A Nebraska man who saw a twister start writes about it to a magazine. It is harmless at the start but very powerful when some farmer tries to stop it by having his house in its path.

HOITT'S SCHOOL.

Menlo Park, San Mateo County, Cal., with its new buildings, newly furnished and complete laboratories, beautiful surroundings and home influences, is one of the best equipped schools for the training of boys and young men on the coast. It is in charge of Dr. Ira C. Hoitt and is accredited at the universities. Send for catalog. Tenth year begins August 6, 1900.

The Georgia man who claimed up his daughter because she married in opposition to his wishes merely demonstrated that she was wise in marrying anyone who would take her away from him.

Experiments have for some time been made in England with smokeless coal. This peculiar fuel may be burned either in an ordinary grate or in a basin in the middle of the room without developing any perceptible odor or smoke at any time. The fire looks like the finest coal fire, and the flame is white and blue.

Like the Deadly Under-Current

which grasps one without warning, the mucous membrane which lines the entire body suddenly becomes weakened in some spot and disease is established. It may be of the lungs, the head, throat, stomach, bowels, or any other organ. Wherever it is, and whatever it seems, it all springs from the same cause—

CATARRH

or inflammation of this delicate pink membrane.

The system is weakened in winter. The delicate lining is more susceptible to irritation or inflammation, and thus we have pneumonia, grip, colds, coughs, fevers, etc., all catarrhal conditions which may easily be checked by one catarrh cure—Pe-ru-na.

That's the only way out of it. You may dose forever—you will not be well until you try the true cure and that is Pe-ru-na. You may think your trouble is some other disease and not catarrh. Call it what you will, one thing is sure, your system is affected and must be treated, and Pe-ru-na is the only remedy which reaches the right place and does cure.

MINES AND MINING

Consul McCook Says Alaska Is Deserving to be a Wonderful Mining Camp.

"Alaska is destined to be a wonderful mining country," says United States Consul McCook, at Dawson, in a letter to the state department. The Tanana district, he says, is creating a stir and is dividing honors with the Kuskokwim country. In the Tanana region the miners claim they can get 10 to 30 cents' worth of pay dirt to the pan, and this in summer digging, with only two or three feet to bedrock, is equivalent to \$1 a pan where one has to go 25 feet to bedrock.

"The great necessity now in Alaska," says Consul McCook, "is good roads, good camps and the prospecting of comparatively unknown sections."

Great dissatisfaction was expressed at Dawson City this spring after the wash up, he says, by miners who worked for men who had leased mining claims from the owners. The law men sign contracts to work so many feet of the claim during the season, to receive 50 per cent of the gold coming out of the claims, and the lessee agreeing that all men working the property will be employed under a written contract by which they promise not to hold the claim in any way liable for their wages. It has turned out in hundreds of cases that the cost of working the claims has taken more than 50 per cent of the output, the lessees' share. Thus the men employed on the claims have been deprived of their wages. Lay men on rich claims, says Consul McCook, can do very well, but the majority of the claims cannot be worked on this basis at the current rate of wages.

E. C. Senkel, gold commissioner of Yukon territory, has information that Canada is to introduce radical reforms in the Klondike. The royalty system is to be done away with altogether and a government assay office is to be established at Dawson and a compulsory fee of 3 per cent charged for assaying gold and exchanging for drafts. The 3 per cent must be paid on all gold taken from the country, whether the government assay office be patronized or not.

Lucky Queen Hill.

A rich strike has just been made by Corliss & Roach, on Lucky Queen hill, about 10 miles from Grant's Pass, Or. It is on the Double Eagle claim, which was purchased last year for a very low figure. The strike is in the nature of a very rich seam, one to two inches thick, with a body of quartz on either side. The gold is all through the seam, which is easily panned up, and runs \$10 to \$15 to the pan.

Reviewing the Gem Mine.

The Gem mine, near Sparks, Eastern Oregon, now owned by Portland capitalists who purchased the property several months ago, has shown exceedingly rich ore, according to Manager N. J. Jenkins. A depth of 400 feet has been attained and levels are being run 450, 350 and 300 feet in depth. An uprise from the 450 to the 350-foot level is being driven for air. A contract has been let to sink a prospect shaft 300 feet south of all previous workings. As work progresses, large ore bodies are being exposed, and there is ore enough in sight for a 10-stamp mill for years to come. The old Gem was worked 30 years ago by Captain Ainsworth and Captain E. M. White, but was abandoned by them. The wealth of the mine was little known, as recent developments show. The property now bids fair to be a great producer.

Electric Line for Republic.

A petition is before the council of Republic, Wash., to grant the Republic Gold Mining Company a franchise for the laying of track and the running of steam, electric or horse cars through that city, the erecting of poles and the transmission of electricity for lighting purposes for the municipality and for power. Should the franchise be granted, the tramway system will be built first. The route for the tramway has been surveyed. From this line, branch lines will run through the cross streets.

Northwest Notes.

Denny pheasants are becoming plentiful in Rouge River valley.

Klamath Indians have sold 65 horses to a government buyer at prices from \$25 to \$40 per head.

A panther that had been killing goats was shot last Sunday by William Templeton, of Crown Point, Or.

Fire is destroying much valuable timber in the mountains west of Enterprise, Or. The fire started about a week ago.

A Chinese vegetable peddler at Spokane cut off his queue to convince skeptical persons that he was not a Boxer, but a Christian.

An exceptionally large fruit crop is assured this season in the Rogue River valley. One farm will yield from 50 to 60 car loads of apples.

Walla Walla's outlook for a fruit fair is good. Its soliciting committee got \$1,000 from business men in three hours, and promises of much more.

Charlie Linn, a boy at Salt Creek, in Polk county, Or., has caught 153 digger squirrels with a steel trap since last March. He gets 1 cent each for their scalps.

Salmon have commenced to make their appearance in the Wallawa river below town, and soon Chief Joseph's gang of Indians will be here catching and drying them for winter use.

The creamery at Chehalis, Wash., turned out 10,000 pounds of butter and 500 pounds of cheese during June. The Bee-Nugget estimates that with the Toledo, Browning, Centralia and smaller creameries in operation Lewis county's dairy product will reach \$75,000 to \$80,000 per year.

John Bennett, a logger, was fatally injured in North River valley recently, by being hit in the back of the head with a grab iron, which was pulled out of a log and struck with great force. He died the day after the accident.

The Sunset Telephone Company's failure to reach a settlement of the strike of its employees, with consequent poor service to patrons, has led many business houses at Seattle to order their phones removed and to employ bicycle messengers. Resolutions adopted indicate that the business men are not pleased with the company's course, but side with the girls who are out.

STILL FAVOR THE BUYER.

Trade Conditions Do Not Warrant Any Great Activity.

Bradstreet's says: Trade conditions still favor the buyer; general fall demand, though fair in view of the mid-summer condition, is still below expectations, and below a year ago; bank clearings are at the lowest for two years past, and failures are slightly more numerous, though no marked tendencies are perceptible. On the other hand, gross railway earnings hold their percentage of gain previously shown, and where prices are made low enough to satisfy buyers, a heavy business is uncovered, and readily booked, pointing to demand being still present and waiting disposal. The crop situation, as a whole, is better; the outlook as to corn is for a 2,100,000,000-bushel crop. Spring wheat is turning out better in quality and quantity than expected, and there has been an unquestionable improvement in cotton crop conditions. The yield of apples will be the largest in many years, and fruits generally are yielding liberally and commanding good prices.

The iron and steel industry furnishes the most notable example of reduced prices, inducing a heavy business, while the outlook is still a confused one.

The cereals are all lower this week, partly on better crop reports, partly on lower cables, but largely on the growth of bearish feeling after the late reaction.

Beef products are generally higher on army demand, while tin is seeking a lower level in sympathy with foreign markets and increased supplies.

Wheat, including flour, shipments for the week, aggregate 3,327,003 bushels, against 2,369,743 bushels last week.

From July 1 to date this season, wheat exports are 14,568,869 bushels, against 18,508,96 bushels last season. Business failures for the week number 170, as against 183 last week.

Showing of Ignorance.

By the printed reports of a recent examination of applicants for positions in the census office at Washington an astonishing amount of ignorance is shown to exist among the applicants. They are especially and lamentably ignorant, says the Washington Star, regarding the famous men of history—as to the time in which they lived and as to what they accomplished. Fifty-two persons entered the competition and only 10 reached a percentage above 50, while 10 failed entirely. Some of the answers would be taken for jokes did they appear anywhere else than in a department report.

There was Jefferson Davis, for instance, who was placed on record by one applicant as "a famous general of the war of 1812." Another stated that Mr. Davis "was president of the United States and wrote the declaration of independence." The first postmaster general was another who worried the applicants considerably. One man suggested George Washington, another Patrick Henry, and a third Wendell Phillips. A young southerner disposed of all argument by stating that it was "a gentleman named Bissell."

William Cullen Bryant, whose boast was, "I am a bookman," had his identity mixed with that of the Nebraska orator by a young woman, who stated "William Cullen Bryant was the Democratic candidate for president, a silver advocate and a resident of Nebraska." And even Abraham Lincoln appeared to be examined in varied lights. Here are some of the answers to the inquiry concerning him:

"Lincoln was a great general and distinguished himself in the war of 1812."

"Abraham Lincoln was a personal friend of the colored race and was one of the signers of the declaration of independence."

"Abraham Lincoln was born in Illinois, where he worked from rosy dawn till dewy eve as a farmer's lad until he became president."
