The City of Manila Can Hold Out But a Few Days.

INSURGENTS IN THE SUBURBS

Food Has Given Out and the Soldiers Are Starving—City Will Not Be Taken at Present, But Its Surrender Is Expected.

Manila, via Hong Kong, June 20.—Spanish power is crumbling in the Philippine Islands. General Pena and a thousand Spanish soldiers have surrendered at Santa Cruz. Similar surrenders have taken place at Laguna and at Pampanga, and in each case hardly anybody was killed.

It is reported that Rear-Admiral Dewey is unable to restrain the insurgents, but their conduct is satisfactory. There is no necessity for interference, as no excesses whatever have been committed.

The insurgents proposed to form a republic under Anglo-American tutelage, and threatened to visit with severe penalties the insurgents who have become traitors, especially Paterno, a prominent native protégé of the Spaniards.

There was desultory firing today in every quarter on the outskirts of the town, with no material result, although there were several artillery attacks and one explosion, which killed six Spaniards and wounded many others.

The ammunition of the Spaniards is

IT HAS SAILED.

Spanish Reserve Fleet Leaves Cádiz for Unknown Destination.

Washington, June 20.—The state department has received the following dispatch from its agent at Gibraltar:

"The Carlos V. Pelajo, Rapido, Patriot, Andas, Oseada, Prosperina, Giraldia, Prolejo Colon (with the minister of marine on board), Alfonso Doco, Canondong, Antonio Lopez, Isla Panos, Buenos Ayres and San Francisco, left Cádiz yesterday. The first 11 passed the rock bound for Carthage for orders; the last three had troops on board. This is Admiral Camara's Cádiz squadron and appears to be in the Mediterranean, bound for African shores."

The army officials were satisfied, on learning today that the Cádiz fleet had sailed, that the ships would go to Porto Rico rather than to Cuba, if they crossed to this side. It was pointed out that this move would be the natural strategic one for the Spanish commander to take, as there was still something left for them to save in Porto Rico.

The naval view is not similar to that taken by the army officers. The former do not attach as much importance to the fleet as the latter, and few officers can be found to believe that the ships will ever venture far from the Spanish coast, much less attempt to cross the Atlantic or go to the Philippines. The list of vessels in this fleet is rather formidable in sound, but as a matter of fact it includes not more than two up-to-date war vessels, excepting the small torpedo gunboats. It is certainly the opinion of naval officers here that if Dewey had the Monterey with him he would have no trouble in repulsing the whole Spanish force, while the Cádiz fleet could not afford pasture for Sampson's steel bulldogs.

Spanish Hopes Are Raised.

Madrid, June 20.—There are a number of rumors in circulation as to the

WEEKLY MARKET LETTER.

The End of the Remarkable Letter Wheat Deal.

[Reported by Downing, Hopkins & Co., Inc., Board of Trade Brokers, 711 to 714 Chamber of Commerce building, Portland, Oregon.]

The letter wheat deal, so-called, which was certainly one of the most remarkable business enterprises of modern times, has come to an end. Liquidation is now the order of the day, and many millions of money which were at one time profits on one side of the ledger have been wiped out by losses on the other side of that same truth-telling book.

It is the old story over again of Prometheus challenging the gods. The forces of nature are too strong for any man, and work and contrive as he may, he cannot maintain himself against that eternal decree that seed time and harvest shall not fail.

The outlook in 1897 for the purchase of wheat justified all that Mr. Leiter did. There were short crops everywhere abroad, and the United States alone possessed the grain the whole world needed and must have. As the year advanced and it became more and more apparent that the shortage was certain, the big deal began to look more and more promising, and after the December deliveries were provided for it seemed easy enough sailing for the young merchant.

Mr. Armour, who is no mean judge of such undertakings, and who has fought many a great commercial battle on the board of trade, in speaking of this splendid deal, said: "The pluck and wisdom manifested by him in the remarkable deal which he all but successfully consummated, challenged the admiration of men everywhere. I fully expected that he would carry the deal through safely, as there was merit in his position."

This is testimony from one who had felt the prowess of the youthful commercial athlete, and who, in a measure, had been put to his trumps to meet that antagonist on his own ground, and it is therefore all the more trustworthy as evidence that Mr. Leiter had a strong position to begin with.

But time and tide wait for no man, and ever-teeming mother earth gladly responds to the husbandman's toil. Unprecedented prices were responded to by an unprecedented crop, and bountiful nature offered to pour into Mr. Leiter's lap a much greater product than he cared to possess. He wisely closed the bins.

HALF WAY REST.

Honolulu Warmly Greets Transports With Volunteers.

Victoria, B. C., June 21.—The steamer Miowara arrived today from Honolulu, from which port she sailed June 10. She brings advice as follows:

The United States transports City of Peking, Australia and City of Sydney arrived at Honolulu together June 1. As soon as the three vessels were sighted, all Honolulu turned out to welcome the soldiers. The docks were lined with people, and as the vessels entered the harbor the spectators yelled themselves hoarse. Such a scene of enthusiasm has never been witnessed in Honolulu.

When the vessels docked it was late, so the order was given to allow no one ashore, but the next morning about half the troops were allowed to land. During the day they were given the freedom of the city. The men visited Waikiki and other points of interest, and had a pleasant time generally.

At noon President Dole and his cabinet received the officers of the expedition. During the reception, the steamer and the grounds of the executive building were thronged with people.

June 3, the soldiers were entertained on the grounds of the executive building. President Dole was on hand to welcome them. The utmost freedom prevailed, the affair being very informal. To each man the chief executive gave a word of welcome to Honolulu. An outdoor luncheon was served by the ladies of the city.

The transports left for Manila June 4. The Charleston steamed outside and waited for the fleet, which got away about 10 o'clock, with the Charleston in the rear. While the vessels were in port they took in the neighborhood of 1,600 tons of coal.

Of the 2,500 men among the various vessels, but two desertions were recorded, and they were from the Oregon regiment. Two men were left behind, one of whom was discharged for disability, and the other is in a local hospital.

The voyage down was pleasant, and the vessels traveled abreast most of the way, although it was necessary for the City of Peking and Australia to slow up and wait for the City of Sydney.

Eight cases of measles broke out on the ships. The sick men were separated from the other passengers on the ship by being quartered on the hurricane deck, and the surgeons had the cases well in hand when the vessels arrived.

Three Kamehameha school students, all native Hawaiians tried to enlist with Colonel Summers, of the Oregon regiment for the trip to Manila. The boys were worked up over the war, and were immensely enthusiastic in their American sentiments. Four men, regular members of the Hawaiian army, joined the United States forces at Honolulu, and were enlisted at once.

It was given out officially that the Bennington would not leave port until the arrival of the Mohican. The Bennington will go to Mare Island to be cleaned, and then will be sent to Manila as a fleet convoy.

While the United States troops were in Honolulu, over 7,000 letters were written by them. The postage, amounting to \$141, was paid by the Hawaiian government. Most of the writing was done in the legislative halls. The stationery was furnished free of charge.

THREE NEW BATTLE-SHIPS.

The Navy Department Advertises for Proposals.

Washington, June 21.—The navy department today issued advertisements calling for proposals for the building of three great battle-ships authorized by the last naval appropriation bill. These bids will be opened at the department September 1, and 34 months will be allowed for the completion of the ships after contract. That is the maximum, but bidders are invited to specify the time within which they can complete the construction, which indicates the department's intention to regard speedy construction as one of the determining factors in awarding the contracts. The time allowed by the department is about three months less than the period fixed in preceding contracts for the construction of vessels of this class.

Park City, Utah, Burned.

Salt Lake, June 21.—A special to the Tribune from Park City, Utah, says: Tonight the ideal mining camp of Park City is a mass of unlighting ruins, the first to which it succumbed beginning at 4 o'clock this morning and continuing with awful fury for nearly eight hours. Park avenue has sustained losses that cannot be computed with any degree of accuracy. The Chinese quarter is completely wiped out and not a dwelling remains on Raw hill.

The estimated loss is about \$1,000,000, with light insurance, which is distributed among a large number of companies. The actual figures cannot be obtained tonight.

Killed by Lightning.

Jacksonville, Fla., June 21.—When about to go in bathing at Palatka beach today James Gatewood, steno-grapher of General Fitzhugh Lee, was struck by lightning and instantly killed. Gatewood was from Richmond, Va.

Ran the Blockade.

Off Santiago de Cuba, via Kingston, Jamaica, June 21.—Three large cargoes of supplies are known to have run the blockade already, and great quantities of food are smuggled to Havana by way of the Isle of Pines, Cienfuegos, and other ports on the southwest coast having direct communication with the capital. It is understood, however, that nothing reaches Santiago.

The auxiliary cruisers Yankee and Yosemite are now scouting for the Spanish steamer Purissima Concepcion, which left Kingston Thursday morning flying the Spanish flag, with food and ammunition for Cuba.

Desertions From Blanco's Army.

New York, June 21.—A special from Key West says that advances from the headquarters of the Cuban civil government in La Guajana, Camaguey, reports that over 6,000 Spanish volunteers and many regulars from the Puerto Principe and Neuvius garrisons have deserted to the Cuban patriot army. The immediate cause of the desertions was fear inspired by the proximity of the American fleet.

Cows With Ear Rings.

A cow is the last creature one would expect to see with ear-rings, yet every cow in Belgium must wear them now. The director-general of agriculture has issued a regulation that all animals of the bovine species are to wear ear-rings as soon as they have attained the age of three months. Breeders are obliged to keep an exact account of the animals raised by them and the ring on which is engraved a number is fastened in the animal's ear to prevent the substitution of one animal for another.

"You May Fire When Ready, Gridley."

"You may fire when ready, Gridley." That phrase of Commodore Dewey's, as the Olympia steaming slowly, was getting the range of her guns on the Spanish fleet, is likely to be long quoted and widely remembered. Surely, says The Criterion, it breathes coolness, care, confidence in the face of an enormous and pressing responsibility. Compare it with the thunder it instantly awakened, the tremendous forces it loosed, the terrible destruction that followed, and you will find it the most typical Americanism of the quarter-century. Mark, too, its politeness, as well as its touch of comradeship.

Holds the Traces in Place.

A Kansas inventor has patented a whiffletree attachment to hold the traces in place, consisting of a hooked rod running parallel with the whiffletree mounted on each end of the latter and controlled by a spring so that it may be pulled out to slip the trace in position, the hook holding it in place.

Unloading Machines.

Railroad cars can be quickly unloaded by a new machine which is provided with a section of tubing large enough to receive the car, which runs in on two rails, after which the tube is lifted and rolled upward at an angle until the top of a chute is reached, an opening in the tube permitting the load to fall into the chute.

A LIVING WITNESS.

Mrs. Hoffman Describes How She Wrote to Mrs. Pinkham for Advice, and Is Now Well.

DEAR MRS. PINKHAM:—Before using your Vegetable Compound I was a great sufferer. I have been sick for months, was troubled with severe pain in both sides of abdomen, sore feeling in lower part of bowels, also suffered with dizziness, headache, and could not sleep.

I wrote you a letter describing my case and asking your advice. You replied telling me to do just what I followed your directions, and cannot praise your medicine enough for what it has done for me. Many thanks to you for your advice.

Lydia E. Pinkham's Vegetable Compound has cured me, and I will recommend it to my friends.—Mrs. FLORENCE E. HOFFMAN, 512 Roland St., Canton, O.

The condition described by Mrs. Hoffman will appeal to many women, yet lots of sick women struggle on with their daily tasks disregarding the urgent warnings until overtaken by actual collapse.

The present Mrs. Pinkham's experience in treating female life is unparalleled, for years she worked side by side with Mrs. Lydia E. Pinkham, and for sometimes past has had sole charge of the correspondence department of her great business, treating by letter as many as a hundred thousand ailing women during a single year.

Bells in Jerusalem.

Turks and Jews, as well as Christians, according to The Kolnische Volkszeitung, have been much excited by the sound of the three bells of the new Protestant Church in Jerusalem. For several centuries the use of bells by the Christians in Palestine, or elsewhere within the Ottoman Empire, had been prohibited by the Great Turk, who has conceded it now, however, to his friend and ally, the Evangelical German Kaiser. In the Theatre de la Turquie, published in 1688, it is said, "The Turks hate bells, as a symbol of Christianity, and do not permit even the Christians to use them. Only in a few remote mountain convents, or in lonely islands, where there are no resident Mohammedans, is the use of a bell tolerated."
