Commercial and Financial Happenings of Interest to the Growing Western States.

Beet Sugar at Oxnard.
Times are lively in and around the big beet-sugar factory at Oxnard, Cal. Fourteen thousand, nine hundred and fifty acres of beets have been planted in that vicinity and are now being prepared for harvest. Over 1,000 men are engaged in thinning the beets, for which service they receive \$1.40 a day, on an average. The new crop will amount to about 200,000 tons of beets, and when these are put through the big factory the result will be that about 80,000 tons of refined sugar is ready for the market, for it is estimated that the crop will average about 18 per cent saccharine matter. A large deal has just been consummated, whereby the American Beet Sugar Company, which owns the Oxnard factory, has purchased the large Patterson ranch, which contains 5,000 acres. The purchase price is said to be over \$600,000. This is the largest single purchase put through in many years in Ventura county. The new factory now has a capacity of 2,000 tons of beets per day, and since the capacity was recently doubled, it is now the largest sugar factory and refinery in the world.

A Distant Market For Flour.
The Big Bend flour mill at Davenport, Wash., annually ships hundreds of barrels of flour to the Orient, where it has built up a reputation that gives it a steady sale. The other side of the Pacific, where the countries are densely populated furnishes a market for a vast quantity of American flour, and heavy invoices are shipped direct to that foreign market from the Lome mill. At the present time the Big Bend mill is turning out several thousand barrels of its superior brand of flour for Japan, and this is only the beginning of what promises to reach greater shipments in the future to the Japan market.

Washington Hops.
The vines are reported to be making excellent progress and in many sections the hope never looked better. Nearly all the large yards are in fine condition, and, as a rule, are for this season well advanced. There are plenty of lice, but the sprayers are keeping them in check. There have been some contracts made at from 10 to 12 cents, but growers are generally backward about contracting.

Great Falls Wool.
Great Falls, Mont., has proved itself to be the highest and best market for wool in the state of Montana. Over 875,000 pounds of wool was sold one day last week, the highest price paid being 20 cents, and the lowest 17.5 cents, the whole averaging higher than any lots of wool so far sold in Montana, and the highest price paid being the top notch at which Montana wools have so far been sold.

For the New Water System.
The first carload of steel pipe to be used in the Cedar river pipe system at Seattle, arrived at that place last week. There are 112 feet, or 12 tons on the car. A train of about 40 cars is now on the way containing over 500,000 pounds of steel pipe. Each car has four pieces 28 feet in length, or, if the pipe is curved, five pieces 21 feet long.

A California Creamery.
The Chino Valley creamery, at Chino, Cal., is making all its milk receipts into butter now, the price of butter having gone up to 50 cents, it is more profitable to make butter than cheese. The association is receiving 7,500 pounds of milk a day and Manager Steele says that as best pulp comes in for feed the receipts will run up to 10,000 pounds per day.

Northwest News Notes.

Work will be begun soon on Snohomish and Willapa river canals in Washington.

The upper Willamette boats are able to ply their traffic much later this year than usual.

Seattle's exposition will run in opposition to the Washington state fair at North Yakima, both having chosen the same dates.

HEAVY BANK CLEARINGS.

Were Nearly Fifty Per Cent Larger Than a Year Ago.

R. G. Dun & Company, in their weekly review of trade, say: There is certainly room for some decrease, when the volume of payments through the clearing-house, in July, is 47.3 per cent larger than last year, the best of all previous years. So great an advance would warrant expectation of some setback under ordinary circumstances. This year, the unusual freedom from labor troubles, about July 1, is followed by some signs of a tendency to strike, because great works are committed far ahead and cannot halt without loss. But interruption of business by labor troubles of all sorts has been less than in any other July for years. Nor is the movement of products hampered. Western receipts of wheat in July have been 18,863,826 bushels, against 7,309,333 bushels last year to date, and corn, 20,455,451 bushels, against 9,173,335 bushels last year, even the latest week showing large gains over last year. Exports of wheat, from both coasts, were 9,939,280 bushels, flour included, against 8,833,192 bushels last year. Copper is strong, with spot scarce and lead weak at \$4.55, but tin is quoted at \$31.55, London leading as usual.

Shipments of boots and shoes from the East, in four weeks, have been 394,374 cases, against 360,535 last year; and in 1895, the nearest previous year, 351,359 cases. Leather continues strong and scarce, with a combination of packers lifting prices of hides at Chicago, so that many of the takers are quitting that market.

Failures for the week have been 151 in the United States, against 225 last year, and 20 in Canada, against 26 last year.

YELLOW JACK'S WORK.

Disease Is Scattered at Hampton and More Cases Are Expected.

Washington, Aug. 2.—The latest official advices received up to 8 o'clock tonight show a total of 88 cases and seven deaths from yellow fever at the soldiers' home at Hampton, Va. One new case developed at the home today. Thus far the disease has been confined to the home, but all surrounding towns are excited, and a rigorous quarantine is being maintained.
Dr. Washin, of the marine hospital service, is now in charge of affairs at Hampton, and is working in co-operation with the local boards of health. He has strengthened the gordon about the town of Phoebus, which he reports in very bad sanitary condition. The fact that only one new case appeared today is encouraging to the officials here, who are taking every measure to prevent a spread of the disease. They feel that the fact that the affected locality is in the hands of the government and under one management, will be of great value in dealing with the scourge, and enable better results to be obtained than where epidemics broke out in commercial places.

Hilo Is Out of Danger.

Honolulu, July 25, via San Francisco, Aug. 2.—The latest reports from the volcano of Mauna Loa, received to day by way of Kalaheia, is to the effect that a great change took place in the course of the lava flow on the night of July 18. The mighty stream of burning lava which was steadily flowing toward the town of Hilo and threatening its destruction, has been diverted in its course so that the danger to life and property is less imminent than at the time of the previous flow. Ever since the flow began, July 4, the course of the stream of lava has been from the highest active cones down to the mountain heavily dusted, past all the sources of lava till it reached and partly crossed the flow of 1880. Then it turned abruptly to the north in the direction of Kalaheia, on the side of Mauna Loa. It spread all over the side of the mountain, occupying an area almost a mile wide. This was the condition of things up to the night of July 18.

Some time during that night the first part of the stream, flowing eastward, broke through its banks about half way from its source, to where it turned northward down the mountain parallel with the old channel, but further west. This is carrying the lava less directly toward Hilo and keeping it nearer the ridge which divides from the slope off in the direction of the Kohala coast.

No Remedy for Southern Lynchings.

New York, Aug. 2.—Governor D. M. Jones, of Arkansas, replying to a query from the Times as to the cause of lynchings in the South, said: "In my judgment, the so-called delays in the administration of criminal law so far as Arkansas is concerned, have not been the cause of the lynching of any person accused of crime. The lynchings in this state have generally been in cases of rape and attempted rape, and especially when the assault has been made by a negro upon a white woman. This crime is so heinous and revolting that all the laws in the world, no matter how severe the punishment or how speedy its infliction, cannot in my judgment prevent lynchings when the accused falls into the hands of the enraged mob."

Boycott in Cleveland.

Cleveland, Aug. 2.—Every branch of the Big Consolidated system was in full operation today, but cars carried few, if any, passengers. The boycott is becoming the most important factor in the struggle. The company officials say it is bound to fall of its own weight within a few days. On the other hand labor leaders declare the boycott has just begun and that when it reaches its full scope all classes and all interests will be affected.
The coroner today found Hawley, non-union conductor who shot and killed Henry Cornwell, guilty of killing without provocation or excuse. Hawley is in jail.

Report on Smelter Strike.

Denver, Aug. 2.—The state board of arbitration today filed its report on the investigation of the smelter strike. The decision reached is a compromise between the demands of the smeltermen and the concessions of the company. The question of union or non-union labor is ignored. It is thought both sides will accept the decision, and work will be resumed soon.

Five Killed in an Explosion.

Detroit, Aug. 2.—A special to the News from White Cloud, Mich., says: A threshing machine engine exploded near Big Prairie, Charles Haight, Alvin Haight, Charles Crutcher, George Overly, Cecil Priest and Raymond Howe were killed. Oscar Evans and George Haight were severely injured.

An Indian's Confession.

Christian Life tells this story of an Indian's confession. This man's heart was so changed that he left no doubt of it, though he seems to have made no effort to explain the mystery of the change: "I came to Mr. Young first time last winter, and say I wanted to be his friend and the friend of God. People say: 'You turn your heart to God,' and laugh at me. I say nobody's business what I do. I mean to serve God. 'Long ago we blind, all in darkness. We call the crows and fish and everything God; but God pity us, and give us daylight. He don't want us to die altogether. He pity us. 'Not hard for me to believe in God; that Jesus is the Son of God; I feel different in my heart. My old fashioned heart was different. I feel all earthly things. I try to do right, and pray God. I want to be swift in God's way.'"

A Brave Blunder.

Never perhaps was a more regrettable order given than that which sent a hundred cavalrymen against the confederate rear guard at Falling Waters. Two depleted companies of the Sixth Michigan cavalry—Custer's men they were and heroes every one—were ordered to charge the breastworks which General Heth and Pettigrew had thrown up to cover the retreat of the Southern army across the Potomac. It was hopeless, but the men never faltered. They galloped along, unmolested at first, for no one dreamed they could be Union men advancing to an attack. Presently they encountered a little knoll where a number of officers were standing and dispersed the group, mortally wounding General Pettigrew. Heth's men now opened upon them a murderous fire, and as was long supposed in the South, where the pluck of the hopeless onset was much admired, all were shot down. As a matter of fact, six men of the hundred lived through the fire and rode or ran back to their lines. One of these, Lieutenant Elliott M. Norton, afterward won a medal of honor.—N. Y. World.
