FREE

A Ten-Day Tube of Pepsodent. Send the coupon. Make this simple home test and see how your teeth look then.

Stain and Tartar Can Be Ended

They are due to film. Now you can daily combat that film and keep teeth whiter, safer and cleaner.

The ten-day test will prove this. The results are clear. And the book we send will tell the reason for them.

Make this test now. Millions have already done it. See for yourself the difference between film-coated teeth and clean teeth.

Your own teeth will tell you quickly what is best for you

See How White

Teeth Can Be Without Film All Statements Approved by High Dental Authorities

Perhaps your teeth are clouded by a film. Most teeth are, more or less, save right after cleaning in a dentist's chair.

The cloudy film looks like the teeth, and you think the teeth are clouded. B... it is the film. Remove it and see how teeth look then.

That viscous film which you feel with your tongue is the cause of most tooth troubles. It clings to teeth, enters crevices and stays. The tooth brush does not end it. The ordinary dentifrice does not dissolve it. So it stays - much of it and may do a ceaseless damage.

That is why so many brushed teeth discolor and decay. You leave the film, and that is the great tooth wrecker. Despite the tooth brush, statistics show that tooth troubles are constantly increasing.

How Teeth Are Ruined

That film is what discolors - not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. Dentists call the film "bacterial plaque." Those germs, with tartar, are the chief cause of

Dental science has for years sought a way to combat this film. Periodic dental cleaning removed the film and tartar. But what was needed was a daily film combatant.

It has now been found. Convincing clinical and laboratory tests have amply

proved its efficiency. Able authorities endorse it. And now leading dentists all over America are urging its daily use.

For home use the method is embodied in a dentifrice called Pepsodent — a scientific product. And, to spread the facts, a 10-Day Tube is being sent to anyone who

Now Millions Know

Now millions know by actual test what Pepsodent can do. Everywhere you see the results in whiter, cleaner teeth.

Pepsodent is based on pepsin, the di-gestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day com-

Pepsin long seemed impossible. It must be activated, and the usual method is an acid harmful to the teeth. But science has discovered a harmless activating method. And now this film combatant can be every day applied.

Pepsodent needs no argument. The results are quick and apparent. See what it does, read the reason, then judge it for yourself.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how the teeth whiten as the fixed film disappears.

Compare the results with your old methods. See the effects you never saw before. The test will be a revelation to you. Mail the coupon to us today.

III.

repsodent

The New-Day Dentifrice

The scientific film combatant, which leading dentists everywhere now advise for daily use. Druggists everywhere are supplied with large tubes. Millions of teeth show its benefits.

Ten Days Will

Look now at your teeth, then look in ten days. You will see what this new method means to you.
