

F. E. TAYLOR ELECTED HEAD OF REALTORS

National Association Chooses Portland Dealer.

OTHER WESTERNERS WIN

Hogium Delegate Elected Vice-President and Two Portland Men Get Other Places.

F. E. Taylor, head of the F. E. Taylor Co. of this city and one of the leaders in organizing the real estate men throughout the northwest and working for the betterment of the profession, has been elected president of the National Association of Real Estate Boards, according to news received yesterday from Fred O. Brockman, secretary of the Portland board.

wanted to win. It thought Hughes could win. And there wasn't any real idea from the start of nominating anybody else.

As to telling you what is going to happen, I simply can't do it. I may

be able to after I get there, but, although there are upward of a thousand delegates on this train, there isn't an out-of-state board among the lot.

GRAFT NIPPED IN BUD

PROMOTERS OF ALLEGED SHOW FORCED TO REFUND.

Better Business Bureau Watchful for Schemes to Impose on Visitors for Shrine Week.

Determination of the better business bureau of the Portland Ad club, with the co-operation of the state, largely authentic and to prevent imposition on the public in connection with the coming of the crowds to the convention and exposition this month, has already resulted in nipping one scheme that had attracted the interest of 14 individuals who were glad to receive refunds of \$2.50 each.

An advertisement inserted in the clareted leader of Tuesday appealed for 100 men to work during the Shrine convention. Manager English of the bureau investigated and found that two men had represented that they had arranged to put on a theatrical performance at the Oaks and also for the Shrine convention committee. They require a deposit of \$2.50 with the application for the position, the applicant to take one lesson in preparation for the performance, at which time an additional \$2.50 was to be paid, the total \$5.00 to pay for a costume. The employment was represented as to continue for several weeks at \$35 a week. Neither Manager Cordray of the Oaks nor the Shrine committee had any knowledge of the matter.

Captain Clipse, chief of detectives, had the men brought to his office and gave them the privilege of making restitution.

POLICE REWARDS BARRED

Money Hereafter Must Be Turned Over to Pension Fund.

No policeman in the future will be allowed to accept rewards for capturing criminals, and in cases a police man arrests a criminal for whom a reward has been offered, the money paid coming to the United States pension fund, according to a ruling made by Chief Jenkins last night. Rewards among the police over the division of reward money caused the decision.

publics and a resolution authorizing appointment of a committee to confer with the Canadian government with regard to the restrictions on pulp wood coming to the United States. Most of the other measures were minor ones. The most important bills signed were: The naval appropriation bill, carrying \$49,000,000. The army appropriation bill, carrying \$436,000,000. The District of Columbia bill, carrying \$18,372,000. The diplomatic and consular appropriation bill, carrying \$9,218,337. The third deficiency bill, carrying \$58,000,000. The postoffice pay increase bill. A bill providing for the exclusion and expulsion from the United States of aliens who are members of anarchistic organizations. An act to pension soldiers and sailors of the Spanish-American war, the Philippine insurrection and the China relief expedition. The industrial vocational rehabilitation bill. A bill permitting government-owned radio stations to handle private and press messages. An act amending the trading with the enemy act so as to permit the restoration of seized property to returned enemy aliens and to residents of former enemy countries now residents of new countries set up under the peace treaty. An act to establish a woman's bureau in the department of labor. An act granting pensions and increase of pensions to certain sailors and soldiers who are disabled by the civil war and widows and dependent relatives of such persons. An act authorizing enlistment in the federal forces of non-English speaking citizens and aliens. An act relating to the immigration of aliens and their residence in the United States.

of the United States senate, saving and excepting Knute Nelson, who is barred because he was born in the United States. It's not going to be a bossed convention. Pennock, one of the bosses who helped run the last two affairs, is sick and probably isn't coming. Barness, the New York boss, has long since despaired of the constitution of which he was the sole guardian and he has left the boss, Elliu Root, after learning how matters would be handled by the other side. Mr. Root is getting along in years, and his endurance isn't what it used to be. In 1912 the situation wasn't at all like this. It was just a knock-down-and-drag-out between Roosevelt and the big bosses, but now the big bosses are in full control and perfectly willing to fight till the last armed foe expired. Roosevelt did most of the knocking down, but at the finish the bosses did the dragging out. In 1916 the party was hungry and

FARM EXPERIMENTS CURTAILED BY FUNDS

Oregon Is Hit Hard by Reduction of Stations.

APPROPRIATION IS CUT

Department of Agriculture Issues Order Closing Varied Work Throughout Country.

Northwest agricultural stations will be closed as follows: Burns, Or. Field station Lind, Wash. Field station Corvallis, Or. Cereal diseases Pullman, Wash. Cereal diseases Umatilla, Or. Irrigation station Ashland, Or. Forest insects There out of every four forest experiment stations.

WASHINGTON, June 5.—Secretary Meredith in a statement tonight outlined more than half a hundred department of agriculture activities which he said would have to be abandoned as the result of reduction in the appropriations carried in the annual agricultural bill. The agriculture bill reported approximately \$31,000,000, which Secretary Meredith said was \$6,000,000 less than the department's estimate of its needs and \$2,185,000 less than provided in the appropriation for the present year.

The secretary said the most serious restriction of the department work would involve hog cholera eradication activities. Work designed to wipe out hog cholera, he said, would have to be abandoned in several states, the force of men in the field showing farmers how to combat the disease reduced from 142 to 84, and specialists now engaged in the larger hog producing states reduced from an average of six to about two per state. The department will have to discontinue its co-operation in the employment of dairy specialists engaged in demonstration work in Nevada and Wyoming, the statement said.

Oregon Is Hard Hit

Many field stations will have to be closed. This includes all the stations in North Carolina and Tennessee and those at Burns, Or. and Edin, Wash. Work toward preventing cereal diseases must be discontinued at the stations at Ithaca, N. Y.; Lansing, Mich.; Auburn, Ala.; Tucson, Ariz.; and Corvallis, Or., and must greatly be reduced at many other stations, including Pullman, Wash. Stations at which problems in irrigation agriculture are studied, will have to be abandoned at San Antonio, Texas; Umatilla, Or., and Newlands, Nevada. The investigational work at three out of the four forest experiment stations on the western forests must be discontinued. Work toward preventing spoilage during shipment of poultry, eggs and fish must be curtailed in several directions. The project designed to give advice to cities concerning their marketing problems must be discontinued. "It will be necessary to discontinue all work to develop direct marketing of farm products by parcels post, express and otherwise. The Pacific coast, the intermountain region, the south and southwest must, in large measure, be deprived of the benefits of the market news service. The news service rendered the public from most of the large market centers must be so curtailed that widespread dissemination of information regarding market demands, supplies and prices will be impossible. "Certain lines of activity in Japanese men furnishing market news of fruits and vegetables. "Butter inspection work can be conducted in only four of the large markets and the inspection of certain other commodities specified in the law, such as hay, cannot be handled at all. "Livestock supervision offices at Cleveland and Salt Lake City have been closed and the force of the Boston office. "The project to develop a home supply of camphor, which important product is now controlled by Japanese monopoly, will have to be reduced by 75 per cent. "Investigations of animal tuberculosis, anthrax and various other diseases, as well as studies of stock poisoning by plants, will be greatly reduced. "Forest insect field stations at Colorado Springs, Colo., and Ashland, Or., and the substitution at Chicago, Ill., will be abandoned and the work at the field laboratory at Los Gatos, Cal., seriously curtailed. "The assistance given the national park service, the forest service and owners of private woodlands in insect control will be reduced. "It will be necessary to abandon the field station at Greeley, Colo., devoted to experiments with sugar beet and potato insects. "Work on insects injurious to the health of man, such as yellow fever and malarial mosquitoes, and the housefly, must be reduced. "Other lines of activity which will have to be materially curtailed include investigations of the culture and improvement of forage crops, the soil survey work, studies of livestock production in sugar cane and cotton districts, work in the control of the potato wart disease, field experiments in the construction and maintenance of roads and of road materials and preparations, farm irrigation investigations and studies in farm drainage."

ASHLAND STATION TO CLOSE

STRAWBERRY SHOW SET

Festival to Be Held at Lebanon June 11 and 12.

LEBANON, Or., June 5.—(Special.)—The 12th annual strawberry show

and rose festival will be held here Friday and Saturday, June 11 and 12. The berries are just now coming into the local market from the strawberry fields of the Santiam and by the end of the week there will be plenty for the display. Committees have been appointed to look after every feature of the two days' celebration, with ex-Mayor Reeves as chairman of the executive committee. The strawberries are two weeks

later this year than ordinary, but there will be no lack of berries by the end of next week.

EX-REPORTER NAMED EDITOR

Ralph S. Reubin, former reporter for The Oregonian, has been appointed editor of the dress and waist department of Women's Wear, an important trade journal, according to advices received in Portland yesterday.

The Indianapolis 500-Mile Race

Gaston Chevrolet An American, driving an American-built Monroe special car, won the international motor sweepstakes, May 31, on Oldfield tires.

He is the first winner of this annual event to finish the entire 500 miles without a tire change. He drove at an average speed of 88.55 miles an hour.

Rene Thomas Europe's premier pilot, driving a French Ballot special car, finished second to Chevrolet. He also rode on Oldfield tires. His entire race was free from tire trouble.

He drove at a speed of 86.95 miles an hour, making precautionary tire changes at 282 miles while replenishing fuel.

Tommy Milton American, world's speed king, driving an American-built Duesenberg car, finished third on Oldfield tires.

Milton's race was also free from tire trouble.

He made one precautionary change at 270 miles during his mid-way stop for fuel, and finished with a record of 86.85 miles an hour.

Barney Oldfield Master driver of the world, built the tires used by Chevrolet, Thomas and Milton.

To the development of these tires Barney Oldfield had devoted twenty years of study and more than 500,000 miles of racing and touring.

In the Battle of the Tires over this historic brick testing ground, victory has been sought by many tire manufacturers.

This year Oldfield tires fought and vanquished the tires of four other competing companies.

One of these other tire manufacturers furnished tire equipment for ten cars, all of which either failed to finish or finished behind Chevrolet, Thomas and Milton.

PARENTS WILL OVER BABY

EX-GOB THRILLS TO TOUCH OF INFANT CHILD.

George Eckles Sees Wife Alight From Auto and Then Meets Opposition.

The entrance to the Central library was the scene of a scuffle last night between Mr. and Mrs. George Eckles, each of whom was trying to get possession of the baby during the late war. The baby was born while the father was absent in the service. Mrs. Eckles says she has brought the child to get along since his return. Mr. Eckles says that he had been unable to make arrangements to see his child during the last three months. Last night he saw his wife and her family getting out of an automobile at the library, and took the baby from her arms. Her brother prevented his escape until the policeman reached the scene.

Strong Nerves and Great Physical Energy That Help Men to Win Come From Rich, Red Blood

While Thin, Pale, Watery Blood Without Iron Robs Men of Their Strength and Self Confidence and Often Holds Them Back From Reaching the Goal of Health, Success and Power—Physician Explains Why He Prescribes

Nuxated Iron To Help Make Red Blood And Give Stamina, Power and Endurance—It Often Increases the Strength of Weak, Nervous, Run-Down People in Two Weeks' Time. There are thousands of men of 40 and 50 years of age who can look back to younger years when they seemed to be on the road to success yet who today are nervous wrecks, business failures and physical and mental weaklings, all through a lack of sufficient iron in their red blood corpuscles.

They have lost sight of the fact that a sound, strong body, brimming over with vital force and energy is the basis of all real achievement and as a result they are aging and breaking down at a time when they should be enjoying that perfect bodily health which craves defiance to disease and failure. Yet many who now have no self-confidence, lack initiative and imagine they suffer from all sorts of dread ailments undergo a remarkable transformation the moment they get plenty of the right kind of iron into their blood to give increased strength, energy and endurance. Their imagined ills are forgotten, they gain physically, poise and fitness, mental alertness and greater power to combat obstacles or withstand severe strains.

But to take the wrong form of iron may prove worse than useless, so that if you are weak, nervous, run-down, or if you lack self-reliance, you should consider it one of the foremost blood and nerve builders, the best to which I have ever had recourse." Dr. J. Van Horn, formerly Medical Inspector and Clinical Physician on the Board of Health of the City of New York says: "Strong, healthy men and women who go through life with a quiet, self-reliant and facile and their dynamic power and energy makes them virtually masters of their own destinies. It is surprising how many people who do not get along in life are in reality suffering from iron deficiency and do not know it. I advise every man of life, I strongly advise every man who is fagged out by

Lack of iron in the blood is the stumbling block that trips many a man at the crucial point in his career and leaves him a trembling, nervous weakling, lagging behind the strong, vigorous man who keeps his blood filled with health-giving, strength-building iron—the kind of man Nuxated Iron helps to make. stronger, healthier, better able to meet the physical demands of the problems of life. I believe that the problems of life are easily surmounted, and that the man who is strong and healthy is the man who is successful. The many satisfactory results of their will refund your money if it is dispensed in the city by the Owl Drug Co. and all other drug stores.—ADV.
