

# THE HILLSBORO ARGUS.

VOL. XV. HILLSBORO, OREGON, MARCH 26, 1908. NO. 2

## EXPECT LARGEST PARADE IN HISTORY

County now has Finer Stations Than in Past

COMING FROM COMPASS POINTS  
Grand Exhibitions of Horses in Assured Visitors

Saturday, April 18, good weather or bad, is expected to be the greatest "horse day" Hillsboro ever has known. This is the date set for the big stallion parade, and the event is expected to eclipse all efforts of the past. Time was when Hillsboro had these affairs, and they were always successful, but a new era in horse-history has opened. Riley Cave, secretary of the Northwest Stallion Association, and who is in charge of the coming show, says:

"We expect to witness the greatest horse event ever pulled off in the Pacific Northwest. It will be an eye-opener to all of us. Never in the history of this county have we had so many fine, valuable, and blooded stallions, and I get word from all points of the compass that horsemen will have entries—even Portlanders are writing that they are coming. I confidently expect that this is to be the biggest 'horse event' in point of numbers and excellence of breeding ever held in the Pacific Northwest—and that means something. All county owners of standard stallions, except one, and his horse is a sick horse, and they will be on hand, and you may state that we shall have a blue ribbon parade and a banner crowd."

## THE SPRAY THAT WINS

In order to have every one who has fruit trees try the celebrated Phoenix Lime and Sulphur Spray, I will, until the end of the season, sell the Phoenix spray at \$8.50 per barrel of 50 gallons, f. o. b. in Portland, or at my farm at 20c per gallon. This spray is recommended by Prof. A. B. Cordley, and is guaranteed of full strength. Its test is 30 per cent. It saved my orchard of about 1,000 trees from dying out, as the trees were encrusted with the San Jose Scale, hence I am recommending it. I will ship to any part of the county.

Several slides occurred on the Wilson River road, and the Trank river was reported as being higher than the oldest inhabitant had ever seen it.

## SMALL BUYERS O. & C. LANDS NOT DISTURBED

Government will Work for Forfeiture of Grant

HAWLEY QUIETS FEARS OF MANY  
Many Buyers of O. & C. Land in This County

A Corvallis man has received a letter from Congressman Hawley, in response to a letter of inquiry, as to what effect forfeiture of the Southern Pacific's O. & C. land grant would have on small buyers. Congressman Hawley makes an answer as follows.

One hundred and twenty-seven thousand acres of railroad land was sold in compliance with law and cannot be disturbed. Also 170,000 acres more were sold according to law, except as to price, which I understand can never be questioned. Such a purchaser is unaffected by any proceeding. The resolution, moreover, does not affect the status of the purchasers anyhow. The amendment would operate only to confirm titles of large purchasers. The question is: Can Congress amend in any instance without defeating all action against the railroad? The Department of Justice argues that the question be left to the courts at present."

## Farm for Sale

I wish to sell my farm, containing 152 acres, 110 acres under plow, good house, barn and orchard, 34 miles south of Hillsboro, and one mile west of Farmington. For further information, address,

The remains were laid away in the Hill cemetery Monday.

## ROAD PETITION NO. 443

E. Wenstrom, one of the petitioners for Road No. 443, sends the following letter for publication, dated at Laurel, March 17:

"In your issue of March 12, in court proceedings, we see that Road Petition No. 443, was dismissed on report of viewers. For information of the numerous signers of said petition, will say, that the viewers, County Surveyor Walker, W. M. Thurston and J. H. Davis made their report in my house, and the County Surveyor, L. C. Walker, told me afterward that the bridge across the Tualatin river was left to the county court as to the time of building it. I am convinced that L. C. Walker told me the truth; now, it seems that the county court wishes the blame to rest on the viewers; will also say that Judge Goodin told me, by telephone, on the evening of March 9, that the report on the road was favorable, but that the bridge question was left to the judgment of the county court.

We desire further information from the county court, and we ask that an explanation be given through the columns of this paper."

The county judge being asked for an explanation in this matter makes the following statement: "The petition to establish road No. 443 was the most important road matter to come before the county court for some time, because it called for the building of a bridge across the Tualatin river, between the Harris (or Farmington) bridge and the Scholls bridge, and about one mile below the former. The viewers appointed by the court recommended the establishment of the road with the understanding that Washington County should be under no obligation to build a bridge across the river until the county court is satisfied that such bridge is necessary for the convenience of the traveling public. After satisfying themselves that they could not make any such conditional order legally, the county court communicated with the viewers, and was informed that they could not recommend the establishment of the road unless the building of the bridge could be postponed as set forth in their report. The court therefore voted to disallow the road."

## JAPANESE ONION MEN TO BE BARRED

Fear Little Brown Men will Ruin the Business

PRESIDENT FANNO AGAINST JAPS  
Not Wanted in Washington County Truck Land

The Japanese are endeavoring to make long time leases of Washington county beaverdam land, for the purpose of getting a monopoly on the onion and vegetable products of the county, and are seeking such leases in other parts of the state, but thus far without success. Washington county produces more onions than any other county in the state, by reason of its fine beaverdam tracts, and the Japanese are very anxious to get a foothold here.

A. J. Fanno, president of the Confederated Onion Growers' Association, is opposed to leasing lands to the Japanese on any terms, fearing that the prices of onions would be put down by the little brown men, thereby injuring the industry. So far, the owners of onion land in this county have stood as a unit in refusing the offers of the Japs. If the Japanese get the same control of onion lands in this state which they have in California, the white population would better pack up and go out of business.

CLATSOP-TILLAMOOK ROAD  
Astoria and Tillamook are to be connected by the steel rails of the P. R. & N. It is not known which of two routes will be taken from the bay to Astoria, whether the inside, or the outside or beach route. With reference to the two routes, the Tillamook Herald of last week, says:

"There are two routes under consideration in the two counties. The beach route, running from a point about two miles east of Push, in this county, to a junction with the road already constructed on the North Fork of the Nehalem, with the main bridge across that stream. This will make the Buchanan trail available for all who desire to use it coming north. The adoption of this line will leave Clatsop with 13 miles to build, including bridges and culverts and all materials, will cost in the neighborhood of \$2000 per mile; Tillamook having completed her section to the boundary. The other, or outside route, follows the ocean beaches from a point to which Clatsop has built on the Elk Creek road, and with a bridge across that creek, will utilize the beach as far south as Arch Rock, leaving one and a half miles for this county to complete to the southerly line; the entire Tillamook section yet to be built by that county; and being equal in scope to that yet to be constructed by Clatsop on the inside road."
