

# DARLING OFFERS TRENCHANT SLANTS ON POLITICAL HAPPENINGS.

HEY! NOW, DON'T WASTE ALL YOUR STRENGTH ON HIM!

HEAVEN HELP THE POOR SAILORS ON A NIGHT LIKE THIS.

FOR THOSE WHO WERE UNABLE TO HEAR THE NOMINATING SPEECHES A VERBATIM REPORT HAS BEEN PREPARED AS FOLLOWS:

## NEW YORK IS INTERESTED IN CHICAGO OPERA PLANS

Many Star Singers Already Engaged for Season That Will Be Opened November 17—Italian Revivals Are Scheduled.

NEW YORK, June 12.—(Special.) Announcement of the plans for the opening of the Chicago Opera association are of as much interest to the New York opera goers as to those of Chicago, because the plans for the next season of opera in New York by that organization with Herbert Johnson and Gino Marinuzzi are of the most elaborate. Mr. Johnson, the executive director, has announced that the tenth season of grand opera in Chicago will open on Wednesday night, November 17, and continue for ten weeks. Practically all the engagements for next year have been made. The list of sopranos includes Yvonne Gall, Amelia Galli-Curci, who will be in Chicago the entire month of December; Mary Garden, who is expected to return for the last three weeks of the season; Rosa Raisa, Florence Macbeth, Toto Dal Monte, a lyric soprano, and Irma Vignone, dramatic soprano whose contracts were made by Mr. Campanini, and Olga Carrara, Margery Maxwell, Maria Santillan complete the roster of sopranos. The mezzo-sopranos and contralto list is the strongest the company has yet had, including Gabriella Benazzoni, with the Metropolitan Opera last year, heard before that in Italy,

## SCIENTIFIC RULES FOR DIET OF CHILDREN FLOUTED BY NATURE

Temperamental Bernetta May Warnock, of Seattle, With "Best Bite" at Clinic, Lives on Pickles, Wienies and Dancing.

BUKLY volumes, compiled by scientists, filled with solemn rules for the guidance of parents, containing numerous precautions regarding the diet of the child as well as the regulation of its exercise, have been flouted by nature. Bernetta May Warnock, aged three years, and nine months, the most perfect child, examined at the child welfare clinic in the Bon Marche by the Seattle Federation of Women's Clubs, is not a product of a dietitian's routine. "If the doctor who examined Bernetta had known what she eats he would have been horrified," Mrs. Amy Warnock, the baby's mother, chuckled triumphantly. "She eats candy and pickles and anything else that she wants. She always has. It obviously hasn't hurt her, for she only registered 93 1/2 per cent when she was taken to the clinic for examination on her first birthday. I wonder what the doctor would have said if he had known that Bernetta's beautiful behavior at the clinic was the result of a promise that she might have a wienerswirl?" Bernetta Warnock not only has the measurements set by the children's bureau, department of labor, as the standard for a child of her years, but she owns the rare possession referred to by dentists as a "perfect

## ANCIENT FANS EXHIBITED

Spanish Cities Intensely Interested in Coming Exposition.

MADRID, June 12.—Spanish cities are intensely interested in an exposition of fans to be held here this month. More than 400 beautiful specimens showing the development of the art of fan making in the last three centuries have been entered in the exposition. Queen Victoria was among the first to offer her support for the exposition and to participate in it. Others of the royal house, including the queen mother, the infanta Isabel and Luisa, the dutchess of Talavera and nearly every titled woman in Spain followed her example.

## WOMEN OF NEWFOUNDLAND CAPTURE SEAL HERD

Men Go Far From Land While Seal Patch Comes Close In to Shore.

BAY OF EXPLOITS, N. F., June 12.—The women of Tilt Cove are the pride and the envy of the bay. In a season of failure in the sealing industry they have scored a catch and kill of size. Wives and daughters succeeded where the men of the bay had failed. They went in boats, armed with clubs and gaffs, and climbing onto the ice cakes, set out to round up a catch. They found the seals sprawled on all sides and, learned later that they had struck the main patch, the hope of all seal hunters. The women went about their work with vim, and had captured or killed 100 seals when exhaustion and ap-
