It is expected that a brick jail will be built on the west side of the court house leading off from the sheriff's office.

WELL-KNOWN CHARACTER FIRST IN FIELD

Ed. Schieffelin the Pioneer Gold Hunter

FIRST PROSPECTOR IN CLONDYKE

The Eugene Guard Publishes What Purports to be the Opening Chapter.

The Eugene Guard says that Ed. Schieffelin, well known in this county, was the first to prospect in the Clondyke country. Washington county is always at the front. This is what the Guard says:

Now that the dude journalist and silk stocking miners are claiming the Clondyke region "by right of discovery," it is interesting to note who were the pioneers of the locality. W. J. Arkell, of the Leslie's Weekly and Judge publications, claims that his expedition of 1890-91 was the first to enter the region, and sends out a fairy-story to that effect over the telegraph wires, dated New York, July 23rd, claiming the Clondyke region by right of discovery, for E. J. Clare, who headed the expedition and himself who organized it.

The first man to sail up the Yukon and prospect the country in the vicinity of the Clondyke was Ed. Schieffelin, the pioneer of the Clondyke region, who sailed up the river in 1882, and was the first to enter the region, and sends out a fairy-story to that effect over the telegraph wires, dated New York, July 23rd, claiming the Clondyke region by right of discovery, for E. J. Clare, who headed the expedition and himself who organized it.

HAND IMPALED BY A BINDER NEEDLE

Henry Harms, of Centerville, Severely Injured.

PAGUE'S REPORT GIVES GOOD NEWS

A Good Yield in the State—Indications of a Splendid Crop—Harvest Fall Blast.

On Tuesday of this week, Henry Harms, living near Centerville, met with a very ugly accident while in the harvest field. His father was driving a binder and young Harms was watching the knottor, which was not doing its work properly. Thinking that perhaps there was too much oil for the knottor to properly catch, he threw some dirt in the machinery. The needle descended just in time to catch the extended hand, impaling it in a most stubborn manner, the needle running entirely through and to an extent of several inches. The machine was stopped in time to save the hand from breaking through the arm. The knottor had to be taken apart to relieve the hand from its perilous and painful position and withdraw the needle, the process taking half an hour. It was brought to town and Dr. Harms dressed the wound with

WEEKLY CROP BULLETIN.

Review of Week Ending Aug. 2nd.

WESTERN OREGON.

The weather has continued to be favorable for all crops, except for hops. Harvesting of fall sown wheat and oats continues, and will be finished during the coming week. Threshing has commenced in a few localities, and reports indicate an excellent crop. The berry is well formed and very plump; the grain will weigh heavier than usual. The wheat that has been threshed is yielding more bushels to the acre than is usual. Spring sown wheat and oats are most promising; color is showing and harvesting of them will commence within ten days. Haying in the coast counties is about finished—a fair crop has been secured. Hops have made good growth but they are in a bad condition owing to the lice. The weather has been favorable to the propagation of the lice, and they are more numerous than usual. In some hop yards no effort is made to spray, in others spraying is active. The outcome of the hop crop is problematical, owing to the presence of the lice in such phenomenal numbers.

Cherries are about over. Blackberries still continue to be plentiful. Peach plums are about over. Columbia and Bradshaw plums are ripe. Prunes have commenced to color; the prune crop promises to be unusually large. Peaches are ripening and they are a much better crop than usual. Apples and pears continue their prolific promises. Melons are ripe and are unusually plentiful.

Corn continues to make a good growth; sweet corn is an excellent crop and the markets are filled with it. The general report is, everything being so prolific this year, that the markets are deficient for everything except of a non-perishable character. The excellent reports continue as to flax and sugar beets.

EASTERN OREGON.
Harvesting of fall-sown wheat and oats continues; phenomenal yields are reported in many sections. The grain is of excellent quality and very heavy. Threshing has commenced in some localities. The farmers are more than satisfied with their prospects. Spring sown wheat and oats continue to promise well; harvesting of them will begin within the next two weeks. The grain crop promises to be larger than ever before. To the south and east of the Blue Mountains the season is later, and the harvesting of fall-sown grain is just commencing. Through the irrigated sections of Malheur, Baker, Harney, and the surrounding counties, the prospects were never better. The hay crop throughout the stock country is reported to be more than ample for any possible needs during the coming winter.

Save Your Grain.
Few realize that each squirrel destroys \$1.50 worth of grain annually. Wakelee's Squirrel and Gopher Exterminator is the most effective and economical poison known. Price reduced to 30 cents. For sale by the Delta Drug Store, agent.

Go to the Hillsboro Pharmacy for bargains in all new lines—remember it and make no mistake.

Last Monday night, while a Hillsboro business man was coming from Portland and nearing the Hawthorne place, east of the city, he observed the falling of a meteor which in length reached from the zenith to the horizon. It made a great noise like the escaping of steam and was of great brilliancy. As the narrator is of the maximum sobriety class, there is no doubt whatever about the accuracy of the story.

Kester's vinegar works and fruit preserving establishment is an institution of which every one in Hillsboro should be proud. That it should be more extensively patronized goes without saying. Those having fruit which they desire caring for should look into the matter and help to perpetuate a business which really a credit to the town.
