of the World.

The statistical news of wheat for the past week has been very bearish. Beerbohm reported the world's shipmenst at 14,000,000 bushels, of which North America shipped 5,248,000 busehls. The American supply of visible wheat increased during the week 1,085,000 bushels, and now totals 22,-587,000 bushels. The Orange Judd Farmer report for June makes the winter wheat acreage 25,651,000 acres, after allowing for 1,000,000 acres abandoned in California. The spring wheat acreage shows a radical increase every-000 acers. The month of May was fav-California, and the present condition against 87.9 last month and 83.5 last year. The condition of spring wheat is 99.1, which is the highset figure ever of protracted bad weather. While reported on June 1 by any reliable au- many tons of steel were pounding on to be gaining both here and abroad. A private Liverpool cable says: The trade is bearish and lower prices must follow. Upward manipulation is out of the question, with world's shipments so large and American prospect is flattering." Minneapolis reported no buyers of cash wheat in that market today. About the only strong factor has been the New York market, where foreigners are asid to have bought large quantities for September and later deliveries. That market has been well sustained, and the foreign support thus given encouraged a belief that prices may do better here, at least temporarily.

RECORD-BREAKING CRUISE OF THE PACIFIC-BORN WARSHIP.

TRIP OF THE OREGON.

Journey Equal to More than Half the Distance Around the Earth - Beset by Grave Dangers, but Was Always Ready for Trouble,

First to Round the Horn,

When the Oregon started on her unparalleled cruise of 13,000 miles and steamed through the Golden Gate, firing her salute of good-by to the flag that floats over the Presidio on March 19. Capt. Charles E. Clark and his crew were as much in ignorance of her ultimate destination as the rest of the world. Captain Clark was told to make Callao his first stopping place. The where, the total area reaching 17,868,- big vessel, with its trensendous load of guns and protecting turrets, ran into orable for wheat everywhere except in a heavy sea before it had got out of sight of California's promontories. of winter wheat is reported at 90.7, The captain's orders did not provide for a return. The ship's prow had been headed for the coast of Peru and practically perfect, with an aveage of | the course was never changed in spite

thority. The situation in Oregon and the Pacific the men who direct the Washington is enough better than last game of war and use the warships as year to practically offset the loss in | so many pieces at chess were debating California. Bearish sentimnet seems | what disposition should be made of the redoubtable floating battery. To "Fighting Bob" Evans was left the disposition of the big ship. "Dewey, with the Olympia, can lick the entire Spanish Asiatic squadron," was Evans' estimate, and the destination of the Ore-

gon was settled.

Great anxiety was felt for the "pride of the navy" when April 1 came and she had not been sighted off the coast of Peru, as expected, but on April 8 the bold lines of the battleship were described off Callao. She had fought a long battle with the elements, but had come out victorious without a mark. The Oregon coaled at Callao and there Captain Clark received a sealed packet | Janeiro the Temarario arrived. Bracontaining his orders. When the ship had headed about and steered into the open sea, Captain Clark communicated the story of the Maine's report and its reception by the American people to his men, in addition to the route of their excursion around Cape Horn. Officers and crew exercised the greatest precaution when war with Spain promised to become the sequel to the Maine disaster. The ship was given a coat of iron gray and her searchlight swept the horizon for hostile sails. The

CAPT. CLARK OF THE OREGON.

progress of the vessel southward after leaving Callao was attended by great danger owing to storms, and for that reason the Oregon coaled in the Straits of Magellan instead of attempting to enter the harbor of Valparaiso. When the joint resolution of Congress declared the Cuban people should be free and that Spanish sovereignty was at | tended for coast service, her designers tain Clark was only twenty-four hours | cruise equal to more than half the disbehind schedule time. The Oregon was | tance around the earth's surface. The the first warship in history to round Oregon is supplied with bunkers that

the American vessels arrived at Rio de zilian officials, however, were active and said they would prevent any clash between the representatives of the two governments. News of the magnifi-cent victory of Dewey's fleet reached the Americans in Rio de Janeiro. Within the harbor of Brazil's capital the Oregon and Marietta were joined by the dynamite cruiser Buffalo, recently pur-

chased from that government. Orders came from the Navy Department to proceed, and the fleet of three vessels steamed out of the harbor of Rio de Janeiro May 4. They were instructed to stop at every cable port en route and receive instructions.

Oregon Built in the West, All the material for the construction and armament of the Oregon came from the far Western States. The iron mines of California, Oregon, Washington, Nevada, Colorado, and New Mexico supplied the crude metal which was afterward converted into steel for the hull, great strips of armor and ponderous castings for the guns. The big battleship was built by the Union Iron Works, San Francisco. On her trial trip an average of 16.79 knots was maintained and 11,111 horsepower was developed, 2,111 in excess of the con-

In size the Oregon is only surpassed by one ship in the navy-the Iowa. The displacement of the Pacific-born monster is 10,288 tons. The excess weight of the Iowa comes from her high decks, which are supposed to make her more seaworthy. When the Oregon was constructed she was ingive her a coal capacity of 1,594 tons. This enables her to steam 4,500 miles without recoaling. The Oregon's comso desired. A brief summary of the inches; turrets, 15 inches; casements,

Carborundum in Canada. The Carborundum Company, of Niagara Falls, N. Y., has made all arrangements for the manufacture of their product in the Dominion of Canada at an early date. They have purchased a plot of land in Niagara Falls, Ont., and will at once commence the erection of a factory, the contract for it having been awarded. They have also made a contract with the Canadian Niagara Falls Power Company for a block of electrical power to operate the furnace. In addition to the property purchased they have taken an option on additional land, in order that they may enlarge their plant should they see the necessity of so doing.

THE CHINESE FLAG.

The standard of the Celestial Empire is a very queer looking affair. It represents the most gretesque of green dragooms on a yellow ground. The latter is suggestive not only of the national complexion, but also of that of a sufferer from bilitousness. To remove the unbecoming tint from the complexion, use Hostetter's Stomach Ritters, which will speedily regulate your liver, prevent malaria, and remedy dyspepsia, nervousness, rheumatism and kidney complaint.

A Swede has patented an apparatus to assist in keeping milk pure, which consists of two tubes with flaring tops to be attached to the arms in milking, to carry the milk into the lower ends of the tubes connecting a covered pail, thus decreasing the size of the openings exposed to a minimum.

THY ALLEN'S FOOT-EASE.

A powder to be shaken into the shoes. At this season your feet feel swollen, nervous, and hot, and get tired casily. If you have suarting feet or tight shoes, try Allen's Foot-Ease. It cools the feet and makes walking easy. Cures swollen and sweating feet, blisters and callous spots. Relieves corns and bunions of all pain and gives rest and comfort. Ten thousand testimomals of cures. Try it today. Sold by all druggists and shoe stores for 25c. Sent by mail for 25c in stamps. Trial package FREE, Address Allen S. Olmsted, Le Roy, New York.

For Workmen's Lunches A recently patented wrapper in England is especially suitable for carrying workmen's meals. It is made of water-proof material, and is shaped with a of fortification running along the coast rigid piece in the center. The flaps are secured by buttons or hooks and eyes. When not in use it can be folded into small space, a strap forms the

Hood's Sa saparilla Has Cured a Severe Stomach Trouble.

Extracting Copper. The interesting "wet process" of extracting copper from pyrites, in use near Antwerp, is described in a paper read before the Association of Gradnates of the Ghent Technical School by L. Breda. From this it appears that the ore, containing from three to four per cent of copper, is roasted, ernshed and roasted with salt. The chlorinated ore in quantities of twentyfive tons is twice washed with some 660 gallons of water, then with the Compound, and waste liquor from the precipitating my tanks, then with dilute warm sulphuric said acid, and finally with warm water.

The washed ore at last contains only 0.2 per cent of copper. The liquor is run into tanks, and the copper is precipitated by scrap iron. The somewhat remarkable statement is made was so sick that by this means the amount when I began of copper left in the waste liquor with her medidoes not exceed 1.4 gram per gallon.

Exportation of Lumber. The exports of lumber from this country have been rapidly increasing during the past two years, and especially was there a notable increase last year over the record for the year be fore. In 1896 the value of lumber exports from this country was \$33,000,-000, while last year there was an increase of more than 20 per cent, the total being upward of \$40,000,000 worth of lumber. In 1895 the value was about \$30,000,000, and for several years previous to that year the value was about the same. In 1860 it was \$10,000,000.

JOHN POOLE IS CONSTANTLY REceiving large invices of the celebrated Stough-tion wagons. These we superfor to any ever put upon this market. Before buying a wagon call and examine, or write for catalogue. Address foot of Morrison street, Portland, Oregon.

The life of a cast iron water main is stated, in a report recently made to the Melbourne, Australia city engineer, to average about thirty years. When taken up after forty years of service the iron is generally worth ess, even for scrap. Mild steel pipes last about as long, but the cost of jointing and laying, as well as the cost of the pipes themselves, is considerably less for steel than for cast-iron.
