WHITE-SEVEN PIECES.

White to mate in three moves.

W. J. Lachner, Baker, Or

BT SHEBA CHILDS HARGREAVES, 1 ed varieties and the Crimean hybrids. THE iris has been steadily gaining. The apogons are the Siberian and T in favor with flower lovers dur-ing the last few years. We have now enthusiasts who grow little else row as the Germanica.

now enthusiants who grow little else in their flower gardens, in fact, it is possible to become so infauated with this elusive, tantalizing bloom that all other flowers lose their charm. The goddess Iris, in Greek mythology the rainbow; she was the daughter of the the the the the trainage must be and the the the the trainage must be and the the the trainage must be the rainbow; she was the daughter of the the the the trainage must be and the the the trainage must be and the the the trainage must be and the the trainage must be the trainage must be and the the trainage must be the trainage must be and the trainage must be the trainage must be and the trainage must be the trainage must be the trainage must be and the trainage must be the trainage must be the trainage must be and the trainage must be the trainag the rainbow; she was the daughter of good. The thick roots will be very Electra and the granddaughter of apt to rot if water stands on them Oceanus, and so her flower carries in during the rainy season. The gardener its petals the tints of sky and ocean. It has the changing, irradiant luster sweet—the application of lime will help if there is a suggestion of sour-

It has the changing, irradiant luster It has the changing, irradiant luster of the peacock, the bird of Iris, a shimmering ecstacy of color, which is to be found in no other flower. The flower is difficult to describe, while the characteristic tint is blue, there are odd combinations of blue, there are odd combinations of madder brown, yellow and varying tints of lilac and purple. The color combinations at first giance are start: the product of the peacock, the bird of Iris, a shimmering ecstacy of flower. The flower is difficult to describe, while the characteristic tint is blue, there are odd combinations of madder brown, yellow and varying tints of lilac and purple. The color combinations at first giance are start: the product of the peacock, the base peacock, the base peacock, the the peacock, the help if there is a suggestion of sour-ness. Poor, rocky soil answers very flower is however, easily spolled by bad arrangement: overcrowding in a mass of color which is not pleasing. Wide bowls with heavy glass frogs in the bottom for the spikes apart are very eff-fective. for the beauty is of line as well as color. The Japanese fashion of arranging a single flower with are more or less aquatic in habit. Thereare Baking Needed. Thereare Baking Needed.

become right and natural. If the iris were difficult to grow it would take. It is easy for anyone to start grow-ing iris-they are not expensive, that the iris needs a thorough baking in is unless rare new varieties are to be

tive iris. Germany has no native va-riety, but she runs true to form here

ed species from different countries and given them to the world as Ger-man iris. It is estimated that the gocalled German iris occupies about ninetenths of the garden space given over to growing of iris. The fleur-de-lis, the national flower of France, is the Spain to Asia. The Siberian species

## well in gardens if given plenty of water

are supposed by most people to be aquatic plants, but they will thrive

The Japanese people make much of the iris. They use its fleshy matted roots for strengthening the thatches of their houses. One type which we know as the Suzanne is the Japanese flower of mourning; it could not be called beautiful—it fairly drips gloom from its dark mottled petals, but it is most striking and interesting. Sor varieties almost as expensive as the orchids come from Persia and the dry cliffs of Lebanon, but they are not for the amateur-they are very difficult

tendency to die out in the center, leav-ing a ring of spears on the outer edge of the clump. One plant may be di-vided so as to give from three to eight good strong plants. This root division is best done after the bloom-ing season is over and the roots have had time to cure well in the sun; this would mean any time from July to September, according to variety. Root had time to cure well in the sun; this would mean any time from July to September, according to variety. Root know the old saying. 'More haste, less speed,' holds good here as well as anywhere else. It never pays to hurry division may be made even while the plants are in bloom with no ill effects, though of course this spoils the looks of the borders. In dividing just break with your work, and you won't have to if you plan your sewing as you would your budget — underclothes after the Christmas rush, then spring off a portion of the root with a leaf spear attached and after cutting back the leaves to within three or four and summer sewing that will keep, vacation sewing long before June inches of the root, set it in place. It is possible to grow iris from seed, but and so on.

It requires two or three years to bring the plants to blooming strength, so few people would consider it worth "Some women never think of a bathing suit until the third of July Rushing just to get a disagreeable task done is bad, too. Take the dis-agreeable things early in the day, or leave them until you are rested in the evening. Don't try to do the The fris is particularly pleasing as a cut flower. It holds up well in water, if cut as the first bud is about to open and kept in a cool place out of drafts the colors will be much richer than when it expands in the open. The stalk will last a long time, touchy part of the work, the planning and cutting and figuring out while anyone is around. Hang a busy sign on your door then. But when it comes to the humdrum stuff like finopen. The stalk will last a long time, for as fast as one bloom fades it is replaced by the next in order. The flower is, however, easily spoiled by

ing chinks in the budget, going over old quarrels, or imagining new ones, as so many of us do when our hands

After the blooming season is over it is eight of active the volume of the season is over it is eight of active the volume of the season is over it is eight of active the volume of the season is over it is eight of active the volume of the season is over it is eight of active the volume of the season is over it is unless rare new varieties are to be and our minds idle, to plan at the volume of the season is over it is unless rare new varieties are to be and our minds idle, to plan at the volume of the season is over it is unless rare new varieties are to be and our minds idle, to plan at the volume of the season is over it is unless and the volume of the season is over it is estimated that the sease sort of thing the volume is to the desires and his is is will take of the mache season. And the do is one for the season is over the origin of the season is over the origin the season is over it is estimated that the of the season is over the season. And by the way, and so on. Reminiscing is always be asserted to be made and the origin of the season is over the season is the season is over the season

GENEVA, May 21 .- Papering the walls with Austrian bank notes proved such a good advertisement for a St. Gall restaurant that other in-

keepers have taken up the idea. They have found that the cost is little more than that of good wall paper.

A Geneva firm recently began planing Austrian notes of from 10 to 1000 crowns on each woman's garment sold, according to the amount of the purchase.

### Turpentine Loan Made.

VANCOUVER, B. C .-- Twenty-five thousand dollars has been loaned to the Douglas Fir Turpentine company by the provincial government as an aid to establishment. The company, which will engage in the extraction of turpentine from the Douglas fir. has a plant in operation on False creek, and has completed extensive and successful experiments in tapping the trees.
