ropathic physician, a psycho-analyst and minister of the gospel. After 10 weeks of the newspaper barrage, Lu-cas' practice fell from \$1000 a month to virtually nothing, his clients from 50 a day to from one to four daily, and Lucas was denied admission to public buildings, was ousted from his office in the Morgan building and generally avoided, it was said.

Lucas' Claims Quoted.

The defense maintained that Lucas had so conducted himself as to become a quasi-public person and the subject of legitimate public comment. There was no malice in the newspaper at-tucks, it was asserted, and their only purpose was to rid the city of a man the newspaper owners were confident was "swindling" guilible persons, it

Attention Distributors!

27,000,000 horsepower is employed on American farms today-4,500,000 more than is used in all the other industry of America combined. The farmer is short on help-but he has the money and is looking for anything that will speed up food production, cut down his costs, and increase his profits. If your proposition has merit, and does what you claim it does, he is your biggest and best customer. The power farming equipment field is the richest dealer field in existence-and the Uminor is the surest, quickest and most profitable farm field proposition open to dealers. We are now ready to discuss distributor representation with responsible high grade organizations.

-something, at last, that a dealer can sell and get his money on at the time he sells it-no "trade ins," no jockeying on price, every sale a cash sale.

-the smallest and lowest priced motor car is the only other thing that sells as fast as the UninoR and the field for the Unutor is even bigger.

-the one dealer proposition that knows no seasons. In open weather it does the field work of one horse, and in bad weather it does the belt work of one 4 H. P. gas engine.

-the best attention getter a distributor ever had on his floor. Brings people into your salesroom, thereby stimulating sales throughout your entire line. Keeps your place a live place all winter.

-actual results show that no product

-right now is the time to start selling the Unillor. Farmers the world over are grabbing this Unition as the first real solution to the farm help problem and at this very moment every farmer is laying his plans for bigger production next season. The farmer has the money and is willing to spend it when you show him his money's worth. He is a hard headed, wise buyer. If your proposition has merit and does what you claim for it, he is the biggest and best customer on earth.

-every farmer is an interested prospect on the UnitoR.

-the Midwest service system is so thorough that every Unutor you sell will stay sold and sell more Utilitors.

-every Unillor you sell makes immediate friends and customers for you by the consistent, dependable service

ing you prompt delivery on every Uniffor you sell. You can't get delivery on passenger cars just now and the only relief measure in sight is the Unillor. If you ever sell Utilitors for one season you will want to sell them for life.

The Midwest Engine Company is now engaged in making distributor appointments throughout the entire. country. An authorized representative of our sales division will be 'in PORTLAND very shortly for the purpose of selecting the right distributing organization for this territory.

If you are equipped to handle a large, important proposition of this sort, write immediately to our general offices at Indianapolis stating full facts as to equipment, experience, lines you are now handling, precise territory covered and number of dealers. Give banking connections. This letter should be mailed special delivery at once. It may even be better to use the wire.
