New Hair Growth After BALDNESS

HAIR GROWN ON MR. BRITAIN'S BALD HEAD BY INDIANS' MYSTERIOUS HAIR GROWER

My head at the top and back was absolutely bald. The scalp was shiny. An expert said that as he thought the hair roots were extinct, and there was no hope of my ever having a new hair growth. Here, strong, lustrous hair! No trace of baldness. The pictures shown here are from my photographs.

Indians' Secret of Hair Growth

At a time when I had become discouraged at trying various hair lotions, tonics, specialists, treatments, etc., I came across, in my travels, a Cherokee Indian "medicine man" who had an elixir that he asserted would grow my hair. I bought a little faith, I gave it a trial. From recent photo. Although I had my little faith, it developed day by day. To my amazement a light fuzz soon appeared. It developed as in day, into a healthy growth, and ere long my hair was as profuse as in my youthful days.

This I was astonished and happy to express my state of mind mildly. Obviously, the hair roots had not been dead, but were dormant in the scalp, awaiting the fertilizing potency of the mysterious pomade. I negotiated for and came into possession of the principle for preparing this mysterious elixir, now called Kotalko, and later had the recipe put into practical form by a chemist.

That my own hair growth was permanent has been amply proved. Many men and women, who have reported satisfactory results from Kotalko.

How YOU May Grow YOUR Hair

My honest belief is that hair roots rarely die even when the hair falls out from fever, excessive dizziness or other disorders. I have been told by experts that often the roots become imbedded within the scalp, covered by hard skin, so that they remain for a time like bulbs or seeds in a bottle which will grow when fertilized. Shampoo (which contains alkali) makes the roots brittle, Kotalko softens these elements of nature which dry up and die, making it brittle. Kotalko softens these elements of nature which dry up and die, making it brittle. Kotalko softens these elements of nature which dry up and die, making it brittle.
