon.

"These men reported that they saw some one leave the rear door and run over the hill behind the house. Two of the posse went in pursuit, and we are told that shots were heard fired soon after. At present four men are searching the hills in that vicinity. The man who fled is rumored to have been Bert Bland."

The home of Commodore Bland is at the northeastern outskirts of Centralia, with the fringe of low hills pressing close to it. Captain Dycart said that later information is that Haney, missing posse member, is not known as a Thurston county game warden.

Seven hundred regular United States troops passed through here for Camp Lewis by special train at 10:30 o'clock tonight. They are from San Antonio and said at the station that they expected to be put out on I. W. W. duty.

Marshfield Watching for I. W. W.

MARSHFIELD, Or., Nov. 15.—(Special.)—As a result of the Centennial I. W. W. affair new interest has been aroused here in eliminating I. W. W. members. There is known to be a considerable representation of the order in one of the largest logging camps of the county, but the members have not conducted any offensive campaign.

IDAHO ROUNDS UP I. W. W.

State Constabulary Receive Orders to Drive Out Radicals.

BOISE, Ida., Nov. 15.—Orders were issued today by Robert O. Jones, state commissioner of law enforcement, for the immediate arrest of all members of the I. W. W. found to be in Idaho. The orders went to Chief Frank Brethren and other members of the state constabulary at present hunting radicals in north Idaho and also to sheriffs of the state who are, by state law, members of the state constabulary and subject to the orders of the law enforcement executive.

GRIMM MEMORIAL URGED

Monument on University Campus at Seattle Proposed.

HELENA, Mont., Nov. 15.—That the memory of Warren Grim, former University of Washington athlete, who was shot down by I. W. W. in Centennial Wash. on Armistice day while marching in an American Legion parade, may be perpetuated.

TO RELIEVE CATARRH

Wise Treatment Includes Use of a Good Blood Purifier.

The cause of catarrh exists in the blood, and is an impurity that produces an inflammation of, and discharge from, the mucous membranes. It is commonly made worse by sudden changes of weather, indiscretions in the matter of clothing, and by many other things; and it is hazardous to neglect it, because it always affects the general health. It is a constitutional disease and must have constitutional treatment—this is rational.

Hood's Sarsaparilla purifies the blood, builds up the system, and declares a fair trial in every case. If a laxative or cathartic is needed, take the gentle Hood's Pills.—Adv.

Homer Factory Furnace Expert Will Demonstrate Economy, Efficiency and Advantages of the Pipeless Furnace

MONDAY—TUESDAY—WEDNESDAY

By special arrangement Edwards has secured for three days only Mr. F. W. Isherwood, the furnace expert of the Homer Pipeless Furnace Factory. Mr. Isherwood's wide experience in pipeless-furnace heating covers every phase of this modern method of heating. Every home owner should consult Mr. Isherwood, for he will tell you things of vital interest on the subject of scientific and economical heating of your home. If you are now using a pipeless you will learn important facts from Mr. Isherwood regarding its operation.

If you are using any other method of heating—stoves, hot water or the old-fashioned hot-air furnace—then you should by all means take the opportunity to get this expert information on the pipeless heating way.

Mr. Isherwood will answer all questions about the pipeless furnace and will give all possible information to anyone who contemplates installing a pipeless furnace now or at some future time. Mr. Isherwood will be at Edwards Company's store Monday, Tuesday and Wednesday from 10 A. M. to 3:30 P. M.

Note the Thermo-Seal Inner Lining—Heavy Galvanized Iron with asbestos insulator. Without it there would be no circulation of warm air. It keeps the return air cool until it reaches the base of the furnace. It sends all the heat to the rooms above. The Thermo-Seal is a distinct Homer feature.

The large Homer clean-out is conveniently placed to make occasional cleaning very easy. Feed door is extra large to allow the use of large pieces of wood or coal.

Water pan with proper capacities is correctly located to moisten the warm air before it leaves the Homer. The ash-pit door is dust-tight and is the right size to permit easy removal of ashes.

Outer and inner casings of the Homer are adjustable to any depth basement of six feet or more. They make airtight connections between the furnace and the register. Made of heavy galvanized iron.

Radiator—all cast, constructed in two pieces, "horse-shoe" type, flues oversize, insuring free circulation; smoke passes completely around the radiator, which gives maximum extraction of heat before same passes to chimney.

Extra heavy reinforced firepot with ribbing both on inside as well as outside. Made of pure Strokel iron and guaranteed to last five years.

Note the large air spaces which insure the proper ratio of warm and return air passing through the Homer. They are designed to allow all the air to pass through the furnace about every 25 minutes, giving a steady flow of warm air.

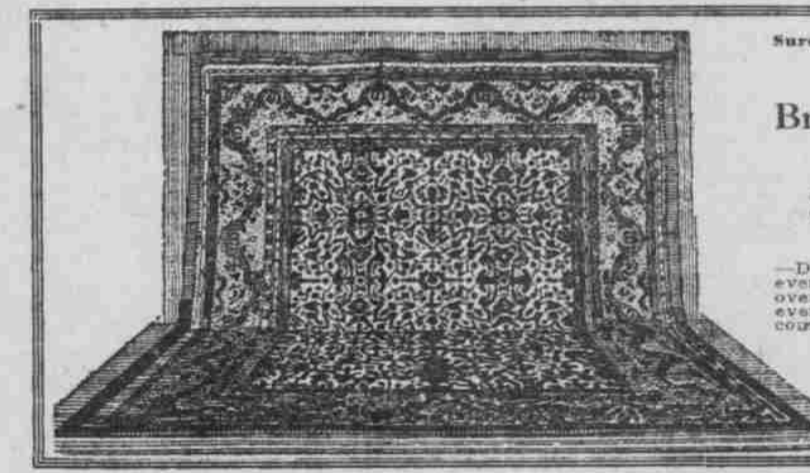

The Homer Radiator, with its long travel, supplies more heat in the hot-air chamber and sends less up the chimney. And because the Homer water pan furnishes the right amount of moisture you will not need so great a temperature to keep your house comfortable. Actual tests have proved that dry air demands a temperature about 10 degrees higher than moist air to make the surroundings comfortable.

These features mean that you will save with your Homer a third to a half of the fuel that other systems would require to give the same satisfactory results.

The Homer is the great saver of fuel, because it is designed and constructed to use the maximum amount of heat generated by the fire. The Thermo-Seal Inner Lining protecting the return air in the outer chamber keeps all the heat within the furnace. The single register means efficiency in the distribution of hot air.

You will always have complete control of the fire because of the Homer ash pit and perfect joints. The Homer fire pot and combustion chamber give more complete combustion of fuel. In other words, you will consume the fuel more completely and at the same time not waste so much of the heat generated.

Installed on Easy Terms—No Interest Charged Either

Surely, You're Not Leaving Those Floors Uncovered While Edwards is Displaying Over Seventy-Five Different

Brussels and Axminster 9.0x12.0 Rugs at

\$29.50, \$37.50, \$41.50, \$49.50

(On Terms to Meet Your Requirement.)

—Designs and colors, Edwards thinks, that will meet every desire. Orientals, conventionals, medallions, all-over and florals in color combinations of nearly every kind. Browns, greens, blues, tans, are, of course, predominating.

—Very pretty are the 9.0x12.0 Wilton Velvet Rugs in plain colored taupe, green and mulberry two-tone effects at... \$71.75

For the Room That Cannot Be Conveniently Neglected, Edwards Suggests This

Five-Piece Ivory or White Enamel Suite \$89.90

—All pieces are full size and constructed with the utmost care—finished by equally diligent workmen whose pride it is to make them look "the very best." Walk by the Fifth-street window today and see them set up as illustrated.

—To complete the suite 100% Edwards recommends Simmons' 36-Coll. Weight-Adjusting Spring at \$12.25, and one of his

36-POUND FELTED COTTON Sleepwell Mattresses at \$25 or \$31

—You might think: Why pay \$31, when there's one made of the same cotton at \$25? Here's the Difference

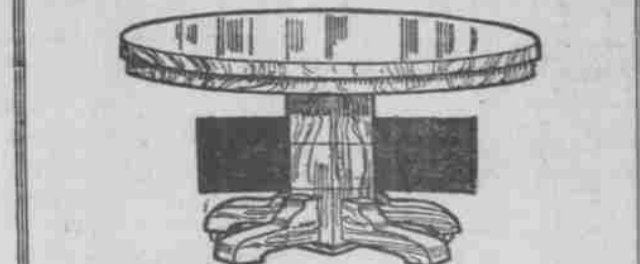

—The better Sleepwell has a heavier quality tick and has more staple cotton in the ticking, which will naturally hold up better. Both are guaranteed not to lump or shift.

Models Now on Display at \$32.50, \$39.50, \$43.50 and \$49.75
