Bliss and Meek Win on Legislative Ticket

Friday was a rainy day, and the vote in the county was much higher than was expected. The weather, while an earnest one, was nevertheless good natured. As is usual, at primary elections, some men were defeated. There were a number of good men to select from, and many of the candidates who were defeated, have no cause to be ashamed of the strong support given them. Godman carried North Hillsboro by 2 votes, and Smith led in the South Hillsboro by 5; Bailey was a close third in both precincts, and had pluralities in both Cornelius and the Grove. Bailey's plurality over Godman in the county was 126; Smith, 237; E. B. Tongue had no opposition for District Attorney and received 1367 votes in the county. Hancock's plurality over Buchanan in county, was 345; Buchanan, 534. Barrett for Joint

While hauling a load of potatoes from his home on Pumpkin Ridge to the railroad, Tuesday, Hans Rook had the misfortune to lose a horse valued at \$200. The animal stepped on a sharp stick, which pierced its breast, inflicting a wound from which it died in a few moments. This is the second horse to be killed in a like manner, within six months in this county. The county probably will be called upon to pay for the horse.

FRANK STEWART GETS A BIG APPOINTMENT

Former Hillsboro Boy Makes Good With Uncle Sam

RECEIVES A SPLENDID POSITION

Perfected Out Swindlers and Gets Promotion

Miss Letitia Imbrie, who is visiting in California, recently met Frank Stewart, a former Hillsboro boy, graduate of Pacific University, and admitted to the Oregon bar. She writes her parents that Stewart, who is well known here, and who visited his aunt, Mrs. L. A. Rood, and other relatives in this city a few months ago, has been appointed second assistant United States Attorney, and Miss Imbrie sends the following from a California paper:

United States District Attorney Oscar Lawler yesterday announced the appointment of Frank Stewart as his second assistant, to take special charge of postal cases. He was admitted to the Federal court on motion, and will take up his new duties at once.

Stewart has been in the postal service eight years as an inspector for this district, and he has earned an enviable reputation for keen, faithful work. Since his appointment in 1904 he has handled some of the biggest criminal cases that have come under the supervision of the Federal officials and his careful preparation of evidence has almost invariably led to indictments by the Federal grand jury. In ferreting out the Ollie J. Watson swindle, he won the approbation of the entire department, and his persistent and relentless pursuit of the wily swindlers is mainly responsible for the indictment of all the associates of the late general manager of the California Fruit Growers' Association.

In other matters, not so spectacular, he has "made good," and he is considered one of the best posted inspectors employed in the west. His knowledge of law aided him materially in his work. He was admitted to practice in Oregon, after a course in the law department of the University of Oregon.

He accepted the position in the U. S. District Attorney's office to enter a broader field of practice than that afforded by the postal service.

Wm. D. Wood, Candidate for State Senator.

HILLSBORO CONDENSER MAKING IMPROVEMENT

Ice Plant Will Soon be in Operation

WILL HAVE ELECTRIC PLANT

Gives Steady Employment to Sixty Five People

The Hillsboro Condenser will soon have a modern and up-to-date plant. To that end, a new 350 horse power pump will be installed within the next 30 days, supplanting the 250 horse pump now in use. Water will be pumped to the condenser from the Tualatin river by a 100 H.P. engine. A generator will furnish the electric juice for the purpose, and in addition the company will put in a 10 ton ice plant, for cooling the milk, and if there is a demand, will supply the public with ice. The ice plant will turn out from 5 to 10 tons daily, and more if required. A new 100 horse power boiler will be added, giving the plant facilities never before enjoyed in the economical and speedy handling of milk, and doing away with old and slower methods. Mr. Hicks, the local manager, says that there are now about 65 persons on the payroll of the Company, and that additions to the building will follow as a sequence to the many new machinery features to be installed. When the electric plant is completed, the big pump on the Tualatin, can be started to work by simply pressing a button at the factory. The Company is to be congratulated on its improvements.
