Speaking of the meat market, have you noticed that it is hard to get veal these days? And now for the reason. If you happen to be driving through the dairy sections you will discover that the bull calves are killed when they are a few hours old. Only the heifer calves are saved. The reason—his condenser is paying \$1.25 for milk, and the milk that would fatten a veal for the block would bring a farmer eight or ten, or perhaps twelve dollars, while the block would not bring as much. So we have to depend on the farmers up in the hills for veal.
