### HERE'S ANOTHER.

#### Now It's a Count Who Says He Has Col red Perpetual I

Count Otto von Holtzschuerr of Otmwa, Ia., claims to have discovered the principle of perpetual motion. His machine is in the shape of an inverted bicycle, the wheels standing high in the air. The front wheel is the one to which the principle is applied. The principle is contained in a 12 by 12 by 18 inch pine goods box. A narrow open-ing inside of the box admits the inflated tire of the wheel, and the mechanism inside drives the wheel. The little box is kept locked, but the bicycle wheel driven by the wonderful mechanism inside revolves from one hour's end to the other at the rate of nearly 100 revolutions a minute.

Von Holtzschuerr, when asked if a view of the mechanism would be grant-ed, said: "Not yet. The principle is so simple that if any person with an idea of machinery were to see it the idea would be perfectly plain. I can tell you, however, that the attraction of the gravitation does it all. I have a weight in that box which in its endeavor to reach the earth causes a very small number of wheels to revolve. These in turn move the bicycle wheel. By increasing the weight the mechanism will be given power and velocity, and with it everything is possible."

Von Holtzschuerr is about 50 years old and was born at Jossey, Turkey. He traces his ancestry to 103 B. C. The family name was bestowed because of victories won in the war with the Sara-cens. He came to the United States in 1867.

### CURED BY PRAYER.

#### Pastor of a Friends' Church Made Well of a Mortal Sickness.

Mrs. Hannah Pratt Jessup, pastor of the Friends' church in Danville, Ind., has been cured of a fatal disease by prayer. For some time her health has been declining, and the best medical skill could give no relief from her affliction, which was Bright's disease. There have been times in the last month when It was thought that her death was but a matter of a few hours. As a last resort she and her husband decided to visit Dr. Dowie of Chicago, who has been doing good by prayer.

They went to him and spent a week dismay at the English headquarters in his house, but Mrs. Jessup felt no re- 18t. Louis Globe-Democrat. lief. They decided to return home, and the last night of their stay in Chicago they visited the Pacific Garden mission, the largest in the city.

Mrs. Jessup led the service, and many came to the altar and confessed their sins. Her thought then turned to herself. The next day she was to return home to die. She decided to ask for the prayers of those present. In a few words she told her story, why she was in the city and of her hopeless return home on the merrow. She asked for prayers. Immediately several commenced to pray most fervently for her. She herself knelt at the altar and prayed.

When she arose, she felt herself a changed woman. She was well. She returned home and has not had a pain nor a symptom of the disease. Her neighbors have all noticed the remarkable improvement in her appearance and testify to her serious condition only a few days ago. With them the change is nothing short of a miracle, and the entire city has become aroused over the matter. Mrs. Jessup is one of the leading pastors of the city and is held in loving esteem by all, whether members of her church or not. She is known over the state as a

# Hood's Pills ours all Liver Ills. 25 cents.

For the Whist Char plonship.

At a meeting of the American Whist league held a few days ago it was de-cided to hold the annual tournament at the Oriental hotel, Manhattan Beach, N. Y., June 22 to 27 inclusive. The league is made up of several state associations, and its membership includes nearly 400 clubs. Each club is allowed to enter a team of four men, and the winners will receive a silver trophy valued at \$500, the same to be emblematic of the whist championship of this country.

### Million Acres Open to Settlers

The president has issued a proclamation opening the Red Lake Indian reservation in Minnesota to settlement. The date selected is May 1. The White Earth reservation will be opened by a procla-mation to be issued later, though it was originally planned to issue the proclamations simultaneously. The two comprise about 1,000,000 acres and form a portion of the old Chippewa lands.

The Turkish Needle.

A curious needle with a polished triangular eye large enough to carry strips of beaten gold and for use upon embroldery of linen was once shown to an American woman in Constantinople. The particular interest attaching to the needle was the assertion of is owner that it had been in the possession of his family more than 309 years.

Mrs. Ballington Booth of the new American Salvation Army has devised a more attractive bonnet for her assistants, a stroke of subtlety that may well cause

Too Much Knife!

The use of the surgeon's knife is be-The use of the surgeon's knife is be-coming so general, resulting fatally in such a large number of cases, as to occasion general alarm. The press al-most daily announces the death of some unfortunate whose system could not withstand the shock of an operation, and whose life was cruelly sacrificed to the keen blade of the surgeon. Of course, in some instances an operation is necessary, and is the only means of saving life, but such cases are exceedingly rare. So many deaths

are exceedingly mate. So many deaths occur under these conditions, however, that the public is beginning to realize that the foctors are too hasty in resort-ing to the knife, and if such a state of affairs continues, there will before long be a general uprising against such meas-ures. It is but reasonable to believe that the majority of orerations are that the majority of operations are unnecessary, but when the fatal mistake is discovered too late, only the doctors ever know of their error, and though a precious life is given up, the public is assured that death would have resulted in spite of the operation, and who is

ever the wiser? The folly of resorting to the knife in cases of cancer, is demonstrated every time it is undertaken. The disease is

LAND IN INSANE ASYLUMS. Many Inventors Overtax Their Brains and Become Crasy.

1 dian

death."

"A lunatic asylum is about the last place anyone would search in for ingenious and valuable inventions, isn't it?" said the resident physician of one of the largest of these institutions. "We have a patient in this asylum now who believes he is shut up in the Old Fleet prison for the national debt. In the hope of raising the money to pay this mark for a hidden enemy's bullet?" trifle off, and obtain release, he has for the last two years devoted his poor brains to inventing things. Strange to say, among a host of utterly absurd ideas, he actually has produced two

. . . . .

which are really practicable. His friends and I have supplied him with such harmless materials as he requires. and he has just finished a simple automatic contrivance for the head of a lawn tennis racquet to pick up the balls and abolish stooping. It acts perfectly, and I'm so convinced there's money in it that I've advised his friends to secure a patent for him in case he becomes cured. His other invention is of a ulfferent kind, being a really efficacious preventive of seasickness.

"It's very simple. Two of its components are in every kitchen and the rest in every chemist's shop. I have successfully tested it myself recently on two occasions when crossing the channel in very stormy weather.

"As an instance of the cleverness of nected with machinery and now in daily use everywhere was invented by the inmate of an asylum well known to every one by name. As he is now

quite cured and is a somewhat prominent man I won't mention any details, but his invention, designed and modeled as a diversion while absolutely insane, has since brought him in thousands of pounds. "A lunatic in an asylum where I was

O'S PILE REMED

was too spirited to submit, and so incurred the resentment of the other boys A formal conspiracy was hatched to

the prejudice of the intractable youngster who refused to be dealt with as other newcomers had been. The plan hit upon by the conspirators was the following:

In the summer-time the boys were the sheep wash. The greatest pluck had to be shown on these occasions, and whoever shrank from plunging headfirst into the water, or showed the slightest signs of cowardice or hesita tion, had to suffer severely for it. The tutor would take the unwilling boy by the shoulders, push him toward the deepest part of the water and throw him in headlong; and when he strug gled out, the other boys were permitted to repeat the punishment until the novice's repugnance was quite cured. Otto von Bismarck's enemies stood

ready on the edge of the pool. The new boy, however, plunged headlong into the water, dived and came up on the opposite bank! A unanimous "Hurrah!" broke from the lips of his surprised comrades.

Two of Sargent's Characteristics. Sargent's musical perceptions should be particularly mentioned in an analysis of his temperament, for they are very keen, and his knowledge of good music and love of it are strong factors in his personality. Another strong temperamental trait is his susceptibility to the impress of race characteristics. He has shown this in the eager grasp of the picturesque, not only in foreign lands, but whenever he met with anything markedly racial in subject for a picture at home. His large canvas, "El Jaleo," a woman dancing. with a company of Spanish singers and time-makers behind her, and the studies he made of the Javanese dancing-girls at the Paris Exposition of 1889, are among the tangible results of this tendency. Besides his native language, he speaks and writes French, Italian, and German.-Century.

#### National Insurance in Germany. The compulsory contributions of the German working people to the national insurance funds have grown in a few years to enormous sums. The last reports show that the fund for insurance against accident was 94,300,000 marks at the end of 1894; that for insurance against illness, 113,640,000, and that for insurance, against invalidism and did age, 303,570,000 marks. The sum total of 501,000,000 marks, or more than \$125,000,000, is so great that the German government is embarrassed to find satisfactory investment for it. The last suggestion is that as much of the money as cannot be lent on real estate shall be used to build model houses for workingmen, which shall be let at low rentals to industrial workers.

Seeing the girl from next door fly by on her wheel is, after all, better than SURE CURE FOR PILES hearing her sing all evening.

would refuse to touch any other kind of erything and I did not have much concoin, and as his peculiar taste was fos- fidence, but when a man is sick he tered by his owner, George W. Brown, don't care what he tries if there is a he soon became an expert in discrim- chance to get well. I got the pills-

> of visitors were incredulous of the stories told of Tony, but went away convinced after trying him with good and bad coins.

with coins by the United States Treasury Department. Scores of counterfeits, some of them excellent enough

to deceive the ordinary bank cashier, were thrown to him, but he refused to pick them up, while he would jump for joy and engerly snatch up every good dollar.

Upon one occasion a dollar of doubt ful appearance was given to Tony's owner. Thinking it was counterfeit, Mr. Brown threw it to Tony, who without hesitation picked it up. Mr. Brown accepted the coin as good, and included it with his next deposit at the bank. The bank cashier threw it out and declared it counterfeit. Mr. Brown then sent the coln to the Treasury Department, where it was found to be genuine. The wonderful faculty of the animal led his owner to utilize him for moneymaking purposes, and for almost a year Tony was a dime-museum star in Denver, Salt Lake City, Butte and other Western cities, always attracting atten-

tion and never failing to discriminate between good and bad coin. The constant work of picking up coins wore out his front teeth, and he had to retire from the stage. But though

his teeth were almost gone, Tony's love for silver dollars did not diminish, and even in his latest sickness he could only

be kept quiet by allowing him to play with an American silver dollar. Ilis death was caused by dropsy and a cold contracter on a recent trip to Denver and Salt Lake City.

An Accommodating Texan. A stranger in New York, who seemed to be lost, asked Gus de Smith: "Say, how do I get to the railroad

depot?" "Say what?" "Say, how do I get to the railroad

depot?" "How do I get to the railroad depot? Anything else you want me to say?"-Texas Sifter.

It sometimes happens that those who die for love are better off than those who marry for it.

As people grow old, their ideal woman becomes one who is a good nurse.

French wheelmen have adopted a code of signals by whistle. The whistle is much used in Paris in preference to the bell.
