

Highest of all in Leavening Power.—Latest U.S. Gov't Report

Royal Baking Powder

ABSOLUTELY PURE

WYLLIE, THE HERO LADDEE.

Scotland's Great Checker Player Still Expert at the Age of Seventy-six.

Sixty years a champion is the remarkable record of James Wyllie, the most famous checker player in the world. Wyllie was champion of the town of Kilmarnock, Scotland, when but 15 years of age, and by virtue of his marvelous record against the best players all over the world for half a century he may quite reasonably be called the greatest player on earth. Wyllie is now 76 years old and very deaf, but his sight is still keen, and he is yet able to defeat nearly every man he meets. "I'm too old for draughts," he says sadly, but he usually manages to win whenever the stakes are worth securing.

Wyllie was born in the Pierce Hill barracks, near Edinburgh, in 1820, and at the time of his birth his father was a sergeant major in the Scots Guards. As a mere lad Wyllie was apprenticed to a Kilmarnock weaver, but his remarkable skill as a checker player made him famous and induced him to abandon learning the weaver's trade. A drover named Porteus whom young Wyllie had beaten took Wyllie to Edinburgh and surprised the natives. Porteus began a game with a local player of reputation named Bertram and then found an excuse to drop out of the contest. "Let my hero laddie play for me," he said. Bertram consented, and to his amazement the hero laddie won 69 games out of 100, and Bertram only succeeded in securing a single draw. The story of this achievement gave Wyllie great local fame, which was increased when he defeated Professor Andrew Anderson and Robert Martins, two great Scotch players.

Wyllie then became a watch peddler and traveled about Scotland selling timepieces as a regular business and playing checkers for money against all comers. "A shillun a game" was his price no matter who played against him, and when he first visited America in 1878 he charged his opponents 25 cents a game. During this tour he played over 11,000 games, losing less than 50. In 1881 he again visited America and won 17,054 out of 19,517 games, drew 1,754 and lost only 109. In match games he defeated C. F. Barker, the celebrated Boston expert, but was beaten by Clarence A. Freeman, the Providence expert, who is of Indian descent, and the late R. D. Yates of Brooklyn. Wyllie also played throughout England and Australia and has made a great deal of money as the result of his skill.

THE WHITNEY-PAGET MATCH.

Miss Whitney's Betrothal to an Englishman Who Has Become Wealthy in America.

Like many other American heiresses, Miss Pauline Whitney, the eldest daughter of ex-Secretary of the Navy William C. Whitney, is to marry a young Englishman of wealth and distinguished ancestry, but her Englishman, Almeric H. Paget, has made his money in America, is an adopted citizen of the United States and is a resident of St. Paul. He is a member of the famous Paget family and is the youngest son of the late General Lord Alfred Paget, an officer in the British army and chief equerry to the queen. His eldest brother, Arthur Paget, is a colonel in the Scots Guards and in 1878 married a daughter of the late Mrs. Parson Stevens, the New York society leader. Another brother is Captain Alfred Paget of the British navy. The present head of the family, the Marquis of Anglesey, is a cousin of Almeric H. Paget and in 1880 married a daughter of J. P. King of Sand Hills, Ga. The couple did not live happily together and have separated.

When Almeric H. Paget was 16 years of age he concluded that his position as youngest son was not very promising, and accordingly he came to America to

ALMERIC H. PAGET. MISS PAULINE WHITNEY. seek his fortune. At first he worked on a ranch in the far west and later removed to St. Paul, where he engaged in the real estate business and made a great deal of money during the days of "boom." He apparently knew when to buy and when to sell, for he not only kept the money he had made, but increased his store. He then succeeded in interesting British capital in America and became the successful manager of the London and Northwest American Mortgage company, limited, which position he still holds.

Several years ago he met Miss Whitney while the young woman was crossing the Atlantic with her father. He later joined the Whitneys in a tour of the Nile, and his engagement to Miss Whitney followed. Miss Whitney is about 20 years of age and is a tall, handsome, accomplished young woman, who is very popular in New York society. At the age of 14 she was sent to a select boarding school and remained there, leading a very quiet, studious life until she was formally presented to New York society at a grand ball given by her parents in December, 1892. Since her mother's death two years ago she has seldom appeared in society.

PAID MILLET'S BILLS AND GOT A "COROT."

M. Ziem, the Paris painter, relates a story of the brother of the present president of the French republic, and Corot, the artist. M. Casimir-Perier, Jr., was an intimate friend of Corot. On a visit which he made to the great artist in 1875 in his home at Fontainebleau, he found Corot painting the last touches on his "Biblis" ("Nymphs in the Forest at Sundown"). The masterpiece filled Casimir-Perier with enthusiasm, and he begged the artist to sell it to him.

"I'll give you my canvas," replied Corot, "on one condition—that you pay the butcher and baker bills of my friend Millet."

"Taken!" answered the wealthy Frenchman.

In Chailly, where Millet lived, the butcher and baker were asked to make out their bills and send them to M. Casimir-Perier. The art lover was somewhat surprised when he found that Millet had lived on credit for 13 years, and that the bills amounted respectively to 22,000 and 24,000 francs—over \$9,000. M. Perier paid the bills according to agreement and carried home the Corot. The price at that time was considered enormous, as the purchaser could have bought the painting in the market for about 1,500 francs—less than \$400. The bargain, however, was a good one, as the picture today, it is estimated, is worth almost \$30,000. It is still in the possession of the Casimir-Perier family.—New York Tribune.

A White Woman as an Apache Warrior.

The following story is told by one of Arizona's early pioneers:

In 1864 Dr. Alsap and Lord Duppa, well known pioneers, were prospecting with a party in the Bradshaw mountains on the Hassayampa creek. One morning the party separated for the purpose of hunting. In going up a canyon in which they were separated from their companions by high mountains, Duppa's detachment was attacked by a large band of Tonto Apaches. The whites gradually fought their way across the ridge with the hope of rejoining their companions. During the advance Duppa, who was stationed behind a rock, noticed that he was the particular mark of an Indian with a bow. Several arrows had fallen at his feet, and one struck him in the arm. Raising his rifle, he took aim, and just as he was touching the trigger the supposed Indian cried, "Don't shoot!" in good English, but it was too late, and the body fell over with life extinct. Soon after the two parties succeeded in forming a junction, and the Indians retreated, leaving their dead.

Out of curiosity the party returned to the place where Duppa killed the supposed Indian and found that it was a white woman, evidently about 30 years of age and dressed in all the paraphernalia of the Apaches. Investigation was made, but no trace of her former whereabouts could ever be obtained.—Yuma Times.

Minutes of the Council of Ten.

Recent researches in the archives of the Venetian republic have brought to light the records of the mysterious and dreaded council of ten, inclusive of the minutes of their most secret meetings, which were kept with the greatest care and regularity. This council was the real executive power in the republic, the doge, especially in the later years of Venetian history, being purely an ornamental personage and deprived of all real power. It is well known that the council deposed and executed more than one doge for alleged crimes against the state and was only controlled in the exercise of its authority by the grand council, from which the majority of Venetian citizens were, after the closing of the golden book of the council, permanently excluded.

In the domain of police and foreign affairs the council of ten reigned supreme, the grand council, when it met—which was not very often—confining its action to local legislation and the election of office bearers. The assassination by poison of enemies of the republic was considered an important branch of public business, and proposals for this purpose were eagerly listened to and discussed at the council's meetings.—Paris American Register.

Proud, but Resourceful.

When Baroness Rescouer finds her supply of cash running short, she generally buys her daily provision of food at the pork butcher's, but in order to reconcile her aristocratic dress and bearing with the plebeian surroundings she goes to work as follows: Entering the shop with an air of extreme curiosity, she will say:

"Aw, tell me, I pray, what is that thick, strange looking object you have exposed to view in the shop window? It has the appearance of mosaic."

"That is collared brawn," is the reply.

"Collared brawn?"

"And is it fit to eat?"

"Certainly!"

"Dear me! How you excite my curiosity. Would you mind cutting me a little of that peculiar substance?"

"For how much, madam?"

"Ah, it is out of sheer curiosity, you know! Say twopence worth, please."

The mistress of the establishment, in order to secure her ladyship's patronage, cuts a pretty thick slice of the "strange looking object," and the baroness, after disdaining the twopence, sweeps out of the shop carrying her dinner with her.—Meggendorfer's Blatter.

Sidney Smith's Suggestion.

When Sidney Smith was rector of a parish in Yorkshire, he found his vestry were discussing the propriety or otherwise of paying a certain amount to the church with wooden blocks. Having decided to undertake it, the question arose as to how. "Gentlemen," said the witty rector, "I think if you will all put your heads together, as the saying is, the thing can be accomplished without much difficulty."

AN ELECTRICAL PROCESS.

A New Plan for Working Rebellious Ores to Be Introduced in the West.

George D. Burton, of New York, thus describes a new process for working rebellious ores, which he intends to introduce in the West: "The ore is placed in a receptacle of about half a bushel capacity, made to stand an estimated heat of 10,000 degrees, which is a greater heat than can be measured by any pyrometer now in use. The bottom of these receptacles are perforated with holes from one-half to one inch in diameter. Any number of these may be used in a battery to get whatever capacity may be required. As the ore is heated the metal melts and drops in globules down through a solution coming up through the hole. The basis of this solution is water, with its gravity increased by adding salt, soda, borax, alum, cyanide or other acids.

"Different metals require different densities, depending on the amount of heat required to melt and cause them to leave the ore. The voltaic ore could not be formed without increasing the gravity, neither would the metals leave the ore without some flux to make it run.

"By increasing the voltage one metal after another can be removed separately. For instance, take a piece of ore containing silver, gold, copper and lead. With a low voltage and moderate amperage and by elevating the solution into contact through the holes, an arc is formed, and lead will be liquified and go down. Then by increasing the voltage and amperage silver would fall, and so with copper and gold, all fusing at different degrees of heat.

"The works in Canada are for working the nickel, and there all the nickel in the ore is saved, while but about half is by the old process. Aside from that, by this process and the use of condensing stacks, all sulphur, arsenic, and other volatile and valuable ingredients may be saved. In other words, everything of value, and all of it, is separated and preserved. It makes no difference how rebellious the ore may be—and this means a great deal when you consider how much valuable ore is not worked at all on account of the cost of the old process. As to the cost, there is a great advantage, and the electricity may be transmitted twenty miles to a mine from the source of power, thus saving the cost of hauling the ore."

MINING NOTES.

At Coos Bay, Oregon, it is claimed, a chemical process has been found that successfully separates the fine gold particles from the black sand of that region. There is lots of this black sand all along the coast, and if a successful process really has been found for getting the gold out of it, many millions will be added to the Western states.

Mining matters in and around Lewiston, Montana, are in a prosperous condition. The Annon and New Year properties are in full operation. Several small sales have taken place during the past week or two. Claim owners are busy doing assessment work and it is said to say that not less than two thousand claims will be represented in Coeur d'Alene, Moccasin and Judith Mountain districts this season.

Thirty or forty members of the British Columbia board of trade, Victoria, will shortly pay a visit to the mines of West Kootenay, they will remain about two weeks and will no doubt return and report that the mining claims now having are owned and controlled by Americans, who were the first in the field and made known to the British Columbia what a splendid mineral country is within the borders of their province.

The schooner Golden Gate, which has been on a prospecting tour among the islands of the Aleutian Archipelago, returned to San Francisco with tales of wonderful mines, where rich ore is to be cut out with a cheese knife. The Golden Gate sailed from San Francisco on the 26th of May with a party of young men, who had agreed to share expenses and profits of an Alaskan mining expedition. Three of the party of twelve or more returned with the schooner but they are full of buoyant hopes, and after the ore brought down in the hold of the vessel is assayed, will return to the islands with more machinery. The men say little about the location of their big strike, but it was learned on board the schooner that the mine in which they place most reliance is on one of the islands just south of Kodiak island. The ore is rebellious but rich enough to warrant the expenditure necessary to properly mill it.

Black Hills Activity.

Revival of placer mining on a large scale will soon be inaugurated on the Grants placer claim, says the Black Hills Times. Deadwood Gulch, just above the flour mill. A lease of the ground has been secured by Dave Morgan, one of our well-known miners, who was foreman for Mr. Grants in the early '80s, when the claim was worked with profit. Mr. Morgan is thoroughly conversant with the ground and will work it in a novel manner. He proposes to use teams and scrapers in removing the surface dirt and old tailings, to a certain depth, and then sluice everything to bedrock. It is an admitted fact that there still exist many thousands of dollars' worth of gold in the placer claims of Deadwood gulch, which can be recovered through practical and systematic work. Should some enterprising individual or corporation put in a bed rock flume, the venture would prove highly profitable.

No Wonder Her Hair Turned White.

"Mr. Dusenberry, here's the story of a man's hair turned white from fright. Now, that's a little hard to believe, isn't it?"

"Oh, no, my dear. The medical books are full of such cases. I once saw a girl's hair turn white right before my own eyes. She was on a chain back reaching for preserves on the top shelf of a pantry. The chair tilted, and she fell heavily to the floor."

"And her hair turned white?"

"When I helped her up her hair was as white as the wall."

"Oh, that's an exaggeration, Mr. Dusenberry. Caused by fright, was it?"

"Well, I don't know that I'll insist upon that part of it, my dear. She had landed her head in the flour barrel."—Ex.

RENEWAL OF YOUTH

A STRANGE STORY FROM A NEBRASKA VILLAGE.

Villagers Excited Over the Increased Vigor of the Older Inhabitants—Experience of Two "Yets."

From the World-Herald, Omaha, Neb.]

A World-Herald reporter was attracted by the evidence of renewed activity of some of the older inhabitants of the village of Bruce, a suburb of Omaha, Neb., and inquired the cause. Mr. Andrew Finkenkeller, who was a member of Company B, of the First Iowa Volunteers during the war, made the following explanation so far as he himself was concerned:

"In July, 1866, while my company was on the march through to Austin, Texas, I was attacked with rheumatism of the worst kind in one leg, at Alexander, Louisiana. Being weak, I was sunstruck and remained unconscious for several hours. Every summer since I have been unable to stand the heat of the sun, and have been compelled to give up my work. There was in my head a bearing-down feeling, which increased until it seemed my head would burst, and it caused a ringing in my ears, and palpitation of the heart set in, so that the slightest noise would set my heart thumping. Several times it has rendered me unconscious for from seven to ten hours at a time. In addition to this rheumatism extended up my entire side until I drew my head down on my shoulder. I lost my strength and flesh and was totally unfit for work."

"For twenty-eight years I have consulted physicians and taken their prescriptions without deriving any material benefit. My ailments increased in intensity until I was assured that there was no hope for me. During last year I went into the butcher business, but the dampness from the ice used increased my rheumatic pains to such an extent that I was not only compelled to quit the business, but was confined to my house and bed for nearly six months."

"In November last I read in the World-Herald a case of a man who had been entirely cured from the ailments from which I was suffering, by the use of Dr. Williams' Pink Pills for Pale People. On November 28 I purchased a box. In a week I was astonished to know that I felt better than I had for six months past, and before I had used half a box the ringing in my ears began to lessen in volume and finally left me. The pain from the rheumatism gradually left me, so that within one week from the time I took my first pill I was able to sit up in bed. On January 1st I was able to go out and walk around a little. The palpitation of my heart entirely ceased. On February 9 I was so thoroughly cured that I accepted a position as night watchman in the Forest Lawn cemetery, remaining out of doors from 6 P. M. until 6 A. M. I have gained in weight from 144 pounds, which I weighed in November last, to 172 pounds, which I weigh now."

For nerve building and for enriching the blood Pink Pills are unexcelled. They may be had of druggists or direct from the Dr. Williams' Medicine Co., Schenectady, N. Y., for 50 cents per box, or six boxes for \$2.50.

Forming characters! Whose? Our own or others? But, and up that question has fact be the peril and responsibility of our existence.—Elihu Burritt

Tasmania was named in honor of Tasman, the discoverer

The Onward March

of Consumption is stopped short by Dr. Pierce's Golden Medical Discovery. If you haven't waited beyond reason, there's complete recovery and cure. Although by many believed to be incurable, there is the evidence of hundreds of living witnesses to the fact that, in all its earlier stages, consumption is a curable disease. Not every case, but a large percentage of cases, we believe, fully 98 per cent, are cured by Dr. Pierce's Golden Medical Discovery, even after the disease has progressed so far as to induce repeated bleedings from the lungs, severe lingering cough with copious expectoration (including tubercular matter), great loss of flesh and extreme emaciation and weakness.

Mr. A. H. Cranbury, of No. 103 Kerr St., Memphis, Tenn., writes that his wife had consumed three boxes of Dr. Pierce's Golden Medical Discovery, and that she was now able to do her usual work, and that she was now able to do her usual work, and that she was now able to do her usual work.

Cancer

and when told this, the most eminent specialist of New York, under whose treatment she was placed, declared her case was hopeless. All treatment having failed, she was given up to die. Dr. S. S. S. was recommended, and as nothing else it may seem, a few bottles cured her sound and well. Our treatise on this disease will be sent free to any address.

SWIFT SPECIFIC CO., Atlanta, Ga.

FRAZER AXLE GREASE

Best in the world. Its wearing qualities are unsurpassed, actually outlasting two boxes of any other brand. For Animal Oils GET THE GENUINE. FOR SALE BY OREGON AND WASHINGTON MERCHANTS and Dealers generally.

A SURE CURE FOR PILES

Having Piles known by medical prescription, cause intense itching when warm. This form of Piles, bleed- ing or protruding Piles yield to the use of DR. SO-SAN-KO'S PILE REMEDY, which sets directly on the affected part, dissolves the piles, softens a permanent cure. Price 50 cents per bottle. Dr. So-San-Ko, Philadelphia, Pa.

SMALL BEGINNINGS

Make great endings sometime. Allments that we are apt to consider trivial often grow, through neglect, into atrocious maladies. dangerous in their progress and productive of no return. It is the danger of the earlier indications of illness which leads to the establishment of a series of maladies on a chronic basis. Moreover, there are certain ailments incident to the system, such as malaria and rheumatism, which which it is always desirable to fortify the system against exposure to the conditions which produce them. Cold, damp and malarial air are sure to be followed by Rheumatism, Malaria, etc. After you have incurred risk from these influences, a visit to a doctor or two of the latter's 8-cent Blotter directly afterward should be well followed. For malaria, dyspepsia, liver complaint, kidney and bladder trouble, nervousness and debility it is the most decidedly popular of remedies and preventives. A visit to a doctor before means promotes appetite.

"What has become of your fine diamonds? They're not in the family, I hope?" "Oh, yes; my wife has them."

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, it is like a rubber band closed by inflammation, and it prevents the air from reaching the middle ear, and the hearing is lost. Deafness is usually the result of colds, and it is the most serious condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surface. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular free.

The Klumpke Sisters.

Miss Dorothea Klumpke, who has distinguished herself in Paris, and who passed her examination before the Sorbonne so triumphantly, presenting a thesis on the nature of the rings of Saturn and receiving her doctor's degree, is a sister of Miss Anna Klumpke of Boston, an artist who has a studio on Beacon street, and who is known as a portrait painter of very exceptional power. Her sister in Paris, who has been made a doctor of science, presented in her thesis before the Sorbonne a very new and original theory regarding the rings of Saturn—that they are composed of solid masses rather than of gaseous or fluid substance, as has heretofore been believed. There is still another of these talented sisters, Dr. Dorothea Klumpke, who is a doctor of medicine and is living abroad.

English Horsewomen.

Different observers have commented upon the increase of women riders in England who ride on the off side of their horses. The English woman has been taken as a model in horsemanship, and her departure in this respect will certainly have its influence. It is said that already the sight is sufficiently common in Hyde park to have caused to arouse comment, and though it still looks odd "and not thoroughlybred, you know," its cause of being is sensible. According to those who know, riding on one side of her horse when a woman rides almost daily has a tendency to give an unstable swing or curve to her figure, and the idea of an occasional change is on the same principle as "running the other way" around a circle.

A Tribute to Rosina Vokes.

Rosina Vokes' gowns and effects put up at auction make Felix Morris poetically mournful in the Boston Herald over the going out of that bright life. "Poor little woman! Incomprehensible it is that such vivacity, such animation, such love of mirth, of song, of gladness and of life should ever be silenced. Why not flow on forever? Surely thy mission was to lighten life's burdens, to bring the bright smile to weary, heartworn nature, innocently to touch the better lesson and make the world happier by thy mirth provoking ways. "In the kindly memory of her many admirers she will live as long as they do."

Annie M. Reynolds.

Miss Annie M. Reynolds of North Haven, Conn., recently chosen as the first world's secretary of Young Women's Christian associations, is a sister of Professor James B. Reynolds, identified with the University Settlement in New York. Miss Reynolds was graduated from Wellesley college and afterward was a special student at Yale. She is a highly accomplished young woman, and her familiarity with modern languages will make her peculiarly efficient in her now widely divergent duties. Her headquarters will be in London.

New York's Women's Clubs.

The plan proposed for the New York State Federation of Women's Clubs, which it is expected will be organized this coming winter, is to arrange the clubs represented in groups. These would include literary, educational, scientific, industrial, professional and the rest, and under this scheme every interest will find its proper place and development. The preliminary conference will be held on the 19th and 20th of November, and every woman's club in New York state is asked to take part in it.

An Assurance.

"You're not going to publish everything I say, are you?" said Senator Sorghum anxiously.

"No," replied the reporter; "I wouldn't think of it. If I were to let some of that grammatical English get into the paper, I'd lose my position before sunset tomorrow."—Detroit Free Press.

COLUMBIAN PRIZE WINNERS.
