The costs will be paid by the plaintiff. The jury in the case: H. W. Hesse, R. P. Simon, T. B. Perkins, C. Blaser, Geo. Morgan and John Dennis. The hop market continues strong and the majority of growers have not sold, nor are they in any hurry to dispose of their holdings. So far 31 cents has been the top price for choice lots, and the buyers are not going above that quotation. As a matter of fact, quite a number of lots have been sold at a fraction over 30 cents, but in the most of these cases it was the result of need of money. The big growers around this section say that they are in no hurry to let go of their holdings at the thirty-cent mark.

Don't forget to ask for coupons with which to vote on the St. Louis Fair contest. Then vote a choice. The firms giving out these coupons are: Patterson & Son, John Dennis, Bailey's Pharmacy, Hillsboro Argus, R. H. Greer, Mrs. Vrooman, Jerome Palmateer, F. R. Dailey and the Second Street Harness Shop.

HARTRANFT FOR HIGHER SALARIES

Teachers Turn out Splendidly and Take Great Interest in Session

The annual teachers' institute is in session here, convening in the court house yesterday morning. The program for yesterday was: Address by Prof. Hartranft, of King County, Wash., on "The Status of the Teacher, in which he advocated closer application to the profession of teaching, and a united effort to have an increase in the salaries of teachers. Mr. Hartranft presented his subject in a forcible manner, and clearly showed that teachers, as a rule, were not receiving a salary commensurate with their services, as compared to other work in a thousand and one professions. He held that from the fact that it takes years of preparation to make a good teacher, and that failure in one or more difficult branches throws the teacher out of the chosen profession, that they should be well paid for their efforts. His remarks involved a thorough exploitation of the subject, and caused his listeners to have a more thorough appreciation of the most important branch of education before the public. Mr. Rice, of the Monmouth Normal, lectures on "Methods," and his address was well received. Prof. Adams, of Mt. Tabor, handled the subject, "Relief, the Basis of Geography."

SEPTIC TANKS ARE BEING INSTALLED

Substitute for Sewer, and Really More Sanitary

SIX ALREADY BUILT IN THIS CITY

Tank Costs About \$60, and Total Plumbing and Fixtures, \$65 or \$70

The septic tank has come to stay as a substitute for the sewer. It is really more healthful from a standpoint of sanitation. The tank is nothing more than a concrete receptacle, varied in size, through which water and refuse from toilets and sinks pass—that is to say, the water passes through, but the organic matter is eaten up by parasites. Six are already built in Hillsboro, and will soon be in operation. Those having them are: A. C. Shute, residence; Geo. R. Bagley, residence; S. B. Huston, residence; John Milne, residence; Dr. S. T. Linklater, residence; The Delta (Dr. Linklater) at the rear of the Linklater block. These tanks with connections and fixtures for the closets, cost all the way from \$120 to \$150. So far Contractor Baldwin has built 5 of them, and Sabin, 1, the Nelson Hardware Company furnishing the fixtures and the plumbing. Many more of these tanks will be installed here as soon as Spring comes, and a few more will be built this Fall.

The efficiency of the septic tank is due to the disintegrating action of countless bacteria upon the refuse admitted into the tank. It is a process of purification made more rapid and complete by the favorable conditions found in the tank, which is so constructed as to foster to the fullest extent possible the growth and propagation of the anaerobic microbe, an organism which flourishes without oxygen or light and which feeds upon the organic and cellulose matter which is thrown into the receptacle.

In the process of the purification accomplished by the septic tank two agents are employed. The first, and the prime agent, is the anaerobe, which attacks and, by disintegration and consequent chemical change, liquefies and renders nonpoisonous and nonoffensive the foul deposits of the tank; the second, the aerobic, the opposite or oxygen-loving bacteria opposed to the anaerobe, which completes the purification when the effluent liquid from the tank is allowed to escape on to the filter beds or into the stream or other means by which it is distributed or diluted. The first attacks the solid and poisonous matter, breaks it up into infinitesimal particles and into gases, where it is liquefied by chemical change, and approximately 70 per cent of its offensive qualities removed and destroyed; the second revitalizes and purifies the small remainder by bringing it in contact with oxygen and further chemical change.

The completeness and success of the action of a septic tank depends primarily on three things. In the first place, the tank must have a sufficient capacity to allow 30 gallons of waste to each person to be served by the tank every 24 hours. In the second place, it must be so constructed as to cause the least possible disturbance of the fluid mass, either by the incoming or outgoing pipes; in other words, the contents of the tank must be in the nearest possible state of quiescence to produce the best results. In the third place, not, however, of such vast importance, the tank should be without air and light. These conditions being observed, the tank will give satisfactory results.

As a matter of information The Argus will state that those who wish to know the cost of tanks and equipment can see Wm. Nelson, of The Nelson Hardware Company, who will tell you all about it.

FACTS ABOUT THE EYE.

Eye Glasses, or Spectacles, properly fitted and adjusted afford in many instances positive relief from a long list of Nervous Disorders. The human eye is intimately connected with the brain, over which it exerts a strong sympathetic influence, and if there is anything wrong with the eye, its effects are soon felt in the nervous system. There may be no signs of trouble in the eye itself, and still an error in its refractive qualities may be the cause of almost any nervous trouble the body is heir to. A person may be born near sighted, far sighted or astigmatic, and not be aware of the fact himself, still either of these defects will, in many cases, bring about nervous troubles, chronic headaches, including sick headaches, the cure of which would be impossible until the sight is corrected with spectacles. Dr. and Mrs. C. W. Roberts make free examinations of the eyes, at the Tualatin hotel, Hillsboro, for one week longer.

Sheriff Connell went to Tigardville, this morning, to bring up Thos. Aldrich, who set fire to his house, yesterday, while in a tantrum superinduced by his troubles, matrimonial and otherwise. Aldrich had been drinking lately, owing to the fact that his wife has sued for divorce. It is reported that he tried to burn himself up, as well as his household effects. Aldrich was examined by Dr. S. T. Linklater, and adjudged insane. The patient had a bad burn on the back, between the shoulder blades, but he was as merry as a nightingale, singing and whistling, the entire time, with his eyes closed. When told to stick out his tongue he made several faces and otherwise seemed to enjoy the performance. As for time and tune, he certainly has both, and his voice would put to shame some of those now holding down the boards in opera. Aldrich was taken to the asylum this evening by Sheriff Connell, this being his second examination for insanity.

The republican speaking at the court house Tuesday evening was well attended, and addresses were made by Grant B. Dimick, of Oregon City, one of the presidential electors, and Gordon Hayes. This is the only meeting of the year here, and as neither was much of a speaker, the enthusiasm was not as great as it might have been. There are twenty local spell binders who can reel off more of interest about republican politics than either of the gentlemen who made addresses. The democrats and populists will have no speaking this season, or at least none is yet announced.

James H. Sewell, the hop grower, has been awarded first prize for a hop exhibit at St. Louis. This is the third time that Mr. Sewell has been awarded first prize from National Fairs—at Chicago, Buffalo and at St. Louis. Washington county thus gets a big honor, and Mr. Sewell is receiving the congratulations of his friends.
