CURIOSITY---the Great Teacher
CURIOSITY is the beginning of all knowledge. Do you know any subjects about which your child has not asked you a dozen questions? Let him ask as many as he likes, and be sure to answer them correctly. That is the parent's most important and most easily neglected duty. If you discourage your child's curiosity you will injure his mind, and the bright boy or girl becomes stupid or indifferent. *Through curiosity Columbus discovered America.* THE BOOK OF KNOWLEDGE is the simplest and most natural method of helping the child to educate himself. IT ANSWERS EVERY QUESTION A CHILD CAN ASK IN PLAIN AND SIMPLE LANGUAGE. So captivating is this great original work to the mind of a child that he absorbs with little effort the profound truths and great facts of the world of knowledge, while reading its delightful pages and looking at the thousands of striking educational pictures.

YOUR CHILD IS UNIQUE
Your child is like no other child in the world. He has his own peculiar tastes and need for both physical and mental food. If you put a meal before him and let him choose what agrees with him best, he will thrive. THE BOOK OF KNOWLEDGE is the right kind of nourishing food for the child's mind during the growing years. Give your child this remarkable, original work, and watch carefully which of the 16 Great Departments interests him most, Nature, Science, History, Biography, Astronomy, Physiology, Art, Literature, Poetry, or Manual Training. It will prove THE KEY to his natural bent, and the kind of work or profession in which he will most easily succeed.
