CHANSLOR'S STERN SINKS LIKE SHOT

Men Have Wild Ride.

Are Identified-Those Aft on Ship Had No Chance.

(Continued From First Page.) between 25 and 30, about 5 feet 10 inches tall, with dark brown hair. His body was found about a mile submerged. farther north of the boat, he having evidently started from the scene in

Captain Sawyer tonight is lying in survivors. the Bandon hospital, suffering from a fractured rib, severe bruises and the effects of exposure, and awaiting his wife, summoned by telegraph

He stated that he was on his way to the bridge when the vessel struck. First Officer Reese was on watch. William Merkel first gave the alarm, reporting a rock alongside. The mate hauled the ship out and it struck one rock on the port quarter CAR SHORTAGE FORCES MORE and another with the starboard bow. Thirteen men were in the lifeboar when it left the ship. The boat drift-

ed about for some time looking for more men, but none were found. On Friday afternoon they found two men floating on the gang plank. They were taken aboard, making 15 in the boat when it attempted to land on

Among them were Boatswain

One vessel was sighted Friday aft-ernoon by the lifeboat. It was passing armoon by the lifeboat. It was passing north about two miles away. The lifeboat burned a flare but the vessel paid no attention. The lifeboat was well equipped with air tanks, water, and a sail. The sail could not be used on account of the strong wind. Someone knocked the plug from the water barrel in the excitement and the water was lost.

The Chansellor had no cargo. Among the personal effects belonging to the

the personal effects belonging to the crew was about \$4000 in money. The ship's cat was locked in the

The four bodies so far recovered were washed ashore four miles ponth of Bandon, where the lifeboat attempted to land Theorem to land the recent cold weather caused a considerable slowing down as the state of the mills in Portland washed as the control of the mills in Portland washed as the control of the mills in Portland washed as the control of the mills in Portland washed as the control of the mills in Portland washed as the control of the mills in Portland washed as the control of the mills in Portland washed as the control of the mills in Portland washed as the control of the mills in Portland washed as the control of the mills in Portland washed as the control of the mills in Portland washed as the control of the care shortest as the care shortest as the control of the care shortest as the control of the care shortest as the care shortest as the control of the care shortest as the care s

miles. The rain and mist were so heavy that the rock was not observed by the watch until too late. At noon on Thursday the ship had been no lis course. Telling of the accident, Captain Sawyer said: "When she struck the rock the vessel seemed to part in the center. The how retained to business for rail delivery—a total of against a Mexican.

will be even lower. Inasmuch as none of the mils now are able to give any reasonable assurance of early delivery, many have withdrawn from the market entirely. The 124 mills represented by the weekly report accepted only 25,640,000 feet of new business for rail delivery—a total of against a Mexican. part in the center. The bow rested on the rock, but the stern half drop-ped down and disappeared in the water. None of the men in the engine room had a chance to escape. Only those in the forward part of the vessel were able to reach the lifeboat which put away with 13 men, among them First Officer Reese, Second Of-ficer Norton and Third Officer Rose and Frank Cashen, steward.

Landing Attempt Futtle.

"It was dark, but we could see the Cape Blanco light. At first we rowed Cape Blanco light. At first we rowed in toward shore, thinking we might find protection behind the rocks, but soon realized the futility of this, so pulsed out away from the danger. All night long we fired rockets in hope of attracting attention. Friday morning we found ourselves several miles off shore to the north. We rowed up and down the coast in the hope of being sighted by a passing vessel, but falled to see any.

"Toward evening I noticed that the men were dropping off one by one of exposure. They had been working continuously for 24 hours, bending every effort to keep the lifeboat from the sand-wiches.

The four bodies so far recovered were washed ashore four miles ponth of Bandon, where the lifeboat attempted to land. They are being brought to Bandon.

Captain Sawyer, when asked as to the cause of the wreck, stated that the ship was caught in a strong curtent that took it out of its course five miles. The rain and mist were so miles are being added to the long list of idle plants nearly every day, production. Reporting the incident, Boatswain Henning said:

When Fail to Report.

When Fail to Report.

Resporting the incident, Boatswain Henning said:

While in Mazatlan, Sinalos, Mexico, on November 12, 1919, Upon expiration of the above liberty the men failed to report to the ship.

"Inquiries being added to the incident, Boatswain Henning said:

"While in Mazatlan, Sinalos, Mexico

cepted only 25,640,000 feet of new business for rail delivery—a total of 1188 cars.

Even this comparatively small volume was 4.770,000 feet, or 159 cars in excess of the lumber actually shipped. By accepting 18,639,254 feet for domestic cargo shipment, 3,301,000 feet for export and 2,718,868 feet for local delivery the mills brought the total new business for the week up to 58,299,132 feet—a small fraction more than they cut. The total unfilled rail orders now aggregate 12,294 cars, or 371,820,000 feet, at these 124 mills alone. Some of the mills have orders enough on their books to run them steadily until spring.

charged with assault and battery against a Mexican.

Every effort was made by the former commanding officer, also the American consul, Mr. Chapman, to obtain their release. Both men were untiring in their efforts.

"While these men were imprisoned our men and the consul visited them, found out that they were not furnished with bed clothing of any sort, also that their food was entirely insufficient. Bed clothing was furnished them by the ship, also two meals a day furnished by the ship. The American consul took them sand-wiches.

"A small contribution from the crew

Tacoma, Wash., Dec. 20.—(Spener were dropping off one by one of exposure. They had been working continuously for 24 hours, bending every effort to keep the lifeboat from Thomas Grant, pilot of the Osaka every effort to keep the lifeboat from Thomas Grant, pilot of the Osaka becoming swamped by the mountain-ous waves. It was gradually ap-proaching darkness, and I was sure that to stay out another night meant death, so we decided to take a chance on reaching shore through the breakers.

"We rowed along the coast until we could see along the shore line a stretch on the beach that looked most fareaching. We must have named the first the could not sleep, and finally got up and took a look around. He stretch on the beach that looked most fareaching. We must have named the first of could easily make out the lights of fareaching. stretch on the beach that looked most favorable. We must have passed the entrance to Bandon harbor within a half mile or so, but could see nothing because of the weather.

So up and took a look around. He could easily make out the lights of Empire City. He rushed to the officers on watch and told them they were going on the beach. The course of the ship was swung from southeastthe ship was swung from southeast-erly to southwest before she cleared the rocks. An investigation showed the vessel had been put off her course on account of contrary currents. It is held by local mariners that this is what happened to the tanker.

STEVENSON RITES HELD

to Be Taken to England.

in the many of the water I was so weak that I could hardly move. I crawled to a drift log where I thought I would be safe from the surf and digging a hole in the sand I laid down to rest. I fell asleep and must have slept an hour or more. When I awoke it was terribly cold, it was raining and blowing and I knew that it meant death to remain there.

"I saw a light and started out for it. It took several hours to reach the Bandon lighthouse, where I found help."

The engineers of the Chanslor, all of whom were in the aft part of the yessel and had no chance of escape

live in England.
Simple funeral services were con-ducted by Rev. A. A. Morrison and the Jackson, second assistant; W. Jordhay, third assistant.

Men Without Water.

The men in the lifeboat were without water, according to Earl Doeley.

THE INSTRUMENT OF QUALITY

that—cannot be ignored—are admitted by our competitors and establish without question that the SONORA is positively the finest phonograph that science and human hands can produce.

You cannot buy a second-hand Sonora Phonograph, although there are over 2000 of them in use in this immediate territory. This is proof positive that Sonora instruments give lasting satisfaction.

You cannot trade any other make of phongraph on a Sonora

Sonora performance and Sonora merit are so convincingly evident that it is the most desirable phonograph in the world. Sonora dealers' margin of profit will not permit them to invest any portion of their margin in phonographs that cannot stand up alongside of a Sonora instrument and bring a ready sale.

The Sonora was the first cabinet phonograph to sell under \$200.

The Sonora was the first phonograph to utilize the automatic stop.

The Sonora was the first phonograph to adopt a tone modulator.

The Sonora was the first phonograph to feature an extra long running motor.

The Sonora was the first phonograph to use a motor-meter (which indicates how many more records can be played before rewinding is

The Sonora was the first phonograph in the world made to play all makes of disc records The Sonora was first in the award for tone quality at the Panama-Pacific International

Exposition, receiving the highest score.

The Sonora was one of the first to secure a license to operate under the BASIC PATENTS of the phonograph industry.

No expense was spared in its creation-None will be spared in maintaining Sonora's pre-eminent position in the world of Recorded Music.

Sonora supremacy was attained through the determination of its creators to bring the phonograph out of its common form and place it in the sphere of musical instruments. Eight years of constant research and experi-

menting is back of the present Sonora instrument. It has passed through its experimental stages and is today the standard of the world. The Sonora is internationally famous for its many unique and important accomplishments.

Graceful bulged cabinet designs, found only in the

BUSH & LANE BLDG.

finest of furniture, are exclusively Sonora.

It matters not what make of record you wish to hear-the Sonora is designed to reproduce any make of record without additional devices of any If you exercise care in the selection of a phono-

graph and demand performance instead of promises, your inevitable choice will be a Sonora. Over twenty different models at prices from \$60 to \$1000 allows you the privilege of "Sonora ownership" at a price you can afford to pay.

'Tis a display of good judgment to select a Sonora-Pride of possession will follow its faithful performance in your home

THE GIFT OF GIFTS Why not pool your Xmas interests this year and select a Sonora for the home—the one gift that every member of the family can enjoy?
