SPILT AT HEARINGGreat Northern Quits Camp
of Northern Pacific.

MOVE TOTAL SURPRISE

Tactics of Line Changed Over-
night at Interstate Com-
merce Session.

THE OREGONIAN NEWS BUREAU, Washington, D. C., Nov. 18.—A rift in the ranks of the Great Northern and Northern Pacific railroad forces opposing before the interstate commerce commission the consolidation of the tentative plan of consolidating northwestern railroads came as the sensation of the final hours of the hearing this afternoon.

Howard Elliott, president of the board of directors of the Northern Pacific, had completed a long statement in line with all the testimony previously given by the Great Northern and the Chicago, Burlington & Quincy, contending that it was impracticable to make any consolidation in the northwest which did not include the Great Northern, Northern Pacific and Burlington in a single system.

As Mr. Elliott concluded his statement, Walter D. Hines, attorney for the Great Northern, who yesterday morning made the opening statement in favor of the proposed consolidation of the Great Northern, Northern Pacific and Burlington in one system, with smaller lines controlled by them, arose and revealed the changed tactics of the Great Northern, which it appears, had been agreed upon overnight.

Position Is Stated.
Mr. Hines said that while the Great Northern believed that there should be no change in the present relations of the Great Northern and the Burlington, the Great Northern would contend that if there was to be any separation of the so-called Hill lines the Great Northern should not be cut off from the Burlington.

Northern Pacific officials, including President Woodworth, and Vice-President Woodworth, and other officials, and the group of interested railroad officials and lawyers as the meaning of the sudden and unexpected development sank home in their minds.

Mr. Hines' announcement, it soon appeared, was in preparation for the statement of President Budd of the Great Northern, which was to follow immediately, pointing out a multiplicity of reasons why the Northern Pacific or Great Northern should be taken out of the present combination, the Northern Pacific should be separated from the Burlington.

Under the commission's tentative consolidation plan prepared by Professor William Z. Ripley, the Great Northern would be placed in a group with the Chicago, Milwaukee & St. Paul, on the very apparent theory that the St. Paul is a weak line and that by a separation of the Great Northern a strong system would thus be built up.

President Budd declared that to put the Great Northern with the Chicago, Milwaukee & St. Paul would merely accentuate the weakness of both roads. He pointed out that the Great Northern has three points of contact with the Burlington, at the Twin Cities, Sioux City and Billings, the Northern Pacific two, Twin Cities and Billings.

His entire argument was directed to showing why a more logical combination would be to place the Northern Pacific in a system with the St. Paul. To separate the Great Northern and Burlington, he said, would require a duplication of the extensive freight facilities at St. Paul now used by the Burlington.

Because the commission's plan would make the Great Northern and Burlington competitors, and it had never been found desirable for competing lines to use the same trackage or other facilities.

Great Northern to Lose.
The Great Northern, by the commission's tentative proposal, he pointed out, would lose its connection with the Burlington at Sioux City, and would suffer far heavier loss at every other point of contact with that road than would the Northern Pacific in any separation plan. Figures were given to show that the exchange of traffic between the Burlington and Great Northern is much heavier at the Twin Cities than between the Burlington and the Northern Pacific, and that at Billings, where the Northern Pacific up to the end of 1920 had by far the better of the interchange, the Great Northern has far outstripped it in the last year.

Mr. Budd asserted that, with reference to the situation at the Twin Cities it would be unwise to put the Great Northern and the Milwaukee in the same group, because the result of that would be to put that group in possession of all the passenger facilities at Minneapolis, between St. Paul and Minneapolis.

Mr. Budd also said that, from the standpoint of handling potato and grain crops, the Great Northern and Milwaukee would be a particularly unsatisfactory combination, and much more unsatisfactory than a combination of the Milwaukee and the Northern Pacific, because the Great Northern and the Milwaukee have much larger crops of this character than the Northern Pacific, and in view of the difficulties of handling such crops with satisfaction to the producers at the time of the peak load in the fall, it would be particularly unfortunate to exaggerate that peak load by putting together the two lines which had the greatest amount to handle.

Car Facilities Factor.
The necessity for furnishing cars for these crops at the time they must move being so great, the general effect of combining the Great Northern and the Milwaukee would be to exaggerate the car shortage for their freight, such as lumber as well, because the grain and potatoes would have to be given preference. He argued that the Great Northern and Milwaukee would be a particularly poor combination because they have both lines with a very large amount of mileage in the east and a small amount of mileage in the west, so that neither system by itself was well balanced.

He showed, on the other hand, that the Northern Pacific had its principal mileage in the west. As a further illustration of the much greater western development of the Northern Pacific than the Great Northern, he showed that in the last six years the Northern Pacific had originated west of Montana more than 54,000,000 tons of traffic while the Great Northern in that period had originated less than 18,000,000 tons.

Mr. Budd quoted from Professor Ripley's report to the effect that there would be a great economy from the joint operation of the Northern Pacific and Milwaukee,

EINSTEIN EXPECTS
PROOF OF THEORYStudy of Solar Eclipse to
Furnish Data.

SCIENTIST IS IN JAPAN

Residents of Kobe Give Rousing
Reception to Physicist on
His Arrival.

KOBE, Japan, Nov. 18.—(By the Associated Press.)—Professor Albert Einstein, sponsor for the theory of relativity and proponent of the doctrine that rays of light bend to the attraction of the great heavenly bodies they passed, declared today on his arrival from Thursday island that he believed observations of the September solar eclipse would prove his conclusions correct.

Professor Einstein said he understood that the scientific expedition to Australia to take photographs during the solar eclipse had been successful, and he believed these photographs would vindicate his theory.

He declared that the expedition to Thursday island, composed of German scientists, had met with complete failure, as the sky during the eclipse was overcast and the making of photographs impossible.

Professor Einstein was given a tremendous welcome here, where the keenest interest is displayed in his theory. He intends to return to Europe via Palestine and will not visit the United States.

Merger Is Opposed.
"My own views," said Mr. Elliott, "are in preparation for the statement of President Budd of the Great Northern, which was to follow immediately, pointing out a multiplicity of reasons why the Northern Pacific or Great Northern should be taken out of the present combination, the Northern Pacific should be separated from the Burlington."

Under the commission's tentative consolidation plan prepared by Professor William Z. Ripley, the Great Northern would be placed in a group with the Chicago, Milwaukee & St. Paul, on the very apparent theory that the St. Paul is a weak line and that by a separation of the Great Northern a strong system would thus be built up.

President Budd declared that to put the Great Northern with the Chicago, Milwaukee & St. Paul would merely accentuate the weakness of both roads. He pointed out that the Great Northern has three points of contact with the Burlington, at the Twin Cities, Sioux City and Billings, the Northern Pacific two, Twin Cities and Billings.

His entire argument was directed to showing why a more logical combination would be to place the Northern Pacific in a system with the St. Paul. To separate the Great Northern and Burlington, he said, would require a duplication of the extensive freight facilities at St. Paul now used by the Burlington.

Because the commission's plan would make the Great Northern and Burlington competitors, and it had never been found desirable for competing lines to use the same trackage or other facilities.

Great Northern to Lose.
The Great Northern, by the commission's tentative proposal, he pointed out, would lose its connection with the Burlington at Sioux City, and would suffer far heavier loss at every other point of contact with that road than would the Northern Pacific in any separation plan. Figures were given to show that the exchange of traffic between the Burlington and Great Northern is much heavier at the Twin Cities than between the Burlington and the Northern Pacific, and that at Billings, where the Northern Pacific up to the end of 1920 had by far the better of the interchange, the Great Northern has far outstripped it in the last year.

Mr. Budd asserted that, with reference to the situation at the Twin Cities it would be unwise to put the Great Northern and the Milwaukee in the same group, because the result of that would be to put that group in possession of all the passenger facilities at Minneapolis, between St. Paul and Minneapolis.

Mr. Budd also said that, from the standpoint of handling potato and grain crops, the Great Northern and Milwaukee would be a particularly unsatisfactory combination, and much more unsatisfactory than a combination of the Milwaukee and the Northern Pacific, because the Great Northern and the Milwaukee have much larger crops of this character than the Northern Pacific, and in view of the difficulties of handling such crops with satisfaction to the producers at the time of the peak load in the fall, it would be particularly unfortunate to exaggerate that peak load by putting together the two lines which had the greatest amount to handle.

Car Facilities Factor.
The necessity for furnishing cars for these crops at the time they must move being so great, the general effect of combining the Great Northern and the Milwaukee would be to exaggerate the car shortage for their freight, such as lumber as well, because the grain and potatoes would have to be given preference. He argued that the Great Northern and Milwaukee would be a particularly poor combination because they have both lines with a very large amount of mileage in the east and a small amount of mileage in the west, so that neither system by itself was well balanced.

He showed, on the other hand, that the Northern Pacific had its principal mileage in the west. Mr. Budd quoted from Professor Ripley's report to the effect that there would be a great economy from the joint operation of the Northern Pacific and Milwaukee,

due to the fact that this would give a much shorter route to the Northern Pacific and to the further fact that the Milwaukee is electrified, such electrification being over the heavy mountain grades, where the economies from its use for moving iron ore would be the greatest. Mr. Budd suggested that the opportunities for such economies would be very great, and that a study should be made to show what they actually would be.

ESTABLISHED 1860
WASHINGTON ST. AT PARK - PORTLAND, ORE.

County Law Enforcement League put Sheriff W. J. Dunlap, appointed to succeed C. M. Kendall, who was murdered on a moonshine raid near Plainview last summer, into office again over a field of six candidates. The league's expense in backing Dunlap totaled \$266 by the itemized statement of election expenses filed here. Mr. Dunlap contributed \$100 of this amount and spent \$12 more for cards, making his race cost \$278 in all.

MASONIC TEMPLE RISES

Exterior of Kenton Lodge Structure Is Now Finished.

The new temple of Kenton lodge, Masons, located on Denver avenue at the end of the Mississippi avenue car line, is now rapidly nearing completion. The exterior of the structure is now finished, and the work on the interior is going ahead rapidly.

The building is three stories with the lodge room occupying two floors at the east end. Terra cotta, stone and brick are in the structure, which is of slow burning masonry. The corner, previously unoccupied, gives the Kenton district a businesslike center.

the other three angles of the intersection being already improved with business buildings.

Veterans' Applications to End.
SALEM, Or., Nov. 18.—(Special.)—December 15 is the last day on which the veterans' bureau may receive applications from disabled war veterans for vocational training, according to a letter received by the local Red Cross bureau today. Under the deficiency bill, approved June 16, 1921, applications for training are limited to 18 months following the passage of the act. Local Red Cross officials today urged all ex-service men interested in vocational training to file applications at once.

Sunday School Officers Elected.

SHERIDAN, Or., Nov. 18.—(Special.)—District officers for the Sunday school association comprising William, Sheridan, Bellevue and Amity have been named as follows: Mrs. Etta Henderson, president; Mrs. J. W. Briedwell, vice-president; Mrs. Rosa Branson, secretary-treasurer; Mrs. R. H. Yates, children's division superintendent; Mrs. Cate, young peoples' superintendent; Rev. R. S. Bishop, adult superintendent; and H. J. Richter, administrative.

OPTOMETRY

In every trade, profession or branch of work there are found a few men who, from special fitness or education, or both, are better prepared to serve you in their line than the multitude of others in the same field.

The professional work, the examining and measuring of your eye defects, must be skillfully done. The mechanical part, the making and adjusting of your glasses, is no less important. Therefore consult us.

At This Extraordinary Sale of 2000

Bungalow Aprons and
House Frocks

Four Great Groups to Select From

At 69c At 98c

At \$1.59 At \$1.95

Drastic price reductions which bring many of these unusually attractive and fashionably styled Frocks to you at this sale at

Actually Below Manufacturers' Cost

Included are the smartest styles in manufacturer's samples, factory close-outs, together with all odds and ends and short lines from our regular stock. This is indeed a very unusual opportunity for you to purchase chic, serviceable House Frocks or Bungalow Aprons for personal wear at an out-of-the-ordinary saving.

Many women will prudently purchase at this sale for gift purposes later. Values such as these are seldom met with anywhere.

In the 69c Group You have selection from a splendid assortment of styles, well made and neatly trimmed—real Amoskeag Gingham Frocks and Bungalow Aprons in patterns and colors. Wonderful values.

In the \$1.59 Group Are to be found an extensive variety of styles, many of which are exclusively shown by us, both conservative styles and novelties in all popular materials and trimmings—high-grade Frocks at a bargain price.

In the 98c Group You will find a full showing of popular styles in fancy Ginghams and standard quality Percales—more than 60 different styles and colorings to select from, all at exceptional reductions.

In the \$1.95 Group We are showing an unsurpassed gathering of the most elaborately trimmed styles in all desirable materials—many of these fine Frocks have been made and finished by hand. Values run to twice this price.

All the special display tables in our Underwear Section will be devoted to this special sale—none will be exchanged and no phone orders will be filled. Come early when selection can best be made.

Here IS An Important Sale—
Fashionable New Styles in Women's

Shoes, Pumps, Oxfords

Are in This Special Sale at \$3.89 Pair

Standard Makes in Black, Brown and Patent Leathers

Standing firmly in the forefront as a Shoe Sale of unusual value-giving, you are presented with the opportunity to purchase fashionable, reliable Shoes, Pumps and Oxfords considerably less than the regular selling price on standard makes such as G. Edwin Smith, Dunn & McCarthy, Peters Shoe Co., etc. The high Shoes are shown in black and brown leathers in styles with military or Cuban heels. The Pumps come in patent and black vici kid with French heels and the Pumps are shown in desirable leathers and styles—all sizes and widths are in the assortment, but not in each style. You have unrestricted choice from the entire lot at this sale \$3.89 for only

More Beautiful Spanish Laces

ONE-HALF PRICE
FOR SPANGLED
FLOUNCINGS
AND BANDS

Especially Underpriced

Spanish Allovers at \$1.59 Yd.

Both 34 and 36-inch Spanish Allovers in black and brown—neat patterns but only a limited quantity to sell at this special price.

Allovers and Flouncings at \$1.95 Yd.

An extensive showing of beautiful patterns in a fine heavy quality—both Allovers and Flouncings in white, black and all the best shades.

Silk Fiber Fringes at 49c and 69c

The popular Fiber Silk Fringes shown in styles appropriate for lampshades, dress trimmings, etc. Black, old rose, brown, navy, gold and blue. 4-inch 49c. 6-inch 69c.
