ATTENTION, FARMERS.

Are you securing anything from your crops for the Washington County Exhibit at the State Fair this Fall? Or are you depending on the "other fellow"?

Do not allow a nice piece of grain to be cut and threshed with out saving a small sample; cut it close to the ground with a reep hook and preserve it.

Have you anything in the vegetable line that is promising? If so, cultivate and water it.

We certainly must have your cooperation or our exhibit will be a failure. We are experiencing great difficulty this year in procuring samples, so ask all to come to our aid.

Clark & Dixon, of Forest Grove, were in the city yesterday, and made this office a pleasant call. They have just concluded the moving of the old cannery building at Forest Grove. Inadvertance made this paper say, last week, that the structure had been moved by another.

Dr. Large, of Forest Grove, was in town today, and says that the city of his adoption has recently built a new tower for the fire alarm bell, and the town has bargained for five acres of land on which is to be built the new condensed milk factory. Sufficient cows have been pledged, he says, to make good the request of the promoters, and he thinks that the building and operating of the factory is now but a question of time.

A spark from the freight train, Tuesday, ignited moss in an oak tree by the side of the track west of the depot, and, in turn, set fire to the Carstens Bros' planing mill. The department was called out, but by the time hose was connected, the mill was too far gone to be saved. The dry house was ablaze when the boys arrived, but was soon saved. Attention was then turned to the great ricks of railroad wood belonging to Hare & Schmeltzer, and it was six o'clock before the fire was subdued. The old hose broke at one time, and delayed the work of getting the fire under control. Had it not been for the 500 feet of new hose put in last year, it is likely that Benson's foundry would have gone up in smoke, with all the building in proximity. About 25 cords of wood were burned. The total loss, building and all, will amount to perhaps \$250 or \$300. There was no insurance. In all likelihood the railroad company will have to pay the loss.
