Only for ladies who end corns

Dainty shoes are only for those who end corns. The way is simple, quick and easy, and sure. Millions of people employ it. Apply Blue-jay, the liquid or the plaster. That touch will stop the pain. Then wait a little and the corn will loosen and come out. Then why does anybody suffer corns? Just because they don't know. They

pare corns and keep them. Or they pad them. Or they use a treatment harsh and ineffective. Blue-jay is scientific. This world-famed laboratory created it. Year after year, it is keeping millions entirely free from corns. Perhaps half the corns that start are now ended by it. Ask your druggist for Blue-jay. Learn tonight how much it means to you.

FURS AND MYSTERY

By N. M. Ungar.

Natural Fur Seal, and there is only one species, though found in various places, is a rare animal whose fur is of such quality and beauty that the monger supply cannot begin to fill the demand.

It is not surprising, therefore, that a variety of substitutes have been produced to serve in Nature's stead—some good, some bad, many quite indifferent.

Right here is where we do not want to get out of step—good substitutes, when sold honestly as such, are not by any means to be condemned, especially when the genuine article, because of its scarcity, is beyond the financial reach of many who would enjoy it.

It is the common practice of unreliable fur dealers, however, to mislead the public by a number of high-sounding so-called "Trade Names," that have no place in legitimate business. In this article and the series that will follow the writer shall turn the light of truth into many dark and mysterious corners.

"Hudson Seal," "Near Seal," "Electric Seal," "Baltic Seal," "French Seal" and other "species" are in the skin seal. Each is the skin of some other animal from which, like seal itself, the coarse hairs have been extracted by machinery. Skillful dyeing completes the imitation, which in some instances can scarcely be detected from the genuine.

Of all substitutes, the so-called "Hudson Seal" excels. In reality it is muskrat, which is a very good fur in itself and may creditably be sold as a fine seal imitation, provided it is sold as an imitation and NOT as a species of seal, presumably from the vicinity of Hudson Bay.

"French Seal" and "Baltic Seal" are disguising titles for seal-dyed coney, a small animal that is found in France. As a skin, coney does not hold up as high as muskrat, but it does not necessarily prevent its being used as an imitation of seal at its proper price level, provided again it is sold as seal-dyed coney and NOT as a foreign species of genuine seal.
