PRESIDENT TAYLOR DRAWS LARGE ATTENDANCE FOR CHICAGO CONVENTION.

Large Attendance Is Urged for Chicago Convention.

DUTIES ARE POINTED OUT

Every Good Dealer Is Expected to Be Present at Great and Important Sessions.

In a message appearing in the special convention number of the National Real Estate Journal, Chicago, published last week, Fred E. Taylor of Portland, president of the national association of real estate boards, calls on the realtors of the United States and Canada to bend every possible effort to attend the great convention to be held in Chicago, beginning July 12.

Before enumerating many reasons why every good dealer should be present at the meeting, Mr. Taylor mentions the kindly sentiment all members of his profession hold for Chicago, which he styles as the "original shrine of realtors," where the association saw its beginning 13 years ago.

The infant organization of 1908, says Mr. Taylor, "grew into motion by 12 delegates representing 13 states and 20 cities, has now grown to be a veritable giant and, with a thrill of pride over an unparalleled progress and over the prospect of even greater achievements in the future, an army of over 15,000 members of the association are going back to the birthplace of their association to represent more than 15,000 active members of between 20 and 400 realty boards that reach out over nearly every state in the union and over several provinces of our neighboring country on the north.

Chicago Center of Movement. "Because of this sentimental appeal and because our national headquarters are located in the very center of our national business activities, it is altogether fitting and proper that this subject be given a convention over held in the history of our organization, should convene in Chicago.

If you are to be a good realtor and a good citizen it is incumbent upon you to become posted thoroughly on the current conditions of your business, so that you may be enabled to talk effectively and intelligently to your subscribers and to your discussion in business or social groups.

"As you have already been told, a splendid programme of business and entertainment features has been outlined for the convention. The alert and hospitable realtors of Chicago have raised more than \$75,000 to finance the programme. There will be speakers of world-wide prominence and distinction.

Work Will Be Practical. "The business sessions and conferences will be so thoroughly practical and instructive that no active realtor can afford, even from a business standpoint, to miss them. Each department and important phase of the real estate business will be analyzed carefully and intensively at a special conference to be presided over by the president of the association, according to P. A. Baillargeon of Seattle, Wash., the builder.

The new building will be of reinforced skeleton type with concrete beams and columns, brick and tile partitions and walls. It will be thoroughly fireproof and sanitary. The exterior is to be finished with brick and terra cotta in a pleasing design.

There will be accommodations for 100 patients, the building being constructed with private rooms instead of the customary wards. All the requisites of a modern hospital are to be installed, including laundry and sterilizing equipment, blanket warmers, high pressure steam system for cooking and operating requirements, passenger and service elevators, nurses' silent call system, storage battery auxiliary for emergency electric service, special ventilating system for operating rooms, adequate fire escapes, complete X-ray installation, pathological and biological laboratories and alternating high and low pressure boilers for summer or winter service.

The government of Liberia sent the chamber of the house of representatives in Monrovia for a two-weekly motion picture show. The admission price is 30 cents, and the president of the republic has his own reserved seat.

RESIDENCES ERECTED IN PENINSULA DISTRICT SIGNIFICANT OF BUILDING ACTIVITY.

Above—New home of Addison P. Knapp, erected on Willamette boulevard at Wall street, at cost of \$7000. Below—Residence of W. B. McMillan, general superintendent Peninsula Lumber company, erected on Willamette boulevard at McKeen avenue, at a cost of \$10,000.

These two new residences erected on Willamette boulevard are significant of the rapid development of that district, where a large number of new homes are being put up. Both residences have a beautiful view of the river and are modernly arranged and equipped throughout. The residence of Mr. Knapp is of the old colonial design.

AUTO DEALERS TO MEET

IMPORTANT TRADE CONGRESS WILL BE HELD HERE.

Portland, State and National Associations Sponsor Big Business Convention.

A trade congress devoted to prevalent business policies and tendencies insofar as they affect the automobile industry of Oregon, will mark the Portland fair week.

National and state legislation affecting motor cars and trucks will receive much attention, but greatest stress will be laid upon those factors in automobile merchandising which are part of the problem of each dealer.

The meeting has been deemed of sufficient importance to the industry to bring P. Drury of Washington, assistant general manager of the National Automobile Dealers' association, to Portland for the occasion.

Other guests invited are Lieutenant Governor Coyne of Washington, who presides over the details of Washington Automobile Dealers' association; Harry D. Austin of Seattle, director in the National Dealers' association; Robert W. Martland of Oakland, Cal., secretary of the California Auto Trades association; Homer E. McMillan, president of the Oregon Automobile Dealers' association; and Secretary of State Keizer and Mayor Baker.

The conference will be started off with a luncheon meeting, followed by business meetings of the several organizations and a joint session of the three organizations, presided over by A. H. Brown, Oregon vice-president of the National Automobile Dealers' association. Drury's message will be read to all three organizations and will be presented at the joint meeting.

A. H. Brown, James H. Casell, secretary of state association, and Ralph J. Steahli, secretary of Portland association, are in charge of the arrangements.

Queen's Home Purchased. HONOLULU, T. H.—Washington place, home of the poetess queen, Liliuokalani, last reigning monarch of Hawaii, recently became the property of the territorial government by whom it was bought from the trustees of the late queen's estate.

Washington place is his official residence during his term of office, and it is expected it will continue to be used for that purpose by him and his successors.

Airplane Aids Steel Planning. HONOLULU, T. H.—Plotting street straightening and extension by means of airplane photographs is one of the latest exploits of the engineer's department of the city and county of Honolulu. The photograph were taken by army fliers and have been turned over to the city under authorization from Major-General C. G. Morison, commanding the Hawaiian department.
