UNIVERSITY OF OREGON, Eugene, July 22.--"Colored hearing." : most interesting mental phenome-non, is the subject of an article in the latest number of the Psycho-Ine fatest number of the Psycho-logical Review written by Thomas D. ## Phenomenon Well Developed.

Colored hearing is a common form of what is known to psychologists as synaesthesia. Mr. Cutsforth has this peculiarity in a marked degree. numbers especially is it notice-

### Imagery Highly Developed.

This is known as synaesthetic magery and comes into play in all dr. Cutaforth's mental processes. They are a part of his self-imposed asks. Sometimes they are conscious and deliberate and sometimes they are implied. These images are invariably accompanied by eye movenents or other incipient muscular rocesses

These facts, which Dr. Wheeler and Mr. Cutsforth have been able to work out together, throw consider-able light upon the nature and func-

Many Persons Have Gift.

Many persons have these colored hearing processes, but fail to res-ognize them. In it lies the development of the meaning. When per-

The National Convention of the Veterans of Foreign Wars will be held in Seattle. We are receiving communications from all parts of the United States to the effect, that thousands of delegates to this National Convention will stop over in Portland to see our city and highway. We want to entertain them right.

We have, therefore, arranged a picnic and entertainment to raise funds for the above purposes, July 29, at Crystal Lake Park. It's a hummer from start to finish. We want the citizens of Portland to help us put this across.

We have established headquarters at 1027 Chamber of Commerce building, telephone Broadway 4909.
