Growers Hope Effect on Market Will Be Bullish.

YIELD IN 1921 TOO LARGE

Dry Weather Likely to Cut Down Production in Northwest; No Demand From Any Source.

According to the government report, the hop acreage in Washington is 3000

for the new crop \$1 net was again bid. At the Merchants' exchange all grades

were the same on bid as Friday, The daily Chicago wire to the Gray-Rosenbaum Grain company follows: "European crop conditions equal to last year, Weather southwest and northwest favorable. Larger country offer-ings expected next week. Spring wheat likely to pass safety point next week. eliminating black rust danger. Railroad strike remaining unsettling feature. Can-not see any material advance wheat,

pect to start threshing middle of next week if no more rain." Terminal receipts, in cars, were re-

ported by the Merchants' Exchange as

HAY—Buying price, f. c. b. Portland: Alfalfa, \$16@16.50 per ton; cheat, \$16; oats and vetch, \$17; dover, \$15; valley timothy, \$18; castern Oregon timothy.

Hop growers and dealers are hoping that the prospect for a shorter crop in the northwest will stimulate the market, but up to this time it has had no effect whatever on the demand which continues stagnant.

No accurate estimate can be made yet of the Oregon crop. Last year it was about 55,000 bales. The acreage remains the same, around 11,000, but the dry weather has been against the chances of a yield equalling last year's. Unless rain comes before the hops begin to bloom the crop is bound to be cut down materially. Some hop men are talking of a 30,000-bale crop, but this is purely a guess.

Butter and Country Produce.

BUTTER—Cubes, extra, 38c per ib.: prints, parciment wrapped, bex 16ts, 48c; carons, 47c. Butterfail, 48c,47c delivered station; buying price, current receipts, 21c dezen; below cannot, 22c, selects, 23c, 24c dezen; job-bing prices, case count, 22@23c; candled ranch, 27c; selects, 29c. VEALE—Fancy, 13½ @14c per pound. Butter and Country Produce.

Fruits and Vegetables.

According to the government report, the hop acreage in Washington is 3000 screes, or practically the same as last year. Averaging 94 per cent of normal on July 1, the crop is expected to amount to 4.512,000 pounds against 5.100,000 pounds in 1921, Hop yards in the Yakima valley are reported to be in very good condition but the yards in western Washington are in need of rain.

The California outlook is for a yield about the same as in 1921. If all the coast states grow as many hops as last year there will not be much hope for the market. There was everproduction in 1921 and the output will have to be much smaller this year to equalize conditions.

England and the continent have had a drouth which would naturally have the effect of shortening the hop crop, but the foreign dealers are waiting for the hope to bloom before giving out any estimates.

There has been very little trading in

to bloom before giving out any estimates.

There has been very little trading in the local market in recent weeks. Nominal prices on spot hops range from 12 to 15 cents. No new crop contracts have been reported for over a month. The last business was around the 15-cent mark.

EASIER OFFERS FOR SPOT WHEAT Volume of Trading Limited at Close of Week.

Wheat trading was limited at the close of the week. Buyers were a little caster on spot wheat, offering \$1.16, but for the new crop \$1 net was again bid.

PORTLAND MARKET QUOTATIONS CHICAGO WHEAT MARKET IS FIRMER AT CLOSE.

> Higher Temperatures May Cause Rust in Spring Grain.

CHICAGO, July 15.—Short covering toward the finish caused a little rally in wheat today. In fact the market displayed a firm undertone for the greater part of the short session. At the finish wheat was unchanged to the higher, with September \$1.14\% \tilde{3}.14\%, and December \$1.16\% \tilde{2}.12\% \tilde{3}.14\%, and December \$1.16\% \tilde{3}.16\%, up and provisions \$7\% \tilde{9}.22\% \tilde{6}.

Apprehension of a rapid development of black rust in the spring wheat territory, as the result of higher temperature, and buying by commission houses were largely responsible for a higher average for wheat. Strength of the market at Liverpool also was reflected here, while the government report that chinch bugs in Missouri are causing mora damage to wheat at this time than at any time within 25 years, was another strengthening factor.

Hedging pressure increased and with the resumption of threshing in the southwest, the trade is anticipating a material enlargement in the movement the latter part of the month.

Corn and oats held within narrow immits with corn showing a firm undertone, chiefly because of scattered buying by cash houses, presumably against further sales to the seaboard for export. Oats were dull and the trade chiefly of a local character.

Provisions were dull and somewhat easier under scattered selling, which more than offset the strength in hogs and the firmness in exchange.

The Chicago grain letter received yesterday by the Overbeck & Cooke company of Portiand follows:

Wheat—Trade was exceedingly quiet, confined almost entirely to evening up of contracts over the week end. A feeling of indecision was prevalent with interest centered on the northwestern crop situation, where spring wheat is just passing through its critical period. The reports today were less encouraging than they have been recently, our crop expert reported black rust in the vicinity of Fargo, N. D., and another reliable authority wired from Bradley, S. D., that small grains are deteriorating in central south Dakota and western Minnesota, due to hot, dry weather. Advices from the southwest told of threshing and poor quality as a result of excessive rains since wheat was shocked. Country offerings to arrive increased slightly, but were not heavy. The cash market here as well as at interior points was quoted relatively firm. The rail strike situation remains unchanged and much concern is being felt as to shipments. Any news over Sunday suggesting black rust in the northwest, or deterioration from other causes will probably furnish the motive for an upward movement in prices.

Corn and outs—Trade in coarse grains

the causes will probably furnish the causes and process of the causes of

EASTERN WASHINGTON PROSPECTS

Sections.

Crop reports received by the traffic department of the Spokane, Portland & Seattle railway follow.

Spokane—The wheat situation looked somewhat better on the 10th, on account of slight rain on the 7th, and cool weather since. The moisture, however, is not sufficient to justify any change in estimates of the crop in the Palouse country. Best reports obtainable from that section generally indicate about 65 per cent of normal crop, with half a normal crop in Adams county, practically half a crop in Lincoln county. Franklin county seems to be in a little better shape. In the LaCrosse district of Whitman county, a 20-bushel per acre crop of wheat and hay is expected.

Goldendale, Wash.—Farmers are getting ready for harvest A 50 per cent crop of wheat and hay is expected.

Washtuena, Wash.—Farmers are getting ready for harvest A 50 per cent crop of wheat and hay is expected.

Washtuena, Wash.—Farmers are getting ready for harvest A 50 per cent crop of wheat and hay is expected.

Washtuena, Wash.—Hot winds have damaged late grains to some extent. The average yield now estimated will be 12 leads to the process of the county of the county and half a county as 20-bushel per acre crop of wheat and hay is expected.

Washtuena, Wash.—Hot winds have damaged late grains to some extent. The average yield now estimated will be 12 leads to the process of the county and the county as the Sections.

To Europe~

Full-Cabin Passage on Swift New U.S. Government Ships

NOW you can get passage to Europe from New York, if you have decided to go, for only \$120 on luxurious new ships owned by your Government and operated to Queenstown, Plymouth and London by the United States Lines. The passage to Cherbourg is only \$125.

The ships are the President Monroe, President Adams, President Van Buren, President Polk, and President Garfield.

They are unusual ships in all respects. Every modern device of the ship-builders' art has been lavished on them. They are at once unusually safe, fast and luxurious. Third class passage is \$85.

Write today for full information.
