MORRISON STREET AT FOURTH

BRIDGE BONDS UNPAID

CITY STILL PAYS INTEREST ON FIRST MORRISON STRUCTURE.

In Four Years More the Total Amount of \$200,000 Will Be Due; Second Cost \$400,000.

Seventeen years ago the old Morrison-street bridge passed out of existence.

The city of Portland is still paying interest on the bonds issued in 1885 to purchase the structure from its private owners.

On April 1, 1923, the city will have to pay that sum to redeem the bonds.

For more than 25 years the taxpayers of Portland have been paying \$10,000 annually, for interest on the bonds.

On May 1, 1921, 6 per cent bonds of the face value of \$50,000 will be redeemed by the city.

On May 1, 1921, 6 per cent bonds of the face value of \$50,000 will be redeemed by the city.

ARCTIC INVASION PLANNED

SCHOONER FOR TRIP ALMOST IS COMPLETED.

Dr. Donald B. MacMillan Prepares to Attempt to Steam Around Baffin Land in North.

EAST BOOTH BAY, Me., Feb. 12.—Work is almost completed on the hull of the Bowdoin, in which Dr. Douglas B. MacMillan, explorer, will make his next dash into the Arctic regions.

The launching of the schooner will take place in the early spring, and the vessel will be in shape to depart from this port by May 1.

Dr. MacMillan is perfecting plans for an expedition, to begin next summer, which will include an attempt to circumnavigate Baffin land and penetrate its western coast, 1000 miles in length, said to be the longest stretch of unknown coast line in the world.

He is a frequent visitor here and keeps careful watch over the construction of his ship.

The Bowdoin, which is being built on the sturdy lines needed in an exploration vessel to withstand the ice grind, is of the knockabout fishing schooner type. It will be 88 feet in length over all, 20 feet wide and equipped with 45 horsepower oil burning engines. Three-inch oak plank material is being used for the hull.

Before his departure for the far north Dr. MacMillan will make an exhibition cruise along the coast during May and June. About July 1, with a party of six men, the explorer will sail from Boston for the polar regions.

Under favorable weather conditions the Bowdoin should reach Fury and Hecla strait early in September. There the ship will be frozen in.

Leaving their vessel under a tons guard, the party will push forward on a 200-mile trip on sleds drawn by dogs. Five Eskimo dog drivers will

accompany the MacMillan outfit across the rugged, ice-bound country, which abounds in perils. Establishing of a camp 700 miles south of Etah in the northwestern part of Greenland is one of the main objectives.

Within the last 12 years Dr. MacMillan has made six trips into the land of the midnight sun. Most famous of these was his expedition by which he disproved the theory that a Croker land existed in the extreme north. At that time he discovered nine new islands.

On his visits here Dr. MacMillan chats freely about his plans and several hardy mariners have begged to be allowed to accompany him. The townspeople are preparing to present a flag to fly from the fore peak of the Bowdoin.

Plans for expansion at Pearl Harbor now under way.

HONOLULU, T. H., Feb. 12.—(Correspondence of the Associated Press.)—Pearl Harbor, the United States naval base in Hawaii, is to be made capable of supplying and taking care of the entire Pacific fleet, according to the announcement of Rear-Admiral W. B. Shoemaker, who has just arrived to take command there.

Admiral Shoemaker succeeds Rear-Admiral W. B. Fletcher, who was transferred to the American naval commission in Rio Janeiro.

Plans for expansion at Pearl Harbor now are under way, said Rear-Admiral Shoemaker, who added: "These plans should not be interpreted to give the impression that the United States expects trouble, but they are to be understood as routine development, looking toward greater efficiency and to fulfill the original purposes of the station here. Very soon part of the Pacific fleet will be based on Hawaii."

Apple Tree Planted by Bryan.

GREENSBORO, Ga., Feb. 12.—Georgia believes it has probably the largest apple tree in the United States. It measures eight feet in circumference at its base, is very tall and has a spread of limbs measuring 48 feet. W. J. Bryan, who soon will celebrate his 80th birthday, planted the tree 22 years ago in Greene county, and it is still bearing a crop of luscious apples annually.

Masonic Lodge to Build.

WOODLAND, Wash., Feb. 12.—(Special.)—The Masonic lodge at Woodland plans to erect a two-story concrete building to cost about \$30,000. The Woodland State bank and the Men's club will be located in the new building.

Vancouver Man to Build Creamery.

GULER, Wash., Feb. 12.—(Special.)—H. J. Boltz of Vancouver, Wash., has received a contract for the erection of a reinforced concrete creamery building at White Salmon, Wash., costing \$3115. A large number of Trout lake farmers are shareholders in this enterprise and the cream is hauled from here twice a week.

Town Hall to Be Built.

WOODLAND, Wash., Feb. 12.—(Special.)—Following a meeting of business men, a committee of three will take up the problem of building a town hall with the council. Architects' plans call for quarters for the fire department, police department, a reading room and a council chamber.

School Bonds Discussed.

WOODLAND, Wash., Feb. 12.—(Special.)—The Business Men's club met at the home of Wesley Smith, superintendent of schools, Thursday night and discussed the advisability of calling a special election to vote on bonds for a new fireproof high school.

Premiums for County Fair Out.

WOODLAND, Wash., Feb. 12.—(Special.)—Miss Kelly, club leader for Cowlitz county, has issued a list of premiums and prizes to be awarded school children of Cowlitz county at the fair to be held at Woodland. It includes over 100 classes and some well worth-while cash prizes are on the list.
