Remarkable Auto Jump Gives Thrill

Brigadier General George Barnett.

How Ingenuity Helps Blind Men "To See"

HARRY PIEL is a famous German movie actor. One of his recent feats was to drive a specially constructed motorcar for a leap across the destroyed span of a bridge.

American boy scouts received a royal reception in Paris on their recent European tour. Impressive ceremonies were arranged for the event in the French capital, in which France and America were represented by two young girls in costumes of national colors.

Brigadier-General George Barnett, returning to service after two months' leave of absence, has been assigned to duty as commandant of the department of the Pacific, United States marine corps, a new command for that corps, created by order of the navy department August 21. The stations embraced are the Bremerton, Mare Island, San Diego and that at Pearl Harbor, Hawaii. General Barnett will have on his staff Colonel Albert S. McLemore, assistant adjutant inspector; Colonel Hugh Matthews, assistant quartermaster, and Captain R. R. Wright, assistant paymaster.

Crowds on Fifth avenue, New York, do not dismay Frank Murphy, though he is blind and a daily pedestrian on the famous thoroughfare. He has had made a little two-wheeled device with a short handle, and by pushing this ahead is enabled to avoid obstacles and has no fear of colliding with other pedestrians or stumbling over obstructions or at the curb.

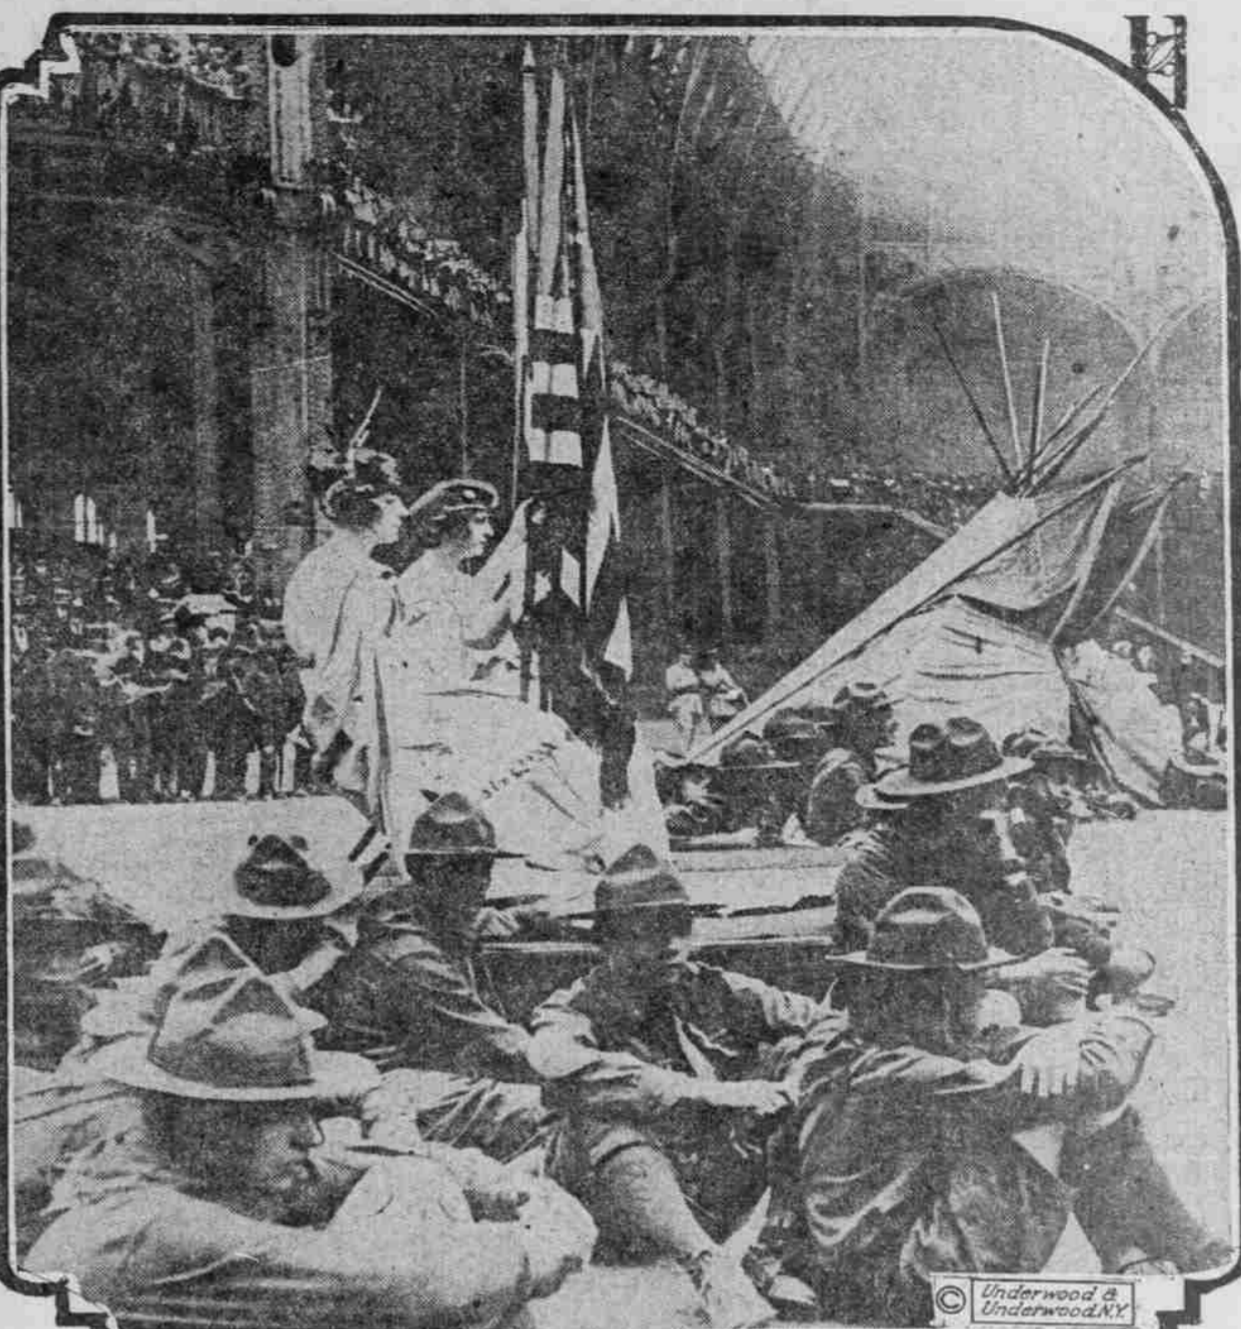

W. R. Grace, chief engineer of the General Goethals, was the hero of the rescue of the four officers and 36 men trapped in the hold of the United States submarine S-5. He used a hand drill to cut through the plates of the submarine to permit air to be pumped to the imprisoned men. Captain Swinson, commander of the General Goethals, and Engineer Grace were highly praised for their prompt effort and successful achievement in one of the most thrilling rescues in maritime history.

Flores LaDue has the honor of being the champion woman roper of the world, a title won in contests with the foremost masters of the lariat. She was recently caught by the camera on "Prince" at the famous T. & S. ranch at Longview, Alta.

Mrs. Horace Keane demonstrates that "The Ace" miniature plane is a practical utility, by going in it alone for an occasional spin at Mineola field. She is the wife of Horace Keane, inventor of the miniature airship, capable of 80 miles an hour with its 40-horse power motor and small enough that it recently made a landing in an Oakland street.

Lawrence McLeary was severely gassed while serving with the American troops overseas. It was found that his only chance for recovery lay in blood transfusion. In the Poly-cyclic hospital, New York, his aged father, James McLeary, volunteered and the blood was transferred from the veins of the sire to his son, who is now well on the road to recovery.

Passengers on the New York-New Orleans limited train were recently treated to a complete movie show en route, with a phonograph supplying the music incidental to the bill. This is an innovation on railroad trains but as yet has not been made a regular feature on any of the popular regular trains.
